Elizabeth Graue, 1993-01-01 This book looks at readiness from a different perspective arguing that we must move away from the readiness as child characteristic so prevalent in education and the popular press. Instead, readiness is explained as an idea constructed by parents, teachers, and children as they interact in their neighborhoods and communities. Graue describes three communities in the same school district: a middle class suburban town of professionals, a rural working class community, and a group of Hispanic working class families making their way through their children's kindergarten experiences. In each setting, the local meaning of readiness is the underlying theme in the actions taken by parents and their attitudes about their children's first public school experience. *The Assessment of Readiness for School* George Haskell Brown, 1987 **The National Education Goals Report**, 1992 *Building a Nation of Learners*, 1992 *Starting Strong V Transitions from Early Childhood Education and Care to Primary Education* OECD, 2017-06-21 The transition from early childhood education to primary school is a big step for all children and a step which more and more children are having to take.
