Bergethon, 2013-03-14 The objective of this book is to provide a unifying approach to the study of biophysical chemistry for the advanced undergraduate who has had a year of physics organic chemistry calculus and biology This book began as a revised edition of Biophysical Chemistry Molecules to Membranes which Elizabeth Simons and I coauthored That short volume was written in an attempt to provide a concise text for a one semester course in biophysical chemistry at the graduate level The experience of teaching

biophysical chemistry to biologically oriented students over the last decade has made it clear that the subject requires a more fundamental text that unifies the many threads of modern science physics chemistry biology mathematics and statistics This book represents that effort This volume is not a treatment of modern biophysical chemistry with its rich history and many controversies although a book on that topic is also needed The Physical Basis of Biochemistry is an introduction to the philosophy and practice of an interdisciplinary field in which biological systems are explored using the quantitative perspective of the physical scientist I have three primary objectives in this volume one to provide a unifying picture of the interdisciplinary threads from which the tapestry of biophysical studies is woven two to provide an insight into the power of the modeling approach to scientific investigation and three to communicate a sense of excitement for the activity and wholesome argument that characterize this field of study

Spirituality for Youth-Work Phil Daughtry, 2016-09-23

This book addresses a systemic gap in existing studies on human services and youth work. While the notion of spirituality does make rare appearances in such literature, it is often vaguely defined and underdeveloped both as a concept and as a mode of practice. This ambiguity is symptomatic of the broader shift in the sociological context of Western and global societies that has been referred to variously as post modern, late modern, and post secular. From the perspective of the relationship between human development and the spiritual, theological, we live in a time between times. We have not yet worked out how to speak of spirit nor how to include its meanings in positive youth intervention and developments in our language. For a public spiritual consciousness remain in a state of cultural flux. This book offers a coherent vocabulary and narrative from which to construct a more explicit and deliberate practice of spiritual care, education, and professional identity for youth workers. It speaks directly to youth work practitioners, managers of youth services, those providing youth work education, and anyone with an interest in youth and spirituality research and practice.
