Applied Linguistics *Words and Intelligence II* Khurshid Ahmad, Christopher Brewster, Mark Stevenson, 2007-05-16 Yorick Wilks is a central figure in the fields of Natural Language Processing and Artificial Intelligence This book celebrates Wilks's career from the perspective of his peers in original chapters each of which analyses an aspect of his work and links it to current thinking in that area This volume forms a two part set together with *Words and Intelligence I Selected Works* by Yorick Wilks by the same editors Edgar Allan Poe across Disciplines, Genres and Languages Alfonso Amendola, Linda Barone, 2018-01-23 This collection of essays which rediscovers Edgar Allan Poe's not forgotten lore comprises a two headed scholarly body drawing from communication and linguistics and literature although it also includes many other academic offshoots which explore Poe's labyrinthine and variegated imagination The papers are classified according to two main domains namely I Edgar Allan Poe in Language Literature and Translation Studies and II Edgar Allan Poe in Communication and the Arts In short this book combines rigour and modernity and pays homage with a fresh outlook to Poe's extraordinary originality and brilliant weirdness which prompted renowned authors like James Russell Lowell and Howard P Lovecraft to claim respectively that Mr Poe has that indescribable something which men have agreed to call genius and that Poe's tales possess an almost absolute perfection of artistic form which makes them veritable beacon lights in the province of the short story Poe's weird tales are alive in a manner that few others can ever hope to be **Linguistics for the Age of AI** Marjorie McShane, Sergei Nirenburg, 2021-03-02 A human inspired linguistically sophisticated model of language understanding for intelligent agent systems One of the original goals of artificial intelligence research was to endow intelligent agents with human level natural language capabilities Recent AI research however has focused on applying statistical and machine learning approaches to big data rather than attempting to model what people do and how they do it In this book Marjorie McShane and Sergei Nirenburg return to the original goal of recreating human level intelligence in a machine They present a human inspired linguistically sophisticated model of language understanding for intelligent agent systems that emphasizes meaning the deep context sensitive meaning that a person derives from spoken or written language **Reading** Belinda Jack, 2019-04-08 Today many people take reading for granted but we remain some way off from attaining literacy for the global human population And whilst we think we know what reading is it remains in many ways a mysterious process or set of processes The effects of reading are myriad it can be informative distracting moving erotically arousing politically motivating spiritual and much much more At different times and in different places reading means different things In this Very Short Introduction Belinda Jack explores the fascinating history of literacy and the opportunities reading opens For much of human history reading was the preserve of the elite and most reading meant being read to Innovations in printing paper making and transport combined with the rise of public education from the late eighteenth century on brought a dramatic rise in literacy in many parts of the world Established links between a nation's levels of literacy and its economy led to the promotion of reading for political ends But equally reading has been associated with subversive ideas leading to

censorship through multiple channels denying access to education controlling publishing destroying libraries and even the burning of authors and their works Indeed the works of Voltaire were so often burned that an enterprising Parisian publisher produced a fire proof edition decorated with a phoenix But as Jack demonstrates reading is a collaborative act between an author and a reader and one which can never be wholly controlled Telling the story of reading from the ancient world to digital reading and restrictions today Belinda Jack explores why it is such an important aspect of our society ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
