History of medicine and surgery and physicians and surgeons of Chicago ,1922 The Cambridge World History of Human Disease Kenneth F. Kiple,1999 **Infectious Diseases: A Geographical Analysis** A. D. Cliff,M. R.

Smallman-Raynor,P. Haggett,D. F. Stroup,S. B. Thacker,2009-07-30 The last four decades of human history have seen the emergence of an unprecedented number of new infectious diseases the familiar roll call includes AIDS Ebola H5N1 influenza hantavirus hepatitis E Lassa fever legionnaires and Lyme diseases Marburg fever Rift Valley fever SARS and West Nile The outbreaks range in scale from global pandemics that have brought death and misery to millions through to self limiting outbreaks of mainly local impact Some outbreaks have erupted explosively but have already faded away some grumble along or continue to devastate as now persistent features in the medical lexicon in others a huge potential threat hangs uncertainly and worryingly in the air Some outbreaks are merely local others are worldwide This book looks at the epidemiological and geographical conditions which underpin disease emergence What are the processes which lead to emergence Why now in human history Where do such diseases emerge and how do they spread or fail to spread around the globe What is the armoury of surveillance and control measures that may curb the impact of such diseases But uniquely it sets these questions on the modern period of disease emergence in an historical context First it uses the historical record to set recent events against a much broader temporal canvas finding emergence to be a constant theme in disease history rather than one confined to recent decades It concludes that it is the quantitative pace of emergence rather than its intrinsic nature that separates the present period from earlier centuries Second it looks at the spatial and ecological setting of emergence using hundreds of specially drawn maps to chart the source areas of new diseases and the pathways of their spread The book is divided into three main sections Part 1 looks at early disease emergence Part 2 at the processes of disease emergence and Part 3 at the future for emergent diseases **The Journal of Infectious Diseases** ,1922 **Biomedical Index to**
