Organizational Ethics and the Good Life Edwin Hartman, 1996-01-04 In giving an account of what is ethical we can begin by describing the community that accommodates the good life to be ethical then is to be a contributor to that sort of community We live in political communities as well as in communities built around families neighborhoods churches and other associations But for many of us the community that will afford the good life that is the purpose of morality is the organization that employs us Aristotle claimed that the greatest ethical questions are political ones today we have reason to believe that the greatest ethical questions are organizational ones In *Organizational Ethics and the Good Life* Edwin Hartman contends that as ethics is about the good community a great part of business ethics is about the good organization He argues that a large and complex organization has the characteristic of the commons studied by game theorists and that it is the task of management to preserve the commons in the long term interests of all its members principally by creating an appropriate corporate culture A good corporate culture not only serves the interests of the participants but makes the organization a place in which they can develop interests that are compatible with both autonomy and good corporate citizenship that is they can develop a sense of the good life that is appropriate to the moral person Hartman opposes the standard view that the study of organizational ethics is a matter of considering how certain foundational ethical principles apply in organizational settings instead he argues business ethicists should consider how free and rational people arrive at a consensus on practical ethical principles in a morally good organization that leaves room for moral progress And what makes an organization morally good In discussing justice loyalty and other features of a morally good organization Hartman draws largely on the work of Rawls and Hirschman In describing the good life as one in which

well being and morality overlap Hartman proposes a new version of an idea as old as Aristotle who taught that human beings are rational but also irreducibly communal creatures

Enriching Business Ethics Clarence C. Walton, 2013-06-29 Over thirty years ago Alfred North Whitehead wrote If America is to be civilized it has to be done at least for the present by the business class who are in possession of the power and the economic resources If the American universities were up to their job they would be taking business in hand and teaching it ethics and professional standards To the intellectual elites of his time there was something of a minor in Whitehead s view Few of them saw business as a civilizing force heresy and even fewer feeling that business was not to be tamed relished the role of the lion tamers Not many today doubt Whitehead s wisdom Organiza tions of wealth and power have accepted their corporate social responsibili ties and universities have launched major efforts to provide ethical instruc tion for business personnel So far as the scholars are concerned they quickly came to realize the difficulty of an undertaking that seeks to redefine and apply moral criteria to a very complex corporate world Philosophers in particular have learned or perhaps have relearned how their speculations on ethics must take into account the living ethic expressed in the American culture and here anthropologists sociologists and theologians were needed to provide an expertise that the moral manuals did not
