Modern Metaphysics:

The Evolution of Modern Metaphysics A. W. Moore, 2012 This book charts the evolution of metaphysics since Descartes and provides a compelling case for why metaphysics matters **The Evolution of Modern Metaphysics** A. W. Moore, 2011-12-12 This book is concerned with the history of metaphysics since Descartes Taking as its definition of metaphysics the most general attempt to make sense of things it charts the evolution of this enterprise through various competing conceptions of its possibility scope and limits The book is divided into three parts dealing respectively with the early modern period the late modern period in the analytic tradition and the late modern period in non analytic traditions In its unusually wide range A W Moore s study refutes the tired old cliché that there is some unbridgeable gulf between analytic philosophy and philosophy of other kinds It also advances its own distinctive and compelling conception of what metaphysics is and why it matters Moore explores how metaphysics can help us to cope with continually changing demands on our humanity by making sense of things in ways that are radically new ***Idea and Ontology*** Marc A. Hight, 2008-07-21 The prevailing view about the history of early modern philosophy which the author dubs the early modern tale and wants to convince us is really a fairy tale has it that the focus on ideas as a solution to various epistemological puzzles first introduced by Descartes created difficulties for the traditional ontological scheme of substance and mode The early modern tale depicts the development of the way of ideas as abandoning ontology at least by the time of Berkeley This in turn fostered an antimetaphysical bias as modern philosophy developed further elevating epistemology to its current primary status in the field Marc Hight challenges this account by showing how though the conception of ideas changed over time the ontological status of ideas remained a central part of the discussion about ideas and influenced how even later thinkers like Locke Berkeley and Hume thought about them By his reading of important texts in early modern philosophy Hight aims not only to provide a more accurate history of philosophy for this period but also to resuscitate the value of metaphysics for philosophical analysis today **Early Modern Women on Metaphysics** Emily Thomas, 2018-03-15 The work of women philosophers in the early modern period has traditionally been overlooked yet their writing on topics such as reality time mind and matter holds valuable lessons for our understanding of metaphysics and its history This volume of new essays explores the work of nine key female figures Bathsua Makin Anna Maria van Schurman Elisabeth of Bohemia Margaret Cavendish Anne Conway Damaris Cudworth Masham Mary Astell Catharine Trotter Cockburn and milie Du Ch telet Investigating issues from eternity to free will and from body to natural laws the essays uncover long neglected perspectives and demonstrate their importance for philosophical debates both then and now Combining careful philosophical analysis with discussion of the intellectual and historical context of each thinker they will set the agenda for future enquiry and will appeal to scholars and students of the history of metaphysics science religion and feminism **Metaphysics** Adrian Pabst, 2012-05-04 This book does nothing less than to set new standards in combining philosophical with political theology

Pabst's argument about rationality has the potential to change debates in philosophy, politics, and religion from the foreword. This comprehensive and detailed study of individuation reveals the theological nature of metaphysics. Adrian Pabst argues that ancient and modern conceptions of being or individual substance fail to account for the ontological relations that bind beings to each other and to God, their source. On the basis of a genealogical account of rival theories of creation and individuation from Plato to postmodernism, Pabst proposes that the Christian Neo-Platonic fusion of biblical revelation with Greco-Roman philosophy fulfills and surpasses all other ontologies and conceptions of individuality.

The Metaphysics of Modern Existence Vine Deloria, Jr., Daniel Wildcat, David Wilkins, 2012-09-01 Vine Deloria Jr. named one of the most influential religious thinkers in the world by Time, shares a framework for a new vision of reality, bridging science and religion to form an integrated idea of the world while recognizing the importance of tribal wisdom. The Metaphysics of Modern Existence delivers a revolutionary view of our future and our world.

A Modern Introduction to Metaphysics D. A. Drennen, 1962 Kant and Modern Political Philosophy Katrin Flikschuh, 2000-08-28 In this book, Katrin Flikschuh examines the relevance of Kant's political thought to major issues and problems in contemporary political philosophy. She advances and defends two principal claims: that Kant's philosophy of Right endorses the role of metaphysics in political thinking, in contrast to its generally hostile reception in the field today; and that his account of political obligation is cosmopolitan in its inception, assigning priority to the global rather than the domestic context. She shows how Kant's metaphysics of freedom as a shared idea of practical reason underlies the cosmopolitan scope of his theory of justice, and she concludes that despite the revival of Kantianism in contemporary thinking, his account of justice is in many respects very different from dominant approaches in contemporary liberal theory. Her study will be of interest to political philosophers, political theorists, and historians of ideas.

