The Way of a Child A. C. Harwood, 2013-05-17 Despite the development of modern educational theories and the ingenious methods devised to hold a child's attention today education and even childhood appear to be facing something of a crisis The fact that boredom or even extreme violence can be spoken of in connection with little children is a sad reflection on our times Are children in danger of losing the natural human fantasy that is the source of all creative imagination in later life Are we in danger indeed of losing childhood altogether Although first published in 1940 Cecil Harwood's little book has become a classic introduction to the perennial themes of child development and growth and to the basic principles of Rudolf Steiner Waldorf education Cecil Harwood 1898 1975 was one of the founding members of the first Waldorf school in the English speaking world and worked for many years as a Steiner teacher His sensitive awareness and respect for the innate wisdom of childhood shine through this book As he demonstrates a sympathetic and loving picture of

approach and its continuing relevance within the educational landscape *What Is Waldorf Education?* Rudolf Steiner, 2004-11 The soul's immortality and its repeated earthly births are not new ideas in Western thought. They are implicit in the Pythagorean and Platonic traditions as well as in some branches of esoteric Judaism and Cabbala. But it was not until the early years of this century that the West was given a detailed modern evolutionary philosophy of human life based on the reality of reincarnation and karma. This turning point occurred when Rudolf Steiner began to make public the results of his spiritual scientific researches. He viewed the revelation of reincarnation and karma as one of his most important life tasks. Steiner's contribution however remains unique in its understanding of the human being as an evolving developing being of body soul and spirit. On the basis of his researches presented in numerous books and lectures we begin to understand how the complex interaction of human lives between birth and death and between death and a new birth gives new meaning not only to individual lives lived on Earth in community with others but also to human history and evolution and to earthly and cosmic events. This book collects many of Steiner's major statements on reincarnation and karma. The primary purpose of this volume is to help readers meet the challenge of spiritual research in the area of individual evolution of the soul and spirit in the context of cultural and universal evolution. Such a study can be tremendously revealing and provide spiritual understanding in a time of increasing intellectual confusion and spiritual poverty. The notion of reincarnation and karma is generally associated in most minds with spiritual traditions of the East especially Hinduism and Buddhism. Ren Querido's in depth sixty page introduction however places these concepts within the context of Western spiritual development and esoteric tradition showing us a panoramic view of how such ideas have developed over the centuries in the West *The Essentials of Education* Rudolf Steiner, 1997 Delivered in April 1924 during an educational conference these five lectures are the last public lectures that Steiner gave in Germany. E. A. K. Stockmeyer writes Seventeen hundred people listened to him and the prolonged generous applause from this great crowd at the end of every lecture was deeply moving while at the end of the last lecture the applause became an ovation that seemed as if it would never end. back cover **The Education of the Child and Early Lectures on Education** Rudolf Steiner, 1996 It is necessary for human beings to remember not only what they already understand but to come to understand what they already know that is what they have acquired by memory in the way the child acquires language. In a certain sense understanding things through concepts should proceed from the stored up treasures of the memory. The more children know in memory before they begin to understand through intellectual concepts the better. p 31 As early as 1884 while tutoring a boy with special needs Steiner began a lifelong interest in applying spiritual knowledge to the practical aspects of life. Steiner originally published the essay at the core of this book in 1907. It represents his earliest ideas on education in which he lays out the soul spiritual processes of human development describing the need to understand how the being of a child develops through successive births beginning with the physical body's entry into earthly life and culminating in the emergence of the I being with adulthood. Also included are several early lectures on

The Renewal of Education Rudolf Steiner, 2001-10 Written 1902 CW 8 As simultaneously mysticism and fact Christianity is a breakthrough in the historical development of humanity for which the mysteries with the results that they brought about form a prior evolutionary stage Rudolf Steiner During the fall and winter of 1901 02 Steiner gave a series of lectures called Christianity as Mystical Fact to members of the Theosophical Society The lectures were rewritten and issued as a book later that year They mark a watershed in the development of Western esotericism Steiner wrote of the idea behind his book The title Christianity as Mystical Fact was one I gave to this work eight years ago when I gathered together the content of lectures given in 1902 It was meant to indicate the special approach adopted in the book Its theme is not just the mystical side of Christianity in a historical presentation It was meant to show from the standpoint of a mystical awareness how Christianity came into being Behind this was the idea that spiritual happenings were factors in the emergence of Christianity which could only be observed from such a point of view It is for the book itself to demonstrate that by mystical I do not in any way imply a vague intuition rather than strict scientific argument In many circles mysticism is understood as just that and therefore it is distinguished from the concerns of all genuine science In this book however I use the term to mean a presentation of spiritual reality a reality accessible only to a knowledge drawn from the sources of spiritual life itself Anyone who denies the possibility of such knowledge in principle will find its contents hard to comprehend any reader who accepts the idea that mysticism may coexist with the clarity of the
