language social interaction and mortality      Whole Earth Thinking and Planetary Coexistence Sam Mickey, 2015-07-16 Like never before in history humans are becoming increasingly interconnected with one another and with the other inhabitants and habitats of Earth There are numerous signs of planetary interrelations from social media and international trade to genetic engineering and global climate change The scientific study of interrelations between organisms and environments Ecology is uniquely capable of addressing the complex challenges that characterize our era of planetary coexistence Whole Earth Thinking and Planetary Coexistence focuses on newly emerging approaches to ecology that cross the disciplinary boundaries of sciences and humanities with the aim of responding to the challenges facing the current era of planetary interconnectedness It introduces concepts that draw out a creative contrast between religious and secular approaches to the integration of sciences and humanities with religious approaches represented by the geologist Thomas Berry and the whole Earth thinking of Stephanie Kaza and Gary Snyder and the more secular approaches represented by the geophilosophy of poststructuralist theorists Gilles Deleuze and Félix Guattari This book will introduce concepts engaging with the ecological challenges of planetary coexistence to students and professionals in fields of environmental studies philosophy and religious studies      **The Learned Practice of Religion in the Modern University** Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena      **The Trinity, Creation and Pastoral Ministry** Graham Buxton, 2007-01-01 In this book the author proposes a three way conversation between theology science and pastoral ministry His approach draws on a Trinitarian understanding of God as a relational being of love whose life spills over into all created reality human and nonhuman By locating human meaning and purpose within God's creation community this book offers the possibility of a transforming engagement between those in pastoral ministry and the scientific community      Nature, Technology, and Society Victor Ferkiss, 1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological

exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues *We've Never Done It Like This Before* C. Gladchuk,2013-10-11 This work concentrates on tracing the evolution of the so called red menace phenomenon as a means of demonstrating the

correlation between growing American paranoia and the success of the anticommunist campaign 1935 1955 The House Committee on Un American Activities 1947 investigation of Hollywood the nation s most visible industry served a critical role in conjuring up anti red hysteria and fanning the flames of virulent anticommunism Using conveniently unjust tactics the Committee painted targeted Hollywood personalities red and established the infamous blacklist certified proof in the minds of many that subversives were indeed conspiring from within A failed attempt on behalf of the Hollywood Ten to demonstrate the Committee s undemocratic nature allowed HUAC to forge ahead with its investigation and establish the anticommunist foundation upon which Joseph McCarthy would construct his campaign Hollywood and Anticommunism stands as an important contribution to McCarthy era literature and should appeal to all interested in the early Cold War and the impact that unwarranted hysteria has had and continues to have on the growth and development of the nation

Sideris,2017-08-15 In Consecrating Science Lisa Sideris offers a searing critique of The New Cosmology a complex network of overlapping movements that claim to bring together science and spirituality all in the name of saving our planet from impending ecological collapse Highly regarded in many academic circles these movements have been endorsed by numerous prominent scholars scientists historians and educators Their express goal popularized in numerous books films TED talks YouTube videos podcasts and even introductory courses at places like Harvard or Washington University is to instill in readers and audiences a profound sense of being at home in the universe thereby fostering environmentally responsible behavior Whether promoted as The New Story The Universe Story or The Epic of Evolution they all offer humanity a new sacred story a common creation myth for modern times and for all people the evolutionary unfolding of the universe from the Big Bang to the present Evolutionary science and religious cosmology together at last But as Sideris shows however the New Cosmology actually underwrites a staggeringly anthropocentric vision of the world Instead of cultivating an ethic of respect for nature the project of consecrating science only increases human arrogance and indifference to nonhuman life Going back to the work of Rachel Carson and other naturalists the author shows how a sense of wonder rooted in the natural world and our own ethical impulses helps foster environmental attitudes and policies that protect our planet Provided by publishe      **The Shamanic Wisdom of the Huichol** Tom Soloway Pinkson,2010-01-29 True account of a decade long apprenticeship with Huichol shamans in the Mexican Sierra Madre Contains an insider s view of the Huichol s shamanic spiritual practices including their ritual use of peyote Offers the Huichol path to sustainable healing for individuals and our planet Never conquered by Europeans the Huichol known for their use of peyote in spiritual ceremonies have thoroughly retained their ancient way of life Growing from a deeply rooted respect and reverence for the natural world the Huichol s shamanic spiritual practices focus on living life in harmony with all living things and offer a path to a truly sustainable future The Shamanic Wisdom of the Huichol is the autobiographical account of Pinkson s decade long immersion in the shamanic traditions of the Huichol tribes of the Sierra Madre in Mexico From his first Huichol pilgrimage to Wiricuta their sacred homeland in 1981 to searching the desert for the heart medicine of peyote Pinkson s account of his initiation into the medicine teachings of the Huichol brings new life to this ancient eco centric tradition Providing a guiding light for those who seek to become part of the solution to our planet s ecological challenges Pinkson empowers readers to choose their own path toward healing both on a personal and a planetary level      **Afro-Latin American Studies** Alejandro de la Fuente,2018-04-26 Examines the full range of humanities and social science scholarship on people of African descent in Latin America      Jesus and the Cosmos Denis Edwards,2004-07-22 At the end of the twentieth century we began to understand

that the earth is vulnerable that it is like a tiny garden in space under threat on all sides Jesus and the Cosmos is an attempt to think theologically about the ecological crisis we face in the light of the great Christian tradition Our theological tradition has been shaped within the worldview of a static universe By contrast we are told today that the universe began with a cosmic explosion called the Big Bang that we live in an expanding universe with galaxies rushing away from us at an enormous rate that we human beings are part of an evolutionary movement on the earth and that we are intimately linked with the health of delicately balanced life systems on our planet Not only has modern science given this age a new cosmology but contemporary historical studies have provided us with a new approach to the historical Jesus Critical biblical study has allowed us to know far more about the Jesus who brought joy and liberation into people s lives In Jesus and the Cosmos Denis Edwards tells the story of the cosmos the story of Jesus of Nazareth and shows their connections Ultimately he will assert Jesus of Nazareth risen from the dead IS the dynamic power at the heart of the cosmic process     *The Heavens Are Telling the Glory of God* Laurie Brink, 2022-02-05 2023 Catholic Media Association First Place Award Faith and Science Building on the work of Teilhard de Chardin the New Cosmology integrates scientific facts and theories including discoveries about the expanding universe and evolution and proposes that creation is developing into greater complexity But how are we to understand concepts like original sin and redemption if creation isn t complete and humanity is still in process How does one retrofit religious tradition and Scripture into this scenario Is there room for the historical Jesus in the New Cosmology While a ready concern for all Christians this question has unique implications for women religious whose lives are centered on the person and mission of Jesus Christ How is a Catholic sister to understand her vows of poverty chastity and obedience in light of a cosmology in which the need for redemption and the role of Jesus are significantly redefined *The Heavens Are Telling the Glory of God* probes these questions and offers possible answers Beginning with the experiences of women religious and their encounter with the New Cosmology or Universe Story this book seeks to mediate among the various perspectives and proposes how informed and reflective engagement with science tradition and theology can bridge the generational divides and foster a spirituality that is both emergent and incarnational Access to online discussion and reflection questions is included
