Sanad Al-Suwaidi, 2018-01-01 In light of the radical transformations and changes that the world witnesses on all levels research in the field of social issues is gaining increased prominence particularly amid different sources of danger that threaten social security in countries primarily due changes in the nature of warfare and conflicts the spread of extremism and terrorism and the emergence of religious sectarian doctrinal and racial tensions Moreover the unprecedented technological transformations in light of the fourth industrial revolution 4IR with its social effects can compromise the stability and security of societies Therefore in this book I focus on studying UAE society in an ever changing world from a comprehensive perspective that encompasses political security economic social cultural and technological aspects From an early stage in my academic career I have given special attention in my books research papers and studies to issues of national security at the forefront of which is social security This stems from my belief that social security is one of the most important and critical aspects of national security in its comprehensive sense Furthermore social security is also closely associated with all other political economic cultural and stability aspects of national security This book includes seven chapters along with an introduction and a conclusion Chapter One deals with the experience of the Union of the UAE and how it has affected UAE society Chapter Two deals with UAE society in a changing regional and international environment Chapter Three examines the UAE's economic vision to prepare for the post oil era which is based primarily on knowledge and innovation Chapter Four addresses education and its importance in building national human capacities and resources Chapter Five discusses national identity its significance and sources of threat Chapter Six examines balanced political development and the guarantee it gives to enable political stability in the UAE The last chapter Chapter Seven discusses UAE society and global technological changes in terms of challenges and opportunities The book ends with a conclusion in which I call for more attention to studies pertaining to UAE society in the coming years because the current changes in the local regional and global environments have several implications for this society Therefore it is important to study these implications and anticipate their future trajectories United Arab Republic, Egypt: Its People, Its Society, Its Culture

Lenski, Catherine M. Cameron, 2018-05-10 The practice of slavery has been common across a variety of cultures around the globe and throughout history Despite the multiplicity of slavery's manifestations many scholars have used a simple binary to categorize slave holding groups as either genuine slave societies or societies with slaves This dichotomy as originally proposed by ancient historian Moses Finley assumes that there were just five genuine slave societies in all of human history ancient Greece and Rome and the colonial Caribbean Brazil and the American South This book interrogates this bedrock of

comparative slave studies and tests its worth Assembling contributions from top specialists it demonstrates that the catalogue of five must be expanded and that the model may need to be replaced with a more flexible system that emphasizes the notion of intensification The issue is approached as a question allowing for debate between the seventeen contributors about how best to conceptualize the comparative study of human bondage
