Nursing Care Of The Cancer Patient:

Nursing Care of the Cancer Patient Rosemary Bouchard-Kurtz, Norma Speese-Owens, 1972 *Cancer Nursing* Jessica Corner, Christopher D. Bailey, 2009-03-16 The needs of cancer patients and their families are complex Yet still more complex are the powerful social and cultural forces that shape the delivery of cancer care and the way in which it experienced Cancer Nursing Care in Context addresses this by adopting a unique approach that situates cancer care in the context of society's attitudes to the disease and the broader everyday needs of both patients and their carers By combining evidenced based information a critical view of care and treatment and first hand accounts of having cancer and caring for people with cancer the book provides a new perspective how best to deliver the care that patients truly require This second edition includes new chapters on prevention diagnosis symptoms self help and self management and living with cancer long term It also Addresses significant changes in cancer care including expansion of nursing roles the establishment of cancer networks and cancer collaborative projects Considers NICE guidance on Supportive and Palliative care Incorporates material on prevention and early detection Includes evidence tables based on relevant literature Cancer Nursing Care in Context is an invaluable resource for all those involved in the provision of cancer care and support to patients and their families

Nursing Care of the Cancer Patient Rosemary Bouchard-Kurtz, 1967 *Nursing Care of the Cancer Patient, Etc* Rosemary Bouchard, 1967 *Cancer Patient* Rosemary Bouchard, 1967 *Nurses' Guide to Cancer Care* Constance S. Kirkpatrick, 1986 Bringing together her extensive clinical experience and information from authoritative sources Kirkpatrick offers nurses a complete up to date guide to the integrated practice of nursing for cancer patients She provides information on cancer epidemiology and the microbiology and physiology of the cancer process plus clear instructions on for example the clinical management of specific types of cancer and types of chemotherapy The broad background and detailed information on procedures will serve as a basis for comprehensive cancer nursing care at a primary provider or management level Appropriate as a text reference or study guide Nurses Guide to Cancer Care covers all the specific content required for the Oncology Nursing Certification examination

Oncology Nursing Christine Miaskowski, Patricia Buchsel, 1999 This comprehensive textbook for oncology nurses is organized into two parts Part I contains information on the major principles of cancer treatment i.e. epidemiology pathophysiology oncologic emergencies etc In Part II issues related to specific cancers i.e. breast rectal pancreatic etc are discussed This book is intended as a reference for oncology nurses The field of oncology nursing has changed greatly in the last five years Oncology nurses need a current comprehensive text so that they can understand a patient's trajectory provide appropriate interventions and teach patients and their family members how to manage symptoms and cope with their diseases I agree with the authors that the scope and practice of oncology nursing has been expanding beyond the hospital setting Oncology nurses are found in the outpatient as well as the home care settings A comprehensive reference is needed

in order to be able to keep abreast of this demanding and changing specialty The book met the authors objectives Text chapters provide the reader with a thorough discussion of the issues The special features found in the text on standards of patient care patient teaching guides and quality improvement tools are very helpful to the reader According to the author the book is written for oncology nurses and oncology nursing students I agree with the authors targeted audiences This book is specifically written for nurses in order to help them gain an understanding of the disease process medical management nursing implications and teaching needs of patients Both of the authors of this text are credible authorities on the subject matter presented Miaskowski has had a wide variety of oncology nursing experience and is currently professor and chair of the Department of Physiologic Nursing at UCSF Buchsel is recognized as an expert in the nursing care of bone marrow and stem cell transplantation She is currently a clinical instructor at the University of Washington School of Nursing Education and is an oncology nurse consultant The principles of cancer and current treatment modalities are covered in this book Trends in surgical radiation chemotherapy and biotherapy are written about in detail In addition nurses are able to review the clinical implications and nursing management of patients undergoing disease specific treatment The information on patient home care needs and patient teaching guides is very helpful All aspects of oncology nursing care are covered in this text including psychosocial cultural and terminal care issues Tables and diagrams are appropriate and useful One shortcoming of the text of note is that all diagrams appear in black and white This is a very useful and comprehensive reference for oncology nurses Providing the reader with nursing standards of care and patient teaching information are additional valuable features of this book This book is well written and compares favorably with other books in the field such as Groenwald s Cancer Nursing Principles and Practice 4th Edition Jones and Bartlett 1997 83 100 Stacen Keating RN BSN Mount Sinai Hospital and Medical Center Copyright 2006 Doody Reviews **Nursing Care of the Cancer Patient** Rosemary Bouchard,Norma F. Berktaş, 2025-08-26 The healthcare sector is highly dependent on technological innovations much more than most other industries. The positive side is the potential to implement these technological innovations for major improvements and benefits. There has been a significant increase in the use of artificial intelligence techniques in clinical and non-clinical areas in healthcare. The chapters in this book are presented by professionals who are experts in healthcare and have academic experience. The aim of this volume is to add to the literature and to present the current state of clinical and non-clinical applications in the healthcare industry and areas open to development as well as to provide recommendations to policymakers.
