William T. O'Donohue,Lorraine T. Benuto,Lauren Woodward Tolle,2014-07-08 Adolescence is a pivotal period of development with respect to health and illness It is during adolescence that many positive health behaviors are consolidated and important health risk behaviors are first evident thus adolescence is a logical time period for primary prevention In addition the predominant causes of morbidity and mortality in adolescence are quite different from those of adults indicating that early identification and treatment of adolescent health problems must be directed to a unique set of targets in this age group Moreover because of the particular developmental issues that characterize adolescence intervention efforts designed for adults are often inappropriate or ineffective in an adolescent population Even when chronic illnesses are congenital or begin

in childhood the manner in which the transition from childhood to adolescence to young adulthood is negotiated has important implications for disease outcomes throughout the remainder of the person's life span Organized in five major sections General Issues Developmental Issues Treatment and Training Mental Health and Physical Health and 44 chapters Handbook of Adolescent Health Psychology addresses the common and not so common health issues that tend to affect adolescents Coverage includes Context and perspectives in adolescent health psychology Health literacy health maintenance and disease prevention in adolescence Physical disorders such as asthma obesity physical injury and chronic pain Psychological disorders such as substance abuse attention deficit hyperactivity disorder depression and eating disorders Congenital chronic diseases such as type 1 diabetes and spina bifida Handbook of Adolescent Health Psychology is the definitive reference for pediatricians family physicians health psychologists clinical social workers rehabilitation specialists and all practitioners and researchers working with adolescents **Strengthening America's Families** Karole L.

Kumpfer,1999-04 Years of program development and research have provided effective strategies for strengthening America's families to prevent delinquency This guide has been written to help program planners policy makers and service providers determine the most effective family focused and parenting intervention strategies for high risk youth and families It reviews what is known about the impact of family characteristics on the risk for delinquency as well as promising family interventions Providers using the guide will be better able to choose or modify existing programs or create new interventions for high risk youth **Handbook of Family Life Education** Margaret E. Arcus,Jay D. Schvaneveldt,J. Joel Moss,1993 Scholarly yet

readable this second volume examines the major content areas where family life education is practiced marriage enrichment parent education sex education and aging among others In each section the authors offer a critical and succinct introduction to the subject area provide literature sources and discuss current educational practices They also address issues of age gender and ethnicity In addition the authors identify areas where further work needs to be done and offer suggestions for new directions thus assisting program developers and leaders in the improvement of their practice **Handbook of**
