Reform In China And Other Socialist Economies

Nicholas R. Lardy

Reform In China And Other Socialist Economies:

Reform in China and Other Socialist Economies Jan S. Prybyla,1990 **Foreign Trade and Economic Reform in China** Nicholas R. Lardy,1992 A comprehensive analysis of how China emerged as one of the most dynamic trading nations in the world first published in 1992 China's Economic Dilemmas in the 1990s United States. Congress. Joint Economic Committee,1992 Costs and Benefits of Interdependence A Net Assessment China's Economic Dilemmas in the 1990s ,1991 *China's Economic Dilemmas in the 1990s* The Joint Economic Committee,2016-09-16 Most students of contemporary China are familiar with the Joint Economic Committee studies on China which have appeared periodically since 1967 This is the most recent study in the series released in April 1991 This volume follows the format of the previous studies offering a broad sweep of its subject matter The 50 chapters contributed by Chinese scholars in government universities and private research centres are divided into five major parts Each section begins with an overview which summarises and comments on the main points in each of the chapters The volume offers a detailed examination of China s economy and the political and social factors currently facing the leadership in Beijing Economic Reforms and Political Attempts in China 1979-1989 Barna Talas,2012-12-06 In our quickly changing world authors who are analyzing the so cial economic and political processes going on in different countries often find themselves in a situation where the deve lopment of processes they have already described take a turn in another direction before their work is in final form or appears in print As a consequence some of their statements are no lon ger valid More rarely it occurs that after the writing of a book presenting a reform process covering 10 years the writing itself taking one and a half years exceptional events take place in the given country within 1 or 2 months of the delivery of the manuscript that indicate a sharp break in this process one that makes it doubtful whether the process can continue along the same channel This is what has happened to this text and to its author at the beginning of June 1989 when in Beijing after the brutal suppression of student demonstrations and of protests lasting several weeks the General Secretary of the Communist Party of China Zhao Ziyang was relieved of his office and arrested along with several other prominent repre sentatives of reform policy and reform endeavors of the past decade The manuscript of this book was handed over to the pub lisher on May 4 1989 for editing Immediately thereafter I left for nearly 2 months in the United States consequently I did not receive the manuscript again until in early July **Private Business and Economic Reform in China** Susan Young,2015-05-11 Based on Party and state documents Chinese newspaper reports and surveys the Chinese and Western scholarly literature and the author s own fieldwork this important study examines the private sector as a case study of the mechanics of reform in China emphasizing the relationships among local officials private businesses and central policy The book traces the growth of private business in China since 1978 and focuses on the interaction between private sector policy and other reforms and examines how this has affected China s political economy *The Political Economy Of China's Financial Reforms* Paul Bowles,Gordon White,2019-07-11 THIS PATHBREAKING Work

analyzes the evolution of China's financial reforms since 1979. China's reformers have stressed the construction of a more diverse, flexible, and competitive financial system as a crucial element of China's economic reform program. The authors assess the theory and practice of financial reform in light of China's specific characteristics as a large developing country that still claims to be pursuing the goal of establishing a new form of socialist market economy. The authors utilize two approaches. First, they place the overall design and trajectory of financial reform since 1979 within a broad comparative framework of alternative strategies of financial reform and financial systems. Second, they use a political economy perspective to explore the complex interactions among the political and economic actors, individual groups, or institutions that affect reform outcomes. Integrating these two approaches, the authors conclude by assessing future directions for feasible and desirable financial reform in China.

China's Industrial Reform Gene Tidrick, Jiyuan Chen, 1987. Containing important implications for socialist and other developing countries, this book uses newly acquired data to analyze China's far-reaching industrial reforms. It looks at Hungary's reforms and compares Chinese and Soviet systems.

The Impact of China's Economic Reforms Upon Land, Property and Construction Jean Jinghan Chen, David Wills, 2019-04-12. First published in 1999, this volume aims to explore the impact of China's recent economic reforms and dynamic economic progress on land use, the property market, and construction activity under the leadership of Deng Xiaoping until his death in 1997. Following the famine and bloody mayhem of Mao Zedong's Great Leap Forward and Cultural Revolution, Deng Xiaoping took on the task of piecing the country back together to once more become a leading world economy. Here, Jean Jinghan Chen and David Wills concentrate on his reforms and progress, examining at what point power can be said to have passed from Deng Xiaoping to Jiang Zemin, to what extent Deng's political philosophy remained in place under the new government, and what this means for China's economic reforms on land, property, and construction. The authors provide a view on how management of the physical environment needs to be considered in the context of economic progress to achieve sustainable development.

China's Economic Reforms Lin Wei, Arnold Chao, 1982. Essays on theoretical and empirical contradictions in China's economic policy reforms since 1976, discusses policy options and economic development trends: 1949-1980 economic structure imbalances, revival of private enterprises, market mechanism and competition under socialism, foreign investment, potential price policies, etc. Stresses the importance of communes, public ownership, efficient public enterprise leadership, rational decentralization, etc. Includes a glossary, references, and statistical tables.

