Managing Information Technology Resources in Organizations in the Next Millennium Information Resources Management Association. International Conference (1999 : Hershey, Pa.), 1999

Challenges of Information Technology Management in the 21st Century Information Resources Management Association. International Conference, 2000 As the 21st century begins we are faced with opportunities and challenges of available technology as well as pressured to create strategic and tactical plans for future technology Worldwide IT professionals are sharing and trading concepts and ideas for effective IT management and this co operation is what leads to solid IT management practices This volume is a collection of papers that present IT management perspectives from professionals around the world The papers seek to offer new ideas refine old ones and pose interesting scenarios to help the reader develop company sensitive management strategies

Technologies & Methodologies for Evaluating Information Technology in Business Davis, Charles K., 2003-01-31 From the macro management level to the micro business detail information technology IT is essential to modern business success and necessitates a new kind of knowledge application IT evaluation This academic analysis covers IT evaluation strategies for measuring its impact on individuals organizations and small mid size and large businesses Covered are the Technology Acceptance Model TAM software measurement frameworks the balanced scorecard and project management

Project Management for Modern Information Systems Brandon, Daniel M., 2005-12-31 This book describes and illustrates practices procedures methods and tools for IT project management that address project success for modern times Provided by publisher

The Digital Challenge Shirin Madon, S Krishna, 2018-02-06 This title was first published in 2003 Information and communication technologies ICTs are increasingly being recognized as vital to the economic growth and global inclusion and participation of developing countries This book brings together both academics and practitioners to provide a comprehensive and insightful overview of ICT and development around the world It examines the role of IT in providing new economic and industrial opportunities in increasing access to global information and communication in assisting small cultural and ethnic groups to overcome disadvantages of physical distance and in catalysing initiatives towards democratic decentralization and empowerment of citizens It also critically appraises major problems such as inappropriate focus and resource allocation and of missed opportunities By combining comparative case studies from Africa South and East Asia South America and Eastern Europe with theoretical analysis this volume synthesizes a range of issues related to the evident tensions that exist for

developing countries as they try to balance global and local priorities through the adoption and use of ICTs *Situational Method Engineering* Brian Henderson-Sellers, Jolita Ralyté, Pär J. Ågerfalk, Matti Rossi, 2014-06-03 While previously available methodologies for software like those published in the early days of object technology claimed to be appropriate for every conceivable project situational method engineering SME acknowledges that most projects typically have individual characteristics and situations Thus finding the most effective methodology for a particular project needs specific tailoring to that situation Such a tailored software development methodology needs to take into account all the bits and pieces needed for an organization to develop software including the software process the input and output work products the people involved the languages used to describe requirements design code and eventually also measures of success or failure The authors have structured the book into three parts Part I deals with all the basic concepts terminology and overall ideas underpinning situational method engineering As a summary of this part they present a formal meta model that enables readers to create their own quality methods and supporting tools In Part II they explain how to implement SME in practice i e how to find method components and put them together and how to evaluate the resulting method For illustration they also include several industry case studies of customized or constructed processes highlighting the impact that high quality engineered methods can have on the success of an industrial software development Finally Part III summarizes some of the more recent and forward looking ideas This book presents the first summary of the state of the art for SME For academics it provides a comprehensive conceptual framework and discusses new research areas For lecturers thanks to its step by step explanations from basics to the customization and quality assessment of constructed methods it serves as a solid basis for comprehensive courses on the topic For industry methodologists it offers a reference guide on features and technologies to consider when developing in house software development methods or customising and adopting off the shelf ones

Advances in Information Security Management & Small Systems Security Jan H.P. Eloff, Les Labuschagne, Rossouw von Solms, Gurpreet Dhillon, 2008-11-14 The Eighth Annual Working Conference of Information Security Management and Small Systems Security jointly presented by WG11 1 and WG11 2 of the International Federation for Information Processing IFIP focuses on various state of art concepts in the two relevant fields The conference focuses on technical functional as well as managerial issues This working conference brings together researchers and practitioners of different disciplines organisations and countries to discuss the latest developments in amongst others information security methods methodologies and techniques information security management issues risk analysis managing information security within electronic commerce computer crime and intrusion detection We are fortunate to have attracted two highly acclaimed international speakers to present invited lectures which will set the platform for the reviewed papers Invited speakers will talk on a broad spectrum of issues all related to information security management and small system security issues These talks cover new perspectives on electronic commerce security strategies documentation and many more All papers presented

at this conference were reviewed by a minimum of two international reviewers We wish to express our gratitude to all authors of papers and the international referee board We would also like to express our appreciation to the organising committee chaired by Gurpreet Dhillon for all their inputs and arrangements Finally we would like to thank Les Labuschagne and Hein Venter for their contributions in compiling this proceeding for WG11 1 and WG 11 2 *Global Babel* Samir Dayal, Margueritte Murphy, 2021-02-10 Globalization as we know it today would be unimaginable without the revolution in information and communication technologies of the last thirty years Yet have we achieved one world as the promotional hype for cellular and digital networks would have it This collection of essays *Global Babel Questions of Discourse and Communication in a Time of Globalization* explores the current state of communication and discourse in a globalized environment The essays are united by an awareness that whether understood technologically economically epistemologically or culturally globalization is a discursive field with discrepant assumptions categories and conclusions As such globalization is double edged and complex It can certainly enable the exploitation of the powerless by the powerful in different contexts or at different moments it can also facilitate individual and collective agency It is this doubleness this complexity that this collection seeks to bring into focus This volume offers an interdisciplinary forum where technological aesthetic and ethical issues relating to globalization inhabit the same conceptual frame Together the essays address the central issue of how the new knowledges of globalization are being articulated and explore the cultural consequences and success of such communication and knowledge exchange **Knowledge Management: An Interdisciplinary Perspective** Sajjad M Jasimuddin, 2012-01-27 This book analyzes dynamic relationships among the disciplines that have contributed to the development of knowledge management It focuses on establishing relationships between knowledge management and other disciplines such as information management organizational learning innovation management and strategic management It debates the origin and development of knowledge management thus providing a clear and conceptual understanding of the field This in turn will help readers adopt better approaches to solve knowledge management problems
