Rules For Old Men Waiting:

Rules for Old Men Waiting Peter Pouncey, 2007-12-18 A brief lyrical novel with a powerful emotional charge Rules for Old Men Waiting is about three wars of the twentieth century and an ever deepening marriage In a house on the Cape older than the Republic Robert MacIver a historian who long ago played rugby for Scotland creates a list of rules by which to live out his last days The most important rule to tell a story to its end spurs the old Scot on to invent a strange and gripping tale of men in the trenches of the First World War Drawn from a depth of knowledge and imagination MacIver conjures the implacable clear sighted artist Private Callum the private s nemesis Sergeant Braddis with his pincerlike nails Lieutenant Simon Dodds who takes on Braddis and Private Charlie Alston who is ensnared in this story of inhumanity and betrayal but brings it to a close This invented tale of the Great War prompts MacIver's own memories of his role in World War II and of Vietnam where his son David served Both the stories and the memories alike are lit by the vivid presence of Margaret his wife As Hearts and Minds director Peter Davis writes Pouncey has wrought an almost inconceivable amount of beauty from pain loss and war and I think he has been able to do this because every page is imbued with the love story at the heart of his astonishing novel

Bureau of Commissioner of Labor .1904 The Politics of Female Households: Ladies-in-waiting across Early Modern Europe, 2013-10-24 The Politics of Labor, 1904 Female Households is the first collection that seeks to integrate ladies in waiting into the master narrative of early modern court studies Presenting evidence and analysis of the multifarious ways in which women above stairs shaped the European courts of the sixteenth and seventeenth centuries it argues for a re assessment of their political influence. The cultural agency of ladies in waiting is viewed in the reflection of portraiture pamphlets and masques their political dealings and patronage are revealed through analysis of letters family networks career patterns gift exchange and household structures as well as their activities in the fields of intelligence gathering and espionage By concentrating on a previously neglected area of female agency this collection demonstrates clearly that the political climate of Europe was often shaped outside the male dominated institutions of government and administration Contributors include Helen Graham Matheson Hannah Leah Crumm Katrin Keller Vanessa de Cruz Birgit Houben Dries Raeymaekers Janet Ravenscroft Una McIlvenna Rosalind K Marshall Oliver Mallick Cynthia Fry Nadine Akkerman Sara J Wolfson Fabian Persson and Jeroen Duindam The Publishers Weekly ,2005

Waiting for Dead Men's Shoes Donald Chisholm, 2001 This monumental study provides an innovative and powerful means for understanding institutions by applying problem solving theory to the creation and elaboration of formal organizational rules and procedures Based on a meticulously researched historical analysis of the U S Navy s officer personnel system from its beginnings to 1941 the book is informed by developments in cognitive psychology cognitive science operations research and management science It also offers important insights into the development of the American

administrative state highlighting broader societal conflicts over equity efficiency and economy Considering the Navy s personnel system as an institution the book shows that changes in that system resulted from a long term process of institutional design in which formal rules and procedures are established and elaborated Institutional design is here understood as a problem solving process comprising day to day efforts of many decision makers to resolve the difficulties that block completion of their tasks The officer personnel system is treated as a problem of organized complexity with many components interacting in systematic intricate ways its structure usually imperfectly understood by the participants Consequently much problem solving entails decomposing the larger problem into smaller more manageable components closing open constraints and balancing competing value premises The author finds that decision makers are unlikely to generate many alternatives since searching for existing solutions elsewhere or inventing new ones is an expensive difficult enterprise Choice is usually a matter of accepting rejecting or modifying a single solution Because time constraints force decisions before problems are well structured errors are frequently made problem components are at best only partially addressed and the chosen solution may not solve the problem at all and even if it does is likely to generate unanticipated side effects that worsen other problem components In its definitive treatment of a critical but hitherto entirely unresearched dimension of the administration of the U S Navy the book provides full details over time concerning the elaboration of officer grades and titles creation of promotion by selection sea duty requirements graded retirement staff line conflicts the establishment of the Reserve and such unusual subjects as tombstone promotions In the process it transcends the specifics of the personnel system to give a broad picture of the Navy s history over the first century and a half of its development Murdoch's Ethics Megan Laverty, 2007-11-30 This book will be of great value to philosophers gender theorists literary critics and others engaged with the questions of life s meaning and what a deepened understanding of it looks like Report on Old-age Pensions Massachusetts.
