Reproductive Health Arlette Campbell White, Thomas William Merrick, Abdo Yazbeck, 2006-01-01 While women in developing countries continue to die in large numbers in child birth Population and Reproductive Health specialists and advocates around the world are struggling to keep the policy agenda focused on the rights and needs of poor women The 1994 Cairo Conference and Program of Action changed how we do business and opened many doors but the agenda is not complete and has stalled in a number of ways At the country level governments and donors are making difficult choices about how and where to allocate scarce human and financial resources Funding approaches have moved away from the implementation of narrowly directed health programs to a broader approach of health system development and reform At the same time countries are also centering their development agenda on the broad goal of poverty reduction This volume addresses a large knowledge and capacity gap in the Reproductive Health community and provides tools for key actors to empower faster positive change It is a synopsis of the materials developed for WBI s learning program on Achieving the Millennium Development Goals Poverty Reduction Reproductive Health and Health Sector Reform The volume brings together knowledge about epidemiology demography economics and trends in global financial assistance The volume also introduces practical tools such as benefit incidence analysis costing and stakeholder analysis to strengthen the evidence base for policy and to address the political economy factors for reform *Sexual and Reproductive Health* Paul Van Look, Kristian Heggenhougen, Stella R. Quah, 2011-02-17 This volume brings together two areas of health that are among the foci of current development efforts as articulated by the Millennium Development Goals MDGs namely sexual and reproductive health MDG 5 improve maternal health target 2 achieve by 2015 universal access to reproductive health and Gender MDG 3 promote gender equality and empower women Few if any published books have dealt in a comprehensive way with public health aspects of these two strongly interrelated areas of health Most published volumes devoted to sexual and reproductive health

have a strong clinical focus whereas books on gender tend to concentrate primarily on the socio cultural and anthropological aspects of the subject Focuses on the relationship between sexual and reproductive behaviors and the resulting impact on populations and societies as a group Provides a science based approach to identifying appropriate response plans adaptations and mitigation steps for related behaviors Explores the financial and societal impact of behavioral choices Includes new preface specifically for this audience *The Routledge Handbook of African Demography* Clifford O. Odimegwu, Yemi Adewoyin, 2022-02-07 This handbook provides an authoritative and comprehensive overview of African population dynamics variations causes and consequences demonstrating the real world applications of research in policies and programmes African demography has come of age Over 50 years the discipline has grown exponentially in the number of training and research institutions specialist experts and academic output all with an aim of addressing the enormous demographic challenges faced by the continent The book draws on old and emerging analytical tools to explore the relationships between population dynamics and social economic cultural and political environments from African perspectives Key topics include fertility sexual behaviours healthcare ageing mortality migration displacement the causes and consequences of demographic changes and teaching and research developments in African demography The Routledge Handbook of African Demography will be an essential resource for students and researchers of African demography sociology development and cultural studies **Promoting Reproductive Health** Shepard Forman, Romita Ghosh, 2000 The resulting case studies help also to answer broader questions regarding assistance for health and sustainable development from the perspective of both developing and donor countries **BOOK JACKET Development and Women's Reproductive Health in Ghana, 1920-1982** Holly Ashford, 2022-12-09 This book investigates the history of women s reproductive health in Ghana arguing that between the 1920s and 1980s it was largely driven by discourses of development and population control rather than a concern for women s health or rights Between the 1920s and 1980s the choices that Ghanaian women made regarding their reproductive health were defined by development policy and practice Spanning the colonial and immediate postcolonial periods this book demonstrates that whilst the substance of development discourse shifted over time principles of development continued to be used to impact and legitimise reproductive health policy and practices well after independence The book explores Ghana s pluralist health system the introduction of maternal and child welfare the dominance of the Red Cross in Ghana s maternal and child health landscape nationalist pronatalism and global population activism In order to understand how global iterations of development and health policy impacted ordinary lives in Ghana the author uses evidence from multiple levels including private papers national archives and records of international and transnational organisations Providing balanced archival perspectives the book includes extensive oral history interviews carried out with both rural Ghanaian women and traditional birth attendants as well as with midwives doctors and family planning fieldworkers This book will have an important impact on a number of historical fields including Ghanaian history global

health history global histories of population and family planning and histories of development It will be of interest to researchers and students in the history of public health development Africa Ghana and gender

