Video Yvonne Spielmann,2010-08-13 An argument that video is not merely an intermediate stage between analog and digital but a medium in its own right traces the theoretical genealogy of video and examines the different concepts of video seen in works by Vito Acconci Ulrike Rosenbach Steina and Woody Vasulka and others Video is an electronic medium dependent on the transfer of electronic signals Video signals are in constant movement circulating between camera and monitor This process of simultaneous production and reproduction makes video the most reflexive of media distinct from both photography and film in which the image or a sequence of images is central Because it is processual and not bound to recording and the appearance of a frame video shares properties with the computer In this book Yvonne Spielmann argues that video is not merely an intermediate stage between analog and digital but a medium in its own right Video has metamorphosed from technology to medium with a set of aesthetic languages that are specific to it and current critical debates on new media still need to recognize this Spielmann considers video as transformation imagery acknowledging the centrality in video of the transitions between images and the fact that these transitions are explicitly reflected in new processes After situating video in a genealogical model that demonstrates both its continuities and discontinuities with other media Spielmann considers three strands of video praxis documentary experimental art and experimental image making which is concerned primarily with signal processing She then discusses selected works by such artists as Vito Acconci Ulrike Rosenbach Joan Jonas Nam June Paik Peter Campus Dara Birnbaum Nan Hoover Lynn Hershman Gary Hill Steina and Woody Vasulka Bill Seaman and others These works serve to demonstrate the spectrum of possibilities in video as medium and point to connections with other forms of media Finally Spielmann discusses the potential of interactivity complexity and hybridization in the future of video as a medium

Video Revolutions Michael Z. Newman, 2014-04-01 Since the days of early television video has been an indispensable part of culture society and moving image media industries Over the decades it has been an avant garde artistic medium a high tech consumer gadget a format for watching movies at home a force for democracy and the ultimate ubiquitous means of documenting reality In the twenty first century video is the name we give all kinds of moving images We know it as an adaptable medium that bridges analog and digital amateur and professional broadcasting and recording television and cinema art and commercial culture and old media and new digital networks In this history Michael Z Newman casts video as a medium of shifting value and legitimacy in relation to other media and technologies particularly film and television Video has been imagined as more or less authentic or artistic than movies or television as more or less democratic and participatory as more or less capable of capturing the real Techno utopian rhetoric has repeatedly represented video as a revolutionary medium promising to solve the problems of the past and the present often the very problems associated with television and the society shaped by it and to deliver a better future Video has also been seen more negatively particularly as a threat to movies and their culture This study considers video as an object of these hopes and

fears and builds an approach to thinking about the concept of the medium in terms of cultural status
