Organizing Through Division And Exclusion Chinas Hukou System:

Organizing Through Division and Exclusion Fei-Ling Wang, 2005-01-05 This book is the first comprehensive examination of China's hukou household registration system. The hukou system registers and governs the 1.3 billion Chinese while creating deep and rigid divisions and exclusions in many domains; the system determines how the Chinese live and shapes China's sociopolitical structure and socioeconomic development. This book shows that the system has made both positive and negative contributions to contemporary Chinese society: it has helped foster rapid economic growth and political stability but also has reinforced social stratification, the rural-urban divide, regional inequalities, and discrimination and injustice. Using rich new materials, this book traces the history and development of the hukou system. It describes the functions, impact, and operational mechanisms of the system. It also analyzes the hukou in comparison with the systems of exclusion and discrimination in other nations, notably Brazil and India. This book presents important insights for understanding China's past, present, and future.

Organizing Through Division and Exclusion Fei-Ling Wang, 2005 This is an original and comprehensive examination of China's hukou household registration system, a system that fundamentally determines the Chinese way of life and shapes China's sociopolitical structure and socioeconomic development.

Identity, Inequity and Inequality in India and China Ayo Wahlberg, 2017-07-05 This volume explores how difference is constructed, manifested, mobilised, and obscured in socially uneven societies, particularly those fuelled by neoliberal economic growth in the recent years. The book approaches difference as a double-edged concept that allows one to make sense of the tensions that are played out between cosmopolitan convergence and multicultural diversity between expanding middle classes and increasingly disenfranchised poor groups between the global and the local. The chapters in this volume present a series of empirical explorations of how difference is articulated, desired, levelled, governed, and even subverted in the socioeconomically uneven landscapes of India and China. They examine how difference emerges out of daily practice, categorisation processes, dividing practices, nation-building efforts, and identity projects. Through these empirical studies, we see how difference is articulated along a number of axes: differentiations of groups or persons according to hierarchies of superiority/inferiority, the demarcation of difference as something that is potentially disruptive and therefore in need of containment, the celebration of difference as diversity, and finally the ways in which difference comes to be internalised in the shaping of individual identities. Another common theme that binds a number of contributions is the exploration of the role of the state in constructing and controlling these differences and the ways in which these interventions rearrange the social political landscapes. This book was published as a special issue of *Third World Quarterly*.

The New Oxford Handbook of Economic Geography Dariusz Wójcik, 2018-01-02 The first fifteen years of the 21st century have thrown into sharp relief the challenges of growth, equity, stability, and sustainability facing the world economy. In addition, they have exposed the inadequacies of mainstream economics in providing answers to these challenges. This volume gathers over 50 leading

scholars from around the world to offer a forward looking perspective of economic geography to understanding the various building blocks relationships and trajectories in the world economy The perspective is at the same time grounded in theory and in the experiences of particular places Reviewing state of the art of economic geography setting agendas and with illustrations and empirical evidence from all over the world the book should be an essential reference for students researchers as well as strategists and policy makers Building on the success of the first edition this volume offers a radically revised updated and broader approach to economic geography With the backdrop of the global financial crisis finance is investigated in chapters on financial stability financial innovation global financial networks the global map of savings and investments and financialization Environmental challenges are addressed in chapters on resource economies vulnerability of regions to climate change carbon markets and energy transitions Distribution and consumption feature alongside more established topics on the firm innovation and work The handbook also captures the theoretical and conceptual innovations of the last fifteen years including evolutionary economic geography and the global production networks approach Addressing the dangers of inequality instability and environmental crisis head on the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future

Understanding Labor and Employment Law in China
Ronald C. Brown, 2010 Continued economic prosperity in China and its international competitive advantage have been due in large part to the labor of workers in China who for many years toiled in underregulated workplaces More recently labor law reforms have been praised for their progressive measures and at the same time blamed for placing too many economic burdens on companies especially those operating on the margins which in some cases have caused business failures This combined with the global downturn and the millions of displaced and unemployed Chinese migrant laborers has created ongoing debate about the labor laws Meanwhile the Chinese Union has organized many of the Global Fortune 500 companies and a form of collective bargaining is occurring Workers are pursuing their legal labor rights in increasing numbers This book provides a clear overview of the labor and employment law environment in China and its legal requirements as well as practices under these laws used to deal with labor issues

Fundamental Labour Rights in China - Legal Implementation and Cultural Logic Ulla Liukkunen, Yifeng Chen, 2015-12-12 This volume gathers together chapters that address the theme of implementing fundamental labour rights in China It explores the legal framework as well as key institutions and other actors along with the socio economic context involved in interpretation implementation enforcement and overall promotion of fundamental labour rights in China As a collection of chapters it assembles comparative and mutually complementary perspectives and insights by distinguished scholars from China Europe and the United States With its broad perspective on implementation the book discusses the most topical challenges to realizing fundamental labour rights in China China was among the founding members of the ILO With the regulatory approach of the ILO fundamental labour rights have gained a new foothold as a key pillar in managing the social dimension of globalization The development of fundamental labour rights

protection in China can be viewed as part of a larger development within China's domestic economic and social transition as well as its integration into the global economic system. While China has ratified four of the eight ILO core conventions, the challenge of effective implementation and enforcement in the domestic context remains. With its in-depth research on fundamental labour rights in the particular cultural context of the Chinese experience, this book studies Chinese labour law from multiple perspectives at the same time, examining the wider role of international labour standards in developing Chinese law and society. This volume is a remarkable enlargement of existing scholarship on international labour standards on the one hand and fundamental labour rights in China on the other. These chapters thoroughly analyse the legal and institutional framework for implementing labour law in China. Among the topics covered are fundamental labour rights including freedom from forced labour, prohibition of use of child labour and non-discrimination. In addition, this volume benefits from socio-historical observations on the cultural logics that inform implementation of fundamental labour rights in China, in which the history and current development of Chinese labour law are equally reflected with substantive depth.

Development-Induced Displacement in India and China Florence Padovani, 2016-08-29 The world seems to have recently discovered India and China as major players in Asia and political and economic connections between the two countries are rapidly growing. Beyond the fashionable phenomenon, the two countries have much in common and many shared experiences. Both are developing countries with dynamic economies focused on lifting their people out of poverty. There are also differences as well as India is a democracy while China is an autocratic state and the speed of economic growth is much higher in India. This collection provides a comparative analysis of development-induced migration in India and China caused by urbanization and dam construction. The contributors include scholars from both countries working in both academia and consultancy positions. *Cities and Stability* Jeremy L. Wallace, 2014 *Cities and Stability* examines the threats that large cities pose to authoritarian regime survival and the ways that regimes respond to those threats, particularly focusing on China's management of urbanization through its household registration hukou system. **Contemporary China** Tamara Jacka, Andrew B. Kipnis, Sally Sargeson, 2013-07-22 Introduces readers to key sociological perspectives about modern Chinese society and social change. East Asia's Renewed Respect for the Rule of Law in the 21st Century Setsuo Miyazawa, Weidong Ji, Hiroshi Fukurai, Kay-Wah Chan, Matthias Vanhullebusch, 2015-03-20 This volume showcases the most recent research on the future of the legal and judicial landscape in East Asia and its renewed respect for the rule of law in the 21st century. The book features research on emerging judicial stratifications in the legal profession, war crimes and their legacies in the post-colonial era, citizens' participation in the justice system, gender law, legal culture and profession as well as environmental justice.