China's Foreign Trade Reforms John C. Hsu, 1989. Recent events in China have revealed a nation struggling to reconcile its new thinking with its traditional institutions and practices. This book provides an assessment of one aspect of the reform process: the foreign trade system. The reforms in China have heralded a new openness in Chinese economic policy. In this book, his first full-length work on the subject, Dr. Hsu investigates the impact of the reforms on China's foreign trade and consequently on the domestic economy. In the process, he examines such issues as the role of foreign trade in China's economic development, the institutional changes involved in the foreign trade reforms, and the

efficiency of the new foreign trade incentive system He then evaluates the possibilities for further foreign trade reforms in the future In conclusion Dr Hsu suggests that Chinese enterprises have been slow to respond to changes in domestic and international market conditions and that exposure to foreign markets has exacerbated inflation problems in the Chinese economy As a result he finds that China has not enjoyed the full potential benefits of its reform program This book will be of interest to economists political scientists Asian studies specialists and others interested in the economic ramifications of China's reform process It is a timely and thorough account of this crucial aspect of reform and an important addition to the growing body of literature on the restructuring of modern communist states

Unstately Power: Local causes of China's economic reforms Lynn T. White, 1998 China's dramatic reforms are usually said to have been caused by the policies of state leaders under Deng Xiaoping This fascinating new study by one of the West's leading authorities on contemporary China shows however that reforms began and are maintained by local networks They emerged first in the economy partly as unintended results of previous policies Agricultural extension in Mao Zedong's time freed so much labor from the land in rich areas such as the Shanghai delta that peasant leaders set up rural industries to employ clients Many of these leaders were avowed state cadres but they acted for local constituencies more than for Beijing Their initiatives can be documented in the early 1970s long before the 1978 proclamation of new enterprises which the central bureaucracy could not monitor taking materials and markets away from state industries This caused socialist control of input prices and commodity flows to collapse by the mid 1980s As a result shortages and inflation bedeviled the economy the state ran deficits management decentralized local banks proliferated and immigration to cities soared

State-Market Interactions in China's Reform Era Junmin Wang, 2014-06-23 China today has the largest communist political regime and one of the most dynamic fastest growing and largest economies in the world Using a case study of China's tobacco industry this book analyses how the Chinese government was able to cultivate big state owned firms that have successfully embraced the global market The success of the Chinese economy and the many state owned firms within it have given rise to a Beijing Consensus challenging almost every principle enshrined in the so called Washington Consensus that espouses private ownership free markets and democracy By examining two important political processes in contemporary China local state competition and global market building the book argues that the first process serves as a crucial basis for the second It illustrates how the local governments involved themselves in building and shaping the tobacco market throughout the 1980s and 1990s and how these domestic market dynamics created conditions for China's recent embrace of the international market Offering an in depth exploration of the political economic processes in a key Chinese state industry the book emphasizes that the key to understanding China's political transition is to look at how the state has been shaped by its market building projects both domestically and globally It presents an important contribution to studies on Chinese Business and International Political Economy

A Political Economy Analysis of China's Civil Aviation Industry Mark Dougan, 2016-04-29 First published in 2002

This volume is a political economy analysis of China's civil aviation industry with a focus on the reform period beginning in the late 1970s up to the present. The chief aim is to identify and analyze the most important political economy variables impacting on the industry's development during this time. China's Authoritarian Path to Development Liang Tang, 2017-06-14. This book examines the various stages of China's development in the economic, social, and political fields, relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward. It argues that China's modernization hitherto can be characterized as authoritarian development, a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness, and that the present phase, where more emphasis is being given to social issues, is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization. It presents an in-depth analysis of China's changing social structure and civil society, explores the forces for and processes of democratization, and assesses the prospects for further democratization in the light of changing social structures. The Political Economy of Reforms and the Remaking of the Proletarian Class in China, 1980s-2010s Shan Shanne Huang, 2023-01-19. This book comprehensively investigates the position of China's working class between the 1980s and 2010s and considers the consequences of economic reforms in historical perspective. It argues the case that far from the illusion during the Maoist period that a new society had been established where the working classes held greater political and economic autonomy, economic reforms in the post-Mao era have led to the return of traditional Marxist proletariats in China. The book demonstrates how the reforms of Deng Xiaoping have led to increased economic efficiency at the expense of economic equality through an extensive case study of an SOE state-owned enterprise in Sichuan Province, as well as wider discussions of the emergence of state capitalism on both a micro and macroeconomic level. The book also discusses workers' protests during these periods of economic reform to reflect the reformation of class consciousness in post-Mao China, drawing on Marx's concept of a transition from a class in itself to a class for itself. It will be valuable reading for students and scholars of Chinese economic and social history, as well as political economy, sociology, and politics. Understanding the Chinese Economies Rongxing Guo, 2012-08-29. China's economic growth has been more robust in some regions than others. In a country as large as China, examinations of regional differences can provide a viable way to learn about the economy as a whole. Rongxing Guo provides a systematic introduction to the economies of China by describing their external and internal drivers and by placing them within geopolitical and even socio-cultural boundaries. His pairings of case studies and empirical techniques reveal a rich, deep appreciation of the growth process and of interactions between key factors. This book delves more deeply into issues surrounding the economy than other books, offering a unique and important perspective that many will find useful. Covering history and administrative structures, unique economic features, some domestic economic issues, and international economic engagement, it describes an often inaccessible perspective with nuances all students of China will find

valuable Introduces China's regional economies often overlooked in US and European texts within larger contexts of social and geopolitical concerns Explains the reform process since 1978 in a comprehensive non technical and accessible manner Features case studies in each chapter *Problems of Communism* ,1991 Economic Reforms in India and China Dr. R.K. Mishra, Prof. Zhou Shaopeng, 2011-07-21 This book incorporates select papers presented at the two day seminar titled Economic Reforms in India and China The China National School of Administration CNSA and Institute of Public Enterprise IPE jointly organized the two day seminar The Chinese papers dealt with prospects of economic development development approach similarity between China and India economic growth and policy industrialization dilemma and civilization model innovation under resource etc The Indian papers dealt with economic reforms in agriculture second generation reforms performance of public enterprises political economy in state enterprises financial sector reforms social sector reforms etc These papers have been authored by renowned policy makers researchers and practitioners from India and China
