The Aid Lab Naomi Hossain, 2017-02-16 From an unpromising start as the basket case to present day plaudits for its human development achievements Bangladesh plays an ideological role in the contemporary world order offering proof that the neo liberal development model works under the most testing conditions How were such rapid gains possible in a context of chronically weak governance The Aid Lab subjects this so called Bangladesh paradox to close scrutiny evaluating public policies and their outcomes for poverty and development since Bangladesh's independence in 1971 Countering received wisdom that its gains owe to an early shift to market oriented economic reform it argues that a binding political settlement a social contract to protect against the crises of subsistence and survival united the elite the masses and their aid donors in the wake of the devastating famine of 1974 This laid resilient foundations for human development fostering a focus on the poorest and most precarious and in particular on the concerns of women In chapters examining the environmental political and socioeconomic crisis of the 1970s the book shows how the lessons of the famine led to a robustly pro poor growth and social policy agenda empowering the Bangladeshi state and its non governmental organizations to protect and enable its population to thrive in its engagements in the global economy Now a middle income country Bangladesh's role as the world's laboratory for aided

Age, Narrative and Migration Katy Gardner,2020-12-07 Whilst the vast majority of recent research on identity and ethnicity amongst South Asians in Britain has focused upon younger people this book deals with Bengali elders the first generation of migrants from Sylhet in Bangladesh The book describes how many of these elders face the processes of ageing sickness and finally death in a country where they did not expect to stay and where they do not necessarily feel they belong The ways in which they talk about and deal with this and in particular their ambivalence towards Britain and Bangladesh lies at the heart of the book Centrally the book is based around the men and womens life stories In her analysis of these Gardner shows how narratives play an important role in the formation of both collective and individual identity and are key domains for the articulation of gender and age Underlying the stories that people tell and sometimes hidden within their gaps and silences are often other issues and concerns Using particular idioms and narrative devices the elders talk about the contradictions and disjunctions of transmigration their relationship with and sometimes resistance to the British State and what they often present as the breakdown of traditional ways In addition to this the book shows that histories stories and identity are not just narrated through words but also through the body an area rarely theorized in studies of migration
