Oriental Asia Themes Towards A Geography:

South East Asia in the World-Economy Chris J. Dixon, 1991-07-26 South East Asia has for many centuries occupied a pivotal position in the wider Asian economy linking China and the Far East with India and the Middle East and since the early 1500s the region has also played a major role in the world economy South East Asia in the World economy is a textbook survey of the area's interaction with these wider regional and international structures Professor Chris Dixon demonstrates how this region's role has undergone frequent and profound change as a result of the successive emergence and dominance of mercantile industrial and finance capital He shows how the region has developed as a supplier of luxury products such as spices as a producer of bulk primary products and how since the mid 1960s it has become a major recipient of investment and a favoured location for European and American markets The author examines how these phases in the evolution of the international economy have been reflected in the relations of evolution of the production and in the spatial pattern of economic activity He also discusses how the progressive integration of South East Asia in the world economy has established the dominance of a small number of core areas and produced a pattern of uneven development throughout the region In a concluding chapter Chris Dixon explores the prospects for South East Asia in the 1990s in the light of the restructuring of the world economy

The Making of Southeast Asia Amitav Acharya, 2013-02-22 Developing a framework to study what makes a region Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations He views the Association of Southeast Asian Nations ASEAN from the bottom up as not only a US inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions Although Acharya deploys the notion of imagined community to examine the changes especially since the Cold War in the significance of ASEAN dealings for a regional identity he insists that imagination is itself not a neutral but rather a culturally variable concept The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO the OAU or the European Union In this new edition of a book first published as The Quest for Identity in 2000 Acharya

updates developments in the region through the first decade of the new century the aftermath of the financial crisis of 1997 security affairs after September 2001 the long term impact of the 2004 tsunami and the substantial changes wrought by the rise of China as a regional and global actor Acharya argues in this important book for the crucial importance of regionalism in a different part of the world **The Shaping of America: A Geographical Perspective on 500 Years of History** D. W. Meinig, 1986-01-01 Volume one examines how an immense diversity of ethnic and religious groups ultimately created a set of distinct regional societies Volume two emphasizes the flux uncertainty and unpredictability of the expansion into continental America showing how a multitude of individuals confronted complex and problematic issues *Cultural Geography, Form and Process* Neelam Grover, Kashi N. Singh, 2004 Covers A Wide Range Of Cultural Concerns Such As Methodological Statements Impression Of Culture On Landscape Cultural Processes And Change Cultural Traits And Distribution And Cultural Ecology Has 29 Papers Contributed By Eminent Geographers From Indian And Abroad Researchers In Cultural Geography Anthropology Sociology And History Will Find It Useful **The New Third World** Alfonso Gonzalez, Jim Norwine, 1998-04-02 This engaging and accessible text provides an excellent interdisciplinary exploration of the meanings measures patterns and problems associated with the concept of the Third World Fully revised and updated it provides geographical political and economic perspectives on issues of development through a series of thematic and region specific chapters Development Issues in Marginal Regions R.B. Singh, 2019-03-04 Rapid population growth demand for increased food resources and other political economic and social stresses have all contributed to building up pressure for development of marginal regions in both developed and developing countries Ecological issues are also adding up to and increasing marginalization of regions and social groups due to the pressure on natural resources Broadly speaking marginal regions are perceived in concepts of centre periphery fringes and boundaries and frontiers In developing countries marginal regions are the combined effects of ecological economic and social factors For understanding the above complex issues the Study Group on Development Issues in Marginal Regions was established in August 1992 at the Washington International Geographical Congress **Catalog of Copyright Entries.
