key personality in that movement was the Society's librarian and secretary of its physical geography section P P Semenov 1827-1914 a member of a minor gentry family who had been tutored by a pupil of Linnacus and who had studied under Ritter and von Humboldt at Berlin during a tour of Europe in 1853-4 From then he conceived the notion of travelling to the virtually unknown lands of Central Asia ostensibly to verify opinions on the existence there of active volcanoes and glaciers In reality his ambition was to penetrate beyond the Kazakh steppe and to reach the fabled Celestial Mountains the Tian Shan range which constituted the politically sensitive border between Russia and China and the equally hostile buffer zone of Muslim khanates Accompanied only by a serf servant in May 1856 Semenov embarked on a 18 month journey from St Petersburg through Kazan to Semipalatinsk and thence via the Altai to the newly established Russian settlement of Vernoe later Alma Ata now Almaty Subsequently he received a Cossack escort on his trek into the high plateaus and ridges surrounding Issyk kul to the very heart of Asia Throughout his

The Evolution of Cultural Diversity Ruth Mace, Clare J Holden, Stephen Shennan, 2016-09-16 Virtually all aspects of human behavior show enormous variation both within and between cultural groups including material culture social organization and language Thousands of distinct cultural groups exist about 6 000 languages are spoken today and it is thought that a far greater number of languages existed in the past but became extinct Using a Darwinian approach this book seeks to explain this rich cultural variation There are a number of theoretical reasons to believe that cultural diversification might be tree like that is phylogenetic material and non material culture is clearly inherited by descendants there is descent with modification and languages appear to be hierarchically related There are also a number of theoretical reasons to believe that cultural evolution is not tree like cultural inheritance is not Mendelian and can indeed be vertical horizontal or oblique evidence of borrowing abounds cultures are not necessarily biological populations and can be transient and complex Here for the first time this title tackles these questions of cultural evolution empirically and quantitatively using a range of case studies from Africa the Pacific Europe Asia and America A range of powerful theoretical tools developed in evolutionary biology is used to test detailed hypotheses about historical patterns and adaptive functions in cultural evolution Evidence is amassed from archaeological linguist and cultural datasets from both recent and historical or pre historical time periods A unifying theme is that the phylogenetic approach is a useful and powerful framework both for describing the evolutionary history of these traits and also for testing adaptive hypotheses about their evolution and co evolution Contributors include archaeologists anthropologists evolutionary biologists and linguists and this book will be of great interest to all those involved in these areas
