Oriental Learning And Western Knowledge:

Oriental Learning and Western Knowledge Arabella Wennerström Nylund, 1991 *Understanding Chinese and Western Cultures* Tang Yijie, 2022-09-29 The title is a collection of essays centering on the topic of intercultural communication between Chinese and Western cultures by Tang Yijie one of the most renowned philosophy scholars in China Comprised of five parts the author discusses how Chinese culture should modernize itself through borrowing from Western culture premised on a self awareness of Chinese culture per se The book begins by critiquing theories of the so called clash of civilizations and new empires and argues for the coexistence of cultures and a global consciousness instead Chapters in the second part revisit contemporary Chinese culture in transition and call for the cultural integration of China and the West with China defined in both its ancient and modern guises By providing reflections on the cultural trends of the 1980s and 1990s the third part illustrates the inevitable growth of diversified cultural development while analyzing cases of cultural dialogue in history philosophy and religion The fourth part demonstrates the significance of culture diversity and interaction while the fifth provides thoughts and reflections on some real life cultural issues This title will appeal to all levels of readers interested in Chinese culture cross cultural studies and topics of cultural pluralism *Globalized Knowledge Flows and Chinese Social Theory* Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization especially with regard to Chinese social and cultural concepts It argues that the influence of globalization promotes the spread of West European and American social science concepts and methods at the expense of local concepts and approaches and at the same time paradoxically provides opportunities for the incorporation of local concepts including Chinese concepts into Western or mainstream social science *The Shaping of Knowledge: Education Under British Colonialism in India* KHRITISH SWARGIARY, 2025-05-01 As the author of *The Shaping of Knowledge Education Under British Colonialism in India* I embark on this intellectual journey with the reader to explore a period of profound transformation in the Indian subcontinent the evolution of its educational landscape under British rule This book is not merely a historical account it is an endeavor to dissect the intricate interplay between colonial ambitions and the enduring spirit of indigenous learning It seeks to illuminate how the policies and practices introduced by the British irrevocably shaped the educational fabric of India leaving a legacy that continues to resonate in the independent nation My own exploration into this multifaceted history began with a fundamental curiosity how do dominant powers leverage education as a tool of governance and influence and how do the colonized navigate and respond to these impositions This initial inquiry has since matured into a systematic and rigorous analysis meticulously examining the key legislative acts policy pronouncements and their subsequent implementation Within these pages each chapter serves as a focused lens through which to examine a pivotal juncture in the history of British educational interventions in India From the nascent and often hesitant steps of the East India Company to the comprehensive and far reaching visions articulated by committees such

as the Sargent Committee in the twilight of the Raj this book charts a chronological and thematic course Key reforms including the Charter Act of 1813 Macaulay s Minute of 1835 Wood s Educational Despatch of 1854 and subsequent significant policy shifts are scrutinized to unravel the underlying motivations that propelled them Furthermore this study endeavors to offer a nuanced perspective acknowledging the dualistic nature of these reforms their role in introducing modern educational concepts and institutions while simultaneously often marginalizing and undermining existing indigenous systems of knowledge The foundation of this book rests upon a rigorous engagement with primary historical sources including official government documents and archival materials Complementing this primary research is a critical synthesis of the invaluable contributions of numerous historians and scholars who have dedicated their expertise to understanding this complex period My aim throughout this process has been to maintain an objective and balanced analysis acknowledging both the intended and unintended consequences of British educational policies both their progressive facets and their detrimental impacts on Indian society The process of writing The Shaping of Knowledge has been an intellectually stimulating and deeply enriching experience It has reinforced my conviction in the transformative power of education a force capable of both empowering and controlling of fostering progress and perpetuating inequalities It is my sincere hope that this book will serve as a valuable resource for a diverse readership including students of history and education academic scholars policymakers and anyone seeking a deeper understanding of the historical roots of India s contemporary educational system In closing I extend my profound gratitude to all those whose support and encouragement have been indispensable in bringing this project to fruition Their belief in the significance of this historical inquiry has been a constant source of motivation It is my earnest hope that the readers of The Shaping of Knowledge will find its insights compelling and its analysis thought provoking thereby contributing to a more profound appreciation of the enduring legacy of colonial education in India

Pham, 2024 The Architects of Dignity Vietnamese Visions of Decolonization traces an intergenerational debate among six major political figures in Vietnam who had competing visions for how the Vietnamese should respond to French colonial domination 1858 1954 These thinkers engaged in cross cultural political thinking drawing on Indian Japanese Chinese French German thinkers and more conducting what political theorists would today call an engaged form of Comparative Political Theory Despite their differences they sought to channel feelings of national shame and inadequacy for constructive dignifying ends In contrast to theorists who tend to view shame as a destructive form of false consciousness

these thinkers show how shame can be an emotional engine to generate power for anticolonialism and self determination And while dignity is typically understood in the West as something inherent in individuals as a justification for rights and as requiring recognition these Vietnamese thinkers saw dignity as a property of nations as rooted in the duties a nation s people embrace and as something to be asserted by the nation instead of being dependent on recognition by colonizers
