Nurses Under Stress:

Nurses Under Stress Sharol F. Jacobson, H. Marie McGrath, 1983 *Work in the 21st Century* Frank J. Landy, Jeffrey M. Conte, 2010 The workplace in the 21st century is technological and multi cultural Work is often accomplished in teams This work provides students with an up to date knowledge based that will enable them to apply the principles of I O psychology to themselves supervisors subordinates and fellow workers Stress and Coping in Nursing Roy D. Bailey, Margaret Clarke, 2013-11-11 Increasingly stress as a concept is being used as an explanation of a wide variety of negative phenomena which are experienced by all people but which include nurses in particular and their patients Nursing has been identified as a high stress profession and one can hardly pick up a nursing journal or even read a newspaper article about nursing without finding the word stress used liberally Examples of its use are found in relation to sickness absence rates high level of nursing staff turnover discontent in nursing the effects of unemployment the effects of overwork having too much responsibility having too little responsibility or control the effects of constantly giving emotionally to others the causes of illness the effects of going into hospital delayed healing anxiety depression and alcoholism Given the heterogeneous nature of these phenomena some of which are the diametric opposite of others and that they are clearly being attributed to the one concept stress then that concept must necessarily be of importance within people's lives Or is it perhaps just a fashionable global but ultimately empty explanation Roy Bailey and I believe that stress is an extremely important concept Indeed we would argue that it is a meta concept rather than a concept which does indeed serve to explain many disparate phenomena **Mental Health in Healthcare Workers and its Associations with Psychosocial Work Conditions** Juan Jesús García-Iglesias, Murat Yildirim, Juan Gómez-Salgado, Yong Shian Shawn Goh, 2024-04-11 The work environment can be considered one of the main determining factors that can influence the mental health of workers especially as it regards the structural and organizational conditions to which the worker is subjected This work environment has positive effects when work provides satisfaction and well being or negative effects provoked by situations of stress inadequate working patterns and schedules possible situations of abuse and or harassment etc which may contribute to the appearance of alterations in the mental health of the worker *Stress, Burnout, and Addiction in the Nursing Profession* Herbert R. Warner, 2014-03-19 This book is about the most common issues that confront a nurse on a daily basis It can cause him or her heartaches heartbreaks and heart troubles Stress is by far in my opinion a leading cause of heart problems sickness and depression in this country In this book I talk about awareness in our hospitals clinics and emergency departments Everyone should feel comfortable and be confident of the nurse treating you or your loved ones we must also remember that nurses are also human beings with issues and problems like everyone else in this world This book is also a valuable asset to any nursing student considering going to nursing school or college to study medicine **Encyclopedia of Nursing Research** Joyce J. Cumulated Index Medicus , 1981

Encyclopedia of Trauma Charles R. Figley, 2012-06-19 Trauma is defined as a sudden potentially deadly experience often leaving lasting troubling memories Traumatology the study of trauma its effects and methods to modify effects is exploding in terms of published works and expanding in terms of scope Originally a narrow specialty within emergency medicine the field now extends to trauma psychology military psychiatry and behavioral health post traumatic stress and stress disorders trauma social work disaster mental health and most recently the subfield of history

and trauma with sociohistorical examination of long term effects and meanings of major traumas experienced by whole communities and nations both natural Pompeii Hurricane Katrina and man made the Holocaust 9 11 One reason for this expansion involves important scientific breakthroughs in detecting the neurobiology of trauma that is connecting biology with human behavior which in turn is applicable to all fields involving human thought and response including but not limited to psychiatry medicine and the health sciences the social and behavioral sciences the humanities and law Researchers within these fields and more can contribute to a universal understanding of immediate and long term consequences both good and bad of trauma both for individuals and for broader communities and institutions Trauma encyclopedias published to date all center around psychological trauma and its emotional effects on the individual as a disabling or mental disorder requiring mental health services This element is vital and has benefited from scientific and professional breakthroughs in theory research and applications Our encyclopedia certainly will cover this central element but our expanded conceptualization will include the other disciplines and will move beyond the individual
