Stars to Steer By Julia Jones, 2025-05-08 The extraordinary stories of the fearless women who set their sights on the sea in an all male world paving the way for the female sailing superstars of today Gender issues are stark at sea Historically a ship's crew is all male and although vessels are referred to as she women's contributions to sailing have been largely ignored if not actively opposed Today's sailing legends such as Tracy Edwards and Ellen MacArthur compete with men on equal terms but they stand on the shoulders of many women before them who had to challenge preconceptions prejudice and even the law in their wish to sail Spanning the 19th century to today Julia Jones dives into the lives of an array of incredible and unconventional women we meet single handed sailors wealthy explorers long suffering wives and penniless chancers with a thirst for adventure Each had to face down barriers of official exclusion family imposed restriction social disapproval and often a resulting lack of self belief In the 21st century British women wear Admiral's uniforms and break global yachting records yet their journey to professional sailing remains challenging and the public face of sailing remains mostly male evident in the lack of female Commodores in prestigious yacht clubs Even as sailing becomes more accessible the remarkable contributions within these stories are a precious source of inspiration to all women facing their own challenges today Let Your Mind Run Deena Kastor, Michelle Hamilton, 2019-04-09 NEW YORK TIMES BESTSELLER Deena Kastor is one of the greatest bodies in distance running but this book captures what is so groundbreaking about her mind Alexi Pappas Olympian writer and filmmaker now featuring a workbook to help chart your mind's journey Inspiring fascinating and insightful Practical for anyone trying to overcome the biggest impediments to climbing that next hill of growth Shawn Achor author of The Happiness Advantage and Big Potential Deena Kastor was a star youth runner with tremendous promise yet her career almost ended after college when her competitive method run as hard as possible for fear of losing brought her to the brink of burnout On the verge of quitting she took a chance on legendary coach Joe Vigil who had started the first professional distance running team in the US At his Colorado training center she encountered the notion that shaping her mind to be more encouraging kind and resilient could make her faster than she'd ever imagined possible Building a mind so strong

would take years of effort and discipline but it would propel Kastor to the pinnacle of running to American records in every distance from the 5K to the marathon and to the accomplishment of earning America's first Olympic medal in the marathon in twenty years. *Let Your Mind Run* is a fascinating intimate look inside the mind of an elite athlete, a remarkable story of achievement and an insightful primer on how the small steps of cultivating possibility can give anyone a competitive edge.

Ocean Carbon Dioxide Removal for Climate Mitigation Romany M. Webb, Korey Silverman-Roati, Michael B.

Gerrard, 2023-01-20 Examining the existing legal framework for ocean carbon dioxide removal, this forward-thinking book explores whether, when, where, and how future research and deployment can take place in the field. It provides a detailed exploration of how the ocean could be used to remove and store carbon dioxide from the atmosphere, describing five commonly discussed ocean CDR techniques: rock-based ocean alkalinity enhancement (OAE), electrochemical OAE, ocean fertilization, artificial upwelling, and downwelling, and seaweed cultivation, and exploring the legal issues that different techniques could raise.

Race to Zero Marian Krüger, Benedict Probst, Sebastian Hanss-Mirodone, 2025-04-17 Actionable Strategies for Businesses to Achieve Climate Neutrality. Climate change is not just an environmental issue; it is a fundamental business risk that demands urgent action from companies of all sizes and industries. While reducing greenhouse gas emissions is essential, reaching full CO2 neutrality remains a significant challenge. Traditional carbon offsetting alone will not be enough to drive meaningful impact. To stay ahead, business leaders must go beyond mitigation and actively contribute to removing carbon from the atmosphere. Marian Krüger and Benedict Probst highlight the most effective carbon removal strategies and share practical insights on how companies can integrate these solutions today, regardless of where they stand in their sustainability journey.
