

# Young Discoverer Series

## THE OTHER TWO VOLUMES IN THIS SET...

The biggest, the smallest, the fastest, and the slowest are covered. In **Discovery Channel's** tour of the animal kingdom. In **Mammals** we learn about our animal "classmates" and the fabulous variety they come in today. We also find out why they rule the earth. Rattlesnakes have been working

slithering and lumbering around the Earth for millions of years. Fish and Amphibians take a look at the most prominent creatures under water. Learn how fish and the amphibians' different changes as they adapt to their environment. Take flight with Birds so you can take a closer look at our feathered friends. Did you know that you can guess what a bird eats by looking at its beak?

Sit down. Strap up. And get ready to blast off into space with **Discovery Channel**. Humans have always studied the skies. In **Solar System** we discover planets, asteroids and moons of our nearest neighbors in the galaxy. In the **History of Earth** we go back four and a half billion years and trace what has been happening to our home planet. In **Universe** we get a close look at stars, celestial objects, and how the universe began and how it is changing. We go on a **Space Exploring** adventure and answer questions like, "Are we the only intelligent life in the universe?" Hop on board the **Discovery Channel's** mission — the whole universe beckons you.