On the History of Modern Philosophy F. W. J. von Schelling, 1994-05-27 F. W. J. Schelling's *On the History of Modern Philosophy* surveys philosophy from Descartes to German Idealism and shows why the Idealist project is ultimately doomed to failure.

Philosophy and Modern Liberal Arts Education N. Tubbs, 2014-01-08 This book argues for a modern version of liberal arts education, exploring first principles within the divine comedy of educational logic. By reforming the three philosophies of metaphysics, nature, and ethics upon which liberal arts education is based, Tubbs offers a profound transatlantic philosophical and educational challenge to the subject.

Adorno and the Modern Ethos of Freedom Colin Hearfield, 2017-11-28 Delivering a concise and lucid account of Adorno's response to the modern question of freedom, Hearfield sets into critical relief six other modern philosophies of freedom: from Kant, Hegel, Nietzsche, Heidegger, Foucault, and Habermas. The book presents a broad variety of perspectives concerning the question of freedom and draws out the contrasting and superior merit of Adorno's response. Hearfield employs an interpretive framework that makes a distinction between a conceptual ratio (Kant, Hegel, and Habermas) and an existential poiesis (Nietzsche, Heidegger, and Foucault). The book includes singular reconstructions of Adorno's immanent critiques of Kant, Hegel, Nietzsche, and Heidegger.

and demonstrates the theoretical instabilities peculiar to Foucault and Habermas The book concludes by revealing the respective blind spots in the conceptual ratio and existential poiesis modes of thinking which block our capacity for becoming free

Schelling and Modern European Philosophy: Andrew Bowie, 2020-09-23 Andrew Bowie's book is the first introduction in English to present F W J Schelling as a major European philosopher in his own right Schelling and Modern European Philosophy surveys the whole of Schelling's philosophical career lucidly reconstructing his key arguments particularly those against Hegel and relating them to contemporary philosophical discussion Dr Bowie traces how central ideas and conceptual strategies in the work of philosophers as diverse as Nietzsche Heidegger Derrida and Davidson relate closely to Schelling's often misunderstood philosophy and focuses on Schelling's work as an alternative to and critique of aspects of Hegel's thinking

Dante's Paradiso and the Theological Origins of Modern Thought William Franke, 2021-03-24 Self reflection as the hallmark of the modern age originates more profoundly with Dante than with Descartes This book rewrites modern intellectual history taking Dante's lyrical language in Paradiso as enacting a Trinitarian self reflexivity that gives a theological spin to the birth of the modern subject already with the Troubadours The ever more intense self reflexivity that has led to our contemporary secular world and its technological apocalypse can lead also to the poetic vision of other worlds such as those experienced by Dante Facing the same nominalist crisis as Duns Scotus his exact contemporary and the precursor of scientific method Dante's thought and work indicate an alternative modernity along the path not taken This other way shows up in Nicholas of Cusa's conjectural science and in Giambattista Vico's new science of imagination as alternatives to the exclusive reign of positive empirical science In continuity with Dante's vision they contribute to a reappropriation of self reflection for the humanities

Christology, Ancient and Modern Oliver D. Crisp, George Hunsinger, Peter J. Leithart, Katherine Sonderegger, Alan J. Torrance, 2013-10-22 A Fresh Look at the Doctrine of Christ Christology was the central doctrine articulated by the early church councils and it remains the subject of close theological investigation today Christology Ancient and Modern the first volume in a series of published proceedings from the annual Los Angeles Theology Conference brings together conference proceedings surveying the field and articulating the sources norms and criteria for constructive theological work in Christology The ten diverse essays in this collection include discussions on The types of historical Christologies and evaluations of various approaches to the theology of Christ A close look at the trajectory and divergence of modern denominational understandings of Christ's work and person Discussions of implications and challenges to specific Christologies regarding detailed exegetical considerations Each of the essays collected in this volume engage with Scripture as well as with others in the field theologians both past and present from different confessions in order to provide constructive resources for contemporary systematic theology and to forge a theology for the future

Hermeneutics and Modern Philosophy Brice R. Wachterhauser, 1986-11-20 Hermeneutics and Modern Philosophy is a collection of interpretive and critical essays on philosophical hermeneutics focusing on the seminal work of Heidegger and

