Popular Collecting And The Everyday Self The Reinvention Of Museums:

Popular Collecting and the Everyday Self Paul Martin, 1999 This work is an attempt to explore both the increase in and the breadth of popular collecting in Britain It does this by examining the contexts of social change over the past 20 years This change it is argued has led to a culture of social and material insecurity in which collecting is used for the creating and defence of identity The social theory of Guy Debord is employed as an underlying philosophy in which contemporary popular collecting is interpreted as an expression of a moral value system in a society driven by market forces The social world and values of collectors are explored through their clubs These it is asserted comprise an alternative society one in which a legitimization of the collector's activities and preferences can be made and in which they develop a complementary reality

Museums and the Future of Collecting Simon J. Knell, 2017-03-02 Collecting is a key function of museums Its apparent simplicity belies a complexity of questions and issues which make all collecting imprecise and unrepresentative This book exposes the many meanings of collections the different perspectives taken by different cultures and the institutional response to the collecting problem One major concern is omission whether this be determined by politics professional ethics the law or social agenda How did curators collect during the war in Croatia What were the problems of trying to collect the old South Africa when the new one was born Can museums collect from groups which seem to deviate from society's norms How has the function of museums affected the practices of international trade Can museums collect successfully if collecting agenda are being set externally Museums and the Future of Collecting encourages museums to move away from the collecting of isolated tokens to move beyond the collecting policy and to understand more clearly the intellectual function of what they do Here examples are given from Australia Sweden Canada Spain Britain and Croatia which provide this intellectual understanding and many practical tools for evaluating a future collecting strategy **New Museum Theory**

Subverting Consumerism Robert Crocker, Keri Chiveralls, 2018-07-24 There is now a widespread interest in reuse in many domains from opera houses built over old warehouses to vintage clothes and everyday goods incorporating repurposed materials or parts Despite its ubiquity this extensive creative work is typically seen in narrowly environmental terms as a means of reducing carbon resource use or waste However as this volume shows reuse also has aesthetic and cultural dimensions and a rich social currency invoked to consciously subvert the accelerated consumer culture responsible for our unfolding environmental crisis In three parts the essays in this book consider reuse in terms of values aesthetics and meaning its application in contemporary urban and spatial settings and the revival of social practices involving a more conscious recourse to reuse and repair These are bookended by the editors essays the first on the significant relationship between reuse and technological and social acceleration evident in the surrounding consumer society and the last on the multiple forms of reuse deployed in a contemporary alternative building practice and their contributions to presenting alternative ways of living in the world Challenging dominant understandings of waste and consumption Subverting Consumerism shows how reuse has become a means for many to creatively engage with the past and to discover a continuity and sense of place eroded by the accelerative regimes of contemporary consumerism Becoming a means of resistance and offering a range of aesthetic social and economic possibilities reuse can be found to subvert and challenge the obsessive quest for the new found in contemporary consumerism
