Management Laureates Arthur G. Bedeian, 2018-04-17 First published in 1992 This volume compiles the autobiographies of the management discipline s most distinguished laureates Prior to this publication the available management literature provided little insight into the personal and intellectual lives the frustrations as well as the triumphs of the individuals in the management discipline Although such understanding could be conveyed in many forms perhaps the most intimate and fascinating of these for gaining behind the scenes insights is the autobiography Thus the autobiographies in this volume as in the five companion volumes offer the reader not only a glimpse of the subjective determinants and personal experiences of the management discipline s most distinguished laureates but also a deeper understanding of what management is and what it is becoming The various accounts reflect a diversity of approaches interests and experiences

Egan, 2015 This ambitious volume provides a trenchant and timely analysis of the creation of a single market in both the EU and the US Comparing the experience of the US during the nineteenth century and the single market of the EU in the twentieth century Single Markets demonstrates how the political economy of single market formation has followed remarkably similar trajectories Both cases show evidence of

interplay between different levels of government in determining distributive outcomes evolution of a legal framework for the market and development of new regulatory strategies to deal with changing economic realities The book illustrates the process of market consolidation through a detailed comparison of the so called four freedoms the removal of border controls and the largely unrestricted transfer of goods services and capital across different jurisdictions In both cases establishing one market one currency and a more unified banking and financial system transformed largely autonomous or sovereign constituent units into a more unified economic entity Single Markets also sheds light on critically important questions for both comparativists and international relations scholars regarding the nature of territorial governance and the construction of state interests The book s interdisciplinary approach to focusing on crucial political and economic developments on both sides of the Atlantic will be of interest to scholars in political science public policy law and history

state and the food system **Who Controls Public Lands?** Christopher McGrory Klyza, 2000-11-09 In this historical and comparative study Christopher McGrory Klyza explores why land management policies in mining forestry and grazing have followed different paths and explains why public lands policy in general has remained virtually static over time According to Klyza understanding the different philosophies that gave rise to each policy regime is crucial to reforming public lands policy in the future Klyza begins by delineating how prevailing policy philosophies over the course of the last century have shaped each of the three land use patterns he discusses In mining the model was economic liberalism which mandated privatization of public lands in forestry it was technocratic utilitarianism which called for government ownership and management of land and in grazing it was interest group liberalism in which private interests determined government policy Each of these philosophies held sway in the years during which policy for that particular resource was formed says Klyza and continues to animate it even today **General Register** University of Michigan, 1969 Announcements for the following year included in some vols
