The Mathematics of Juggling Burkard Polster,2006-05-26 As a juggler the author likes to finish his performances with a stunt that combines props and techniques from a variety of juggling disciplines Imagine him idling on a giraffe unicycle while balancing a spinning basketball on a mouth stick and toss juggling a sword a toilet plunger and a rubber chicken As a mathematician he is also interested in the treasure trove of beautiful mathematics used to model the different activities in a juggler s repertoire In this book he provides an intellectually stimulating collection of mostly self contained mathematical essays that introduce the reader to many elegant results and techniques from a wide range of mathematical disciplines such as combinatorics graph theory knot theory mechanics differential equations control theory and robotics The Mathematics of Juggling is the first comprehensive account summarizing and expanding the results in the literature on juggling tricks and skills as well as the mathematics behind these tricks and skills Anybody who is not put off by the word mathematics in the title of this book should have a good time reading it *The Mathematics Teacher* ,1925

The Man Who Loved Only Numbers Paul Hoffman,2024-05-07 A funny marvelously readable portrait of one of the most brilliant and eccentric men in history The Seattle Times Paul Erdos was an amazing and prolific mathematician whose life as a world wandering numerical nomad was legendary He published almost 1500 scholarly papers before his death in 1996 and he probably thought more about math problems than anyone in history Like a traveling salesman offering his thoughts as wares Erdos would show up on the doorstep of one mathematician or another and announce My brain is open After working through a problem he d move on to the next place the next solution Hoffman s book like Sylvia Nasar s biography of John Nash A Beautiful Mind reveals a genius s life that transcended the merely quirky But Erdos s brand of madness was joyful unlike Nash s despairing schizophrenia Erdos never tried to dilute his obsessive passion for numbers with ordinary emotional interactions thus avoiding hurting the people around him as Nash did Oliver Sacks writes of Erdos A mathematical genius of the first order Paul Erdos was totally

obsessed with his subject he thought and wrote mathematics for nineteen hours a day until the day he died He traveled constantly living out of a plastic bag and had no interest in food sex companionship art all that is usually indispensable to a human life The Man Who Loved Only Numbers is easy to love despite his strangeness It's hard not to have affection for someone who referred to children as epsilons from the Greek letter used to represent small quantities in mathematics a man whose epitaph for himself read Finally I am becoming stupider no more and whose only really necessary tool to do his work was a quiet and open mind Hoffman who followed and spoke with Erdos over the last 10 years of his life introduces us to an undeniably odd yet pure and joyful man who loved numbers more than he loved God whom he referred to as SF for Supreme Fascist He was often misunderstood and he certainly annoyed people sometimes but Paul Erdos is no doubt missed
