## New rules of the game

An extensive review of the laws of Rugby Union in the aftermath of the 1991 World Cup has produced a number of changes which are to be implemented at the start of this season. These are primarily designed to increase the speed of the game and improve its safety record

### Kick off

A place kick from the ground. If the ball crosses the opposing team's goal line without being touched by the defending team that team may have a scrum at the half way. After a score the kick off is to be a drop kick

### Ruck and maul

Experimental change to reduce mauling

When the ball becomes unplayable in a ruck or a maul, or a maul becomes stationary, the team not in possession at the commencement will put the ball into a scrum

### Free kick and penalty

Penalties are now only awarded for foul play, unfair play, obstruction or offside. 12 penalty provisions, such as time wasting, intentional knock on, using another player for support in a line out or handling the ball in a scrum or ruck, have been changed to free kicks

### Line out

Experimental change

The present distance of half a metre between opposing lines of players is to be increased to 1 metre. Players of the same team no longer need to be 1 metre apart

### Tackle

Any player not involved in the tackle must be on his feet when he plays the ball

### Mark

A player only needs one foot on the ground and can call a mark when running

### Scrum

It is illegal to lift an opponent intentionally off his feet. A hooker may now raise his foot as soon as the ball leaves the hand of the scrum half. The scrum half may not 'dummy' a pass before the ball leaves the scrum to try and catch opponents off side

### Scoring

points

TRY	5
PENALTY GOAL	3
DROP GOAL	3
CONVERSION	2

### Try

Score increased to 5 points to encourage attacking play and emphasise importance over a penalty goal

uniformly of a very high standard and illuminating And there are real gems in some of the contributions British Journal on the Economics of Sport This very interesting and comprehensive book achieves its objective namely to present an overview of research in sports economics at an introductory level The editors have produced an excellent reference book that belongs in all academic institutions libraries It provides extensive introduction to the growing body of literature in the rising field of economics of sport The book s relevant monographs should be read by institutions cities and countries prior to their committing major resources towards sports facilities or a sporting event James Angresano Journal of Sports Economics One could think of this book as the sports and economics counterpart to Joy of Cooking because it will satisfy the needs of those with a keen interest in such subjects as the

**The Global Spread of Football from the 1860s to the 1880s** Thomas Adam,2025-08-05 This book offers a study of how football became in the 1870s a global sport that was played by high school students on several continents It provides a horizontal perspective that focusses on the spread of football in the 1870s from its English cradle to Germany the United States and Argentina It will be the very first account of football that does not treat this sport in isolation but brings together the phenomenon of football with the conditions in nineteenth century high schools and the crisis of urban living and thereby explains why this sport was so willingly and quickly accepted into various societies and cultures around the globe Football was part of the social reform movement that emerged in the second half of the nineteenth century in response to the social ills of urban life Adults and children spent more and more time inside badly ventilated buildings Beginning in the 1870s social reformers and teachers called for the introduction into school curricula of physical exercises that could be conducted on the meadows and sport fields outside cities

**Experience and the World's Own Language** Richard Gaskin,2006-02-09 John McDowell s minimal empiricism is one of the most influential and widely discussed doctrines in contemporary philosophy Richard Gaskin subjects it to careful examination and criticism The doctrine is undermined he argues by inadequacies in the way McDowell conceives what he styles the order of justification connecting world experience and judgement McDowell s conception of the roles played by causation and nature in this order is threatened with vacuity and the requirements of self consciousness and verbal articulacy which he places on subjects participating in the justificatory relation between experience and judgement are unwarranted and have the implausible consequence that infants and non human animals are excluded from the order of justification and so are deprived of experience of the world Above all McDowell s position is vitiated by a substantial error he commits in the philosophy of language following ancient tradition rather than Frege s radical departure from that tradition he locates concepts at the level of sense rather than at the level of reference in the semantical hierarchy This error generates an unwanted Kantian transcendental idealism which in effect delivers a reductio ad absurdum of McDowell s metaphysical economy Gaskin goes on to show how to correct the mistake and thereby presents his own version of empiricism First we must follow Frege in his location of concepts at the level of reference but then we must go beyond Frege and locate not only concepts but also

propositions at that level and this in turn requires us to take seriously an idea which McDowell mentions only to reject that of objects as speaking to us in the world's own language If empiricism is to have any chance of success it must be still more minimal in its pretensions than McDowell allows in particular it must abandon the individualistic and intellectualistic construction which McDowell places on the order of justification
