The Bully Society Jessie Klein, 2012-03-16 Choice's Outstanding Academic Title list for 2013 Through interviews and case studies Klein develops an explanation for bully behavior in America's schools In today's schools kids bullying kids is not an occasional occurrence but rather an everyday reality where children learn early that being sensitive respectful and kind earns them no respect Jessie Klein makes the provocative argument that the rise of school shootings across America and childhood aggression more broadly are the consequences of a society that actually promotes aggressive and competitive behavior *The Bully Society* is a call to reclaim America's schools from the vicious cycle of aggression that threatens our children and our society at large Heartbreaking interviews illuminate how both boys and girls obtain status by acting masculine displaying aggression at one another's expense as both students and adults

police one another to uphold gender stereotypes Klein shows that the aggressive ritual of gender policing in American culture creates emotional damage that perpetuates violence through revenge and that this cycle is the main cause of not only the many school shootings that have shocked America but also related problems in schools manifesting in high rates of suicide depression anxiety eating disorders self cutting truancy and substance abuse After two decades working in schools as a school social worker and professor Klein proposes ways to transcend these destructive trends transforming school bully societies into compassionate communities Spiritual Well-Being of Chinese Older Adults Vivian W. Q. Lou, 2015-02-04

There are several unique features of this book on the spiritual well being of Chinese older adults First based on qualitative methodology a conceptual model of spiritual well being was proposed Besides through a Delphi study different dimensions of spiritual well being were identified Conceptually such effort is important because there is a general lack of well articulated models of spiritual well being for Chinese people Although Western models can be transplanted to Chinese contexts indigenous concepts are needed As such this is a pioneer conceptual contribution Second the author developed and validated the Spiritual Scale for Chinese Elders In view of the lack of related measurement tools in the field this is a pioneer attempt which is important for social work education research and practice Third a Spiritual Enhancement Group for Chinese Elders was developed and its effectiveness was evaluated In contrast to ordinary elderly programs this program was based on solid theoretical grounds In addition process evaluation and outcome evaluation were conducted The intervention program is a beautiful link between theory and practice whereas the evaluation is a good outgrowth of practice The present project is especially valuable because evidence based practice is at its infancy in different Chinese communities *The Ethology of Predation* E. Curio, 2012-12-06 Predation is an ecological factor of almost universal importance for the biologist who aims at an understanding of the habits and structures of animals Despite its pervasive nature opinions differ as to what predation really is So far it has been defined only in negative terms it is thought not to be parasitism the other great process by which one organism harms another nor filter feeding carrion eating or browsing Accordingly one could define predation as a process by which an animal spends some effort to locate a live prey and in addition spends another effort to mutilate or kill it According to this usage of the word a nudibranch for example that feeds on hydroids would be a predator inasmuch as it needs some time to locate colonies of its prey which after being located scarcely demand more than eating which differs little from browsing From the definition just proposed consumption of the prey following its capture has been intentionally omitted Indeed an animal may be disposed of without being eaten Hence the biological significance of predation may be more than to maintain nutritional homeostasis In fact predation may have something in common with the more direct forms of competition a facet that will be only cursorily touched upon in this book **The Truth is Funny, shift happens...**

Colette Marie Stefan, 2015-06-11 If You Cannot See A Strong Future For Your Children Who Will The number one weakness for every child is a mother's worry Every single thought you have about your children has the potential to strengthen or

weaken them Mothers are taught and encouraged to worry about their children as a badge of honor instead of honoring their intuition to create a better future for every child Many people who shift out of limiting beliefs and expectations break into peals of laughter as they recognize how they have participated in what just might be a giant cosmic joke The truth is funny Often stranger than fiction A word of caution If you prefer the status quo and you are not interested in improving every aspect of your life This book will trigger the shift out of you
