Susan Carden, 2015-12-17 The development of digital textile printing at the end of the twentieth century has had a profound
effect on the design creation use and understanding of textiles This new technology combined with advances in fabric and
dye chemistry has made it possible to produce complex images on fabric comprising millions of colours quickly inexpensively
and in flexible quantities a revolution that has led to a rapid increase in demand which is predicted to rise still further This
book is the first to describe the historical and cultural context from which digital textile printing emerged and to engage
critically with the many issues that it raises the changing role of the designer in the creation of printed textiles the ways in
which the design process is being transformed by new technology the relationships between producers clients and the textile
industry and the impact of digital printing on the wider creative industries At the core of this study are two key questions
what constitutes authenticity in an age when printed textiles are created through the combined agency of the artist designer
and the computer And how can this new technology be put to work in a sustainable way during a period of spiralling demand