8 Billion and Counting: How Sex, Death, and Migration Shape Our World Jennifer D. Sciubba, 2022-03-29 A provocative description of the power of population change to create the conditions for societal transformation As the world nears 8 billion people the countries that have led the global order since World War II are becoming the most aged societies in human history At the same time the world's poorest and least powerful countries are suffocating under an imbalance of population and resources In *8 Billion and Counting* political demographer Jennifer D Sciubba argues that the story of the twenty first century is less a story about exponential population growth as the previous century was than it is a story about differential growth marked by a stark divide between the world's richest and poorest countries Drawing from decades of research policy experience and teaching Sciubba employs stories and statistics to explain how demographic trends like age structure and ethnic composition are crucial signposts for future violence and peace repression and democracy poverty and prosperity Although we have a diverse global population demographic trends often follow predictable patterns that can help professionals across the corporate nonprofit government and military sectors understand the global strategic environment Through the lenses of national security global health and economics Sciubba demonstrates the pitfalls of taking population numbers at face value and extrapolating from there Instead she argues we must look at the forces in a society that amplify demographic trends and the forces that dilute them particularly political institutions or the rules of the game She shows that the most important skills in demographic analysis are naming and being aware of your preferences rethinking assumptions and asking the right questions Provocative and engrossing *8 Billion and Counting* is required reading for business leaders policy makers and anyone eager to anticipate political economic and social risks and opportunities A deeper understanding of fertility mortality and migration promises to point toward the investments we need to make today to shape the future we want tomorrow

Gender, Development and Health Caroline Sweetman, 2001 Articles included here focus on understandings of reproductive health integrating gender issues into infectious disease prevention the impact of HIV AIDS on women working with communities to promote health and on the monitoring and evaluation of health projects from a gender perspective

Reproductive Health Survey ... Jamaica, 1997 From Population Control To Reproductive Health Mohan Rao, 2004 Annotation *Fundamentals of Population Education* Mr. Rohit Manglik, 2022-04-22 In this book we will study about the concepts of population growth demographic trends and their implications on education and development *The Global Gag Rule and Women's Reproductive Health* Yana van der Meulen Rodgers, 2018-10-26 Foreign assistance by the United States is tangled with domestic politics and perhaps this is most clear in relation to funding for health and family planning The long arm of U S domestic politics has reached the intimate lives of women all over the world because it has threatened major cuts in funding to healthcare organizations in developing countries if they perform or promote abortions This global gag rule so

called because to even mention abortion endangers funding has been a hallmark of Republican administrations since it was first enacted by President Ronald Reagan. When Donald Trump reinstated and expanded the policy, there was popular uproar and a firestorm of debate. Proponents of the policy emphasize the importance of reducing the number of abortions globally and claim that the gag rule will be effective in achieving this goal. In this innovative book, Yana van der Meulen Rodgers argues that the gag rule has failed to achieve its goal of reducing abortions. Rather, the restrictive legislation is associated with higher abortion rates and because the reduction in funding is indiscriminate, there are negative repercussions across a range of health outcomes for women, children, and men. While the rhetoric in media discourse has been extreme, Rodgers provides systematic analysis of how the global gag rule affects women's reproductive health across developing regions, grounded in a conceptual framework that models the complex factors that influence women's decision making about fertility. She also traces the background to American policy, the evolution of international family planning programs, the links between contraceptive access and fertility rates, and the relationship between restrictive abortion laws and abortion rates. And because Rodgers provides a rounded perspective on factors influencing women's decisions on reproduction and abortion, she offers a constructive and cost-effective approach for U.S. family planning assistance that targets integrated reproductive health services.

Creating a New Consensus on Population Jyoti Shankar Singh, 2013-11-12

Population growth, reproductive health, and reproductive rights are amongst the most pressing issues facing governments and the international community. Since the world's governments agreed for the first time on far-reaching and enlightened population policies at the 1994 International Conference on Population and Development (ICPD) in Cairo, a good deal of progress has been made on these issues, but major challenges remain. This fully updated edition of *Creating a New Consensus on Population* charts international progress on efforts to address population and development, reproductive health, reproductive rights, religion, contraception, and the empowerment of women. Historical coverage includes the lead-up process to the ICPD, the conference itself, and the global consensus and the ICPD Programme of Action that resulted. The book then turns to how population issues have developed over the past decade and a half, including follow-up and implementation at the international level by the United Nations Population Fund (UNFPA) and other UN agencies and organizations. Key international events are covered, including the 1999 ICPD 5 Millennium Summit, 2000 ICPD 10, and the 2005 MDG 5, as well as relevant regional events. The book also examines the reorientation of policies and programmes and implementation at national levels across the world. Crucially, it looks at emerging issues and partnerships, including the increasing role of NGOs, women's groups, youth groups, foundations, public-private partnerships, and other non-state stakeholders. Written by Jyoti Shankar Singh, former ICPD Executive Coordinator, this is the definitive account of how the international community has engaged with population issues and policies, and it offers insight into both the ongoing challenges as well as how an international consensus can be forged on crucial global issues. It is essential reading for all those involved in population health and development issues and policies.