Gadamer The anthology brings together classic pieces in the field that previously were widely scattered and includes new articles that shed light on much debated issues in contemporary hermeneutics Along with essays by Habermas and Gadamer it features works by Paul Ricoeur Wolfhart Pannenberg Richard Bernstein David Hoy Reiner Wiehl Marjorie Grene Gianni Vattimo Merold Westphal John Caputo Kathleen Wright Charles Larmore and Brice Wachterhauser Hermeneutics and Modern Philosophy provides both an excellent introduction to the field and a useful commentary on its current state **The Oxford Handbook of Theology and Modern European Thought** Nicholas Adams, George Pattison, Graham Ward, 2013-02-28 Modern European thought describes a wide range of philosophies cultural programmes and political arguments developed in Europe in the period following the French Revolution Throughout this period many of the wide range of modernisms and anti modernisms had a distinctly religious and even theological character not least when religion was subjected to the harshest criticism Yet for all the breadth and complexity of modern European thought and in particular its relations to theology a distinct body of themes and approaches recurred in each generation Moreover many of the issues that took intellectual shape in Europe are now global rather than narrowly European and for good or ill they form part of Europe s bequest to the world from colonialism and the economic theories behind globalisation through to democracy to terrorism This volume attempts to identify and comment on some of the most important of these The thirty chapters are grouped into six thematic parts moving from questions of identity and the self through discussions of the human condition the age of revolution the world both natural and technological and knowledge methodologies concluding with a section looking explicitly at how major theological themes have developed in modern European thought The chapters engage with major thinkers including Kant Hegel Kierkegaard Heidegger Schleiermacher Nietzsche Dostoevsky Barth Rahner Tillich Bonhoeffer Sartre de Beauvoir Wittgenstein and Derrida amongst many others Taken together these new essays provide a rich and reflective overview of the interchange between theology philosophy and critical thought in Europe over the past two hundred years **Leo Strauss and Emmanuel Levinas** Leora Batnitzky, 2006-05-22 Leo Strauss and Emmanuel Levinas two twentieth century Jewish philosophers and two extremely provocative thinkers whose reputations have grown considerably are rarely studied together This is due to the disparate interests of many of their intellectual heirs Strauss has influenced political theorists and policy makers on the right while Levinas has been championed in the humanities by different cadres associated with postmodernist thought In Leo Strauss and Emmanuel Levinas Philosophy and the Politics of Revelation first published in 2006 Leora Batnitzky brings together these two seemingly incongruous contemporaries demonstrating that they often had the same philosophical sources and their projects had many formal parallels While such a comparison is valuable in itself for better understanding each figure it also raises profound questions in the debate on the definitions of religion suggesting ways that religion makes claims on both philosophy and politics **Nietzsche and Modern German Thought** Keith Ansell-Pearson, 2012-10-12 Nietzsche is no longer a marginal figure in the study of philosophy This collection of

specially commissioned essays reflects the emergence of a serious interest amongst philosophers sociologists and political theorists By considering Nietzsche s ideas in the context of the modern philosophical tradition from which it emerged his importance in contemporary thought is refined and reaffirmed Modern German thought begins with Kant and has rarely escaped his influence It is with respect to this Kantian heritage that this volume examines Nietzsche These essays critically consider Nietzsche s relation to Kant and the post Kantian tradition In broad terms it is his relation to the domains of knowledge ethics and aesthetics that is through the three Kantian critiques that Nietzsche s thought is illuminated This allows a surprising variety of areas and questions both about Nietzsche and about philosophy to be investigated

Modern Philosophies of Human Nature P. Langford,2012-12-06 General Argument My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present During this period philosophical opinions about human nature underwent a transformation from the God centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument

Powers and Abilities in Early Modern Philosophy Sebastian Bender,Dominik Perler,2024-06-28 This book explores different accounts of powers and abilities in early modern philosophy It analyzes powers and abilities as a package hopefully enabling us to better understand them both and to see similarities as well as dissimilarities While some prominent early modern accounts of power have been studied in detail this volume also covers lesser known thinkers and several early modern women philosophers The volume also investigates early modern accounts of powers and abilities in a more systematic fashion than has been previously done By broadening its scope in these ways the volume uncovers trends and tendencies in early modern thinking about powers and abilities that are easy to miss Chapters in this book explore how 22 early modern thinkers approached the following questions What kind of entities are powers and abilities Are they reducible to something categorical or not What is the relation between powers and abilities Is there a fundamental metaphysical difference between them or not How do we know

what powers objects have and what abilities agents have Are human abilities in any way special How do they relate to the abilities non human animals have And how do they relate to the powers of inanimate objects Powers and Abilities in Early Modern Philosophy will appeal to scholars and advanced students working in the history of early modern philosophy in metaphysics and in the history of science
