Rudolf Peierls And Theoretical Physics Progress In Nuclear Physics Volume 13:

Rudolf Peierls and Theoretical Physics Rudolf Ernst Peierls, 1977 Heisenberg and the Nazi Atomic Bomb Project. 1939-1945 Paul Lawrence Rose, 2023-11-15 No one better represents the plight and the conduct of German intellectuals under Hitler than Werner Heisenberg whose task it was to build an atomic bomb for Nazi Germany The controversy surrounding Heisenberg still rages because of the nature of his work and the regime for which it was undertaken What precisely did Heisenberg know about the physics of the atomic bomb How deep was his loyalty to the German government during the Third Reich Assuming that he had been able to build a bomb would he have been willing These questions the moral and the scientific are answered by Paul Lawrence Rose with greater accuracy and breadth of documentation than any other historian has yet achieved Digging deep into the archival record among formerly secret technical reports Rose establishes that Heisenberg never overcame certain misconceptions about nuclear fission and as a result the German leaders never pushed for atomic weapons In fact Heisenberg never had to face the moral problem of whether he should design a bomb for the Nazi regime Only when he and his colleagues were interned in England and heard about Hiroshima did Heisenberg realize that his calculations were wrong He began at once to construct an image of himself as a pure scientist who could have built a bomb but chose to work on reactor design instead This was fiction as Rose demonstrates in reality Heisenberg blindly supported and justified the cause of German victory The question of why he did and why he misrepresented himself afterwards is answered through Rose s subtle analysis of German mentality and the scientists problems of delusion and self delusion This fascinating study is a profound effort to understand one of the twentieth century s great enigmas No one better represents the plight and the conduct of German intellectuals under Hitler than Werner Heisenberg whose task it was to build an atomic bomb for Nazi Germany The controversy surrounding Heisenberg still rages because of the nature of his w A Breadth of Physics Richard Henry Dalitz, R. B. Stinchcombe, 1988 Sir Rudolf Peierls: Selected Private And Scientific Correspondence (Volume 2) Sabine Lee, 2009-05-12 This edition of the private and scientific correspondence of Sir Rudolf Peierls gives a unique insight into the life and work of one of the greatest theoretical physicists of the 20th century Rudolf Peierls scientific work contributed to the early developments in quantum mechanics and he is well known and much appreciated for his contributions to various disciplines including solid state physics nuclear physics and particle physics As an enthusiastic and devoted teacher he passed on his knowledge and understanding and inspired the work of collaborators and students alike As an effective administrator he was responsible almost single handedly for the establishment of an outstanding successful centre of theoretical physics in Birmingham and later contributed much to theoretical physics in Oxford A meticulous collector of correspondence Sir Rudolf left a fascinating collection of letters in some cases spanning more than seven decades This collection includes correspondence with his parents his wife the Russian born physicist Genia Kannegieser life long friends such as Hans Bethe and many great physicists including Wolfgang Pauli

Niels Bohr Werner Heisenberg Lev Landau and George Placzek to name but a few The second volume which covers the years 1945 to 1995 contains fascinating documents from the early postwar period when Peierls like many of his colleagues elsewhere attempted to rebuild academic life in the aftermath of the Second World War Materials from the 1950s provide evidence for the significance of the research undertaken by Peierls group at Birmingham and for the positive impact of his determined implementation of international exchange on the development of theoretical physics Later documents illustrate the role played by Peierls in nuclear disarmament and as a link between East and West through his own personal contacts and within international organisations such as the Pugwash Movement The extensive apparatus provides an invaluable background which allows the reader to put the documents into their multi faceted social political and scientific context

20th Century Physics Edoardo Amaldi, Giovanni Battimelli, Giovanni Paoloni, 1998 In this important volume major events and personalities of 20th century physics are portrayed through recollections and historiographical works of one of the most prominent figures of European science A former student of Enrico Fermi and a leading personality of physical research and science policy in postwar Italy Edoardo Amaldi devoted part of his career to documenting both as witness and as historian some significant moments of 20th century science The focus of the book is on the European scene ranging from nuclear research in Rome in the 1930s to particle physics at CERN and includes biographies of physicists such as Ettore Majorana Bruno Touschek and Fritz Houtermans Edoardo Amaldi Carpaneto 1908 Roma 1989 was one of the leading figures in twentieth century Italian science He was conferred his degree in physics at Rome University in 1929 and played an active role as a member of the team of young physicists known as the boys of via Panisperna in the fundamental research on artificial induced radioactivity and the properties of neutrons which won the group's leader Enrico Fermi the Nobel Prize for physics in 1938 Following Fermi's departure for the United States in 1938 and the disruption of the original group Amaldi took upon himself the task of reorganising the research in physics in the difficult situation of post war Italy His own research went from nuclear physics to cosmic ray physics elementary particles and in later years gravitational waves Active research was for him always coupled to a direct involvement as a statesman of science and an organiser he was the leading figure in the establishment of INFN National Institute for Nuclear Physics and has played a major role as spokesman of the Italian scientific community in the creation of CERN the large European laboratory for high energy physics He also actively supported the formation of a similar trans national joint venture in space science which gave birth to the European Space

Agency In these and several other scientific organisations he was often entrusted with directive responsibilities In his later years he developed a keen interest in the history of his discipline This gave rise to a rich production of historiographic material of which a significant sample is collected in this volume
