China's Long March to Freedom Kate Zhou, 2017-09-08 China is more than a socialist market economy led by ever more reform minded leaders It is a country whose people seek liberty on a daily basis Their success has been phenomenal despite the fact that China continues to be governed by a single party Clear distinctions between the people and the government are emerging underlining the fact that true liberalization cannot be imposed from above Although a large percentage of the Chinese people have been part of China's long march to freedom farmers entrepreneurs migrants Chinese gays sex pleasure seekers and black marketers played a particularly important role in the beginning Lawyers scholars journalists and rights activists have jumped in more recently to ensure that liberalization continues Social dissatisfaction with the government is now published in the media addressed in public forums and deliberated in courtrooms Intellectuals devoted to improvement in human rights and continued liberalization are part of the process This grassroots social revolution has also resulted from the explosion of information available to ordinary people especially via the Internet and far reaching international influences All have fundamentally altered key elements of the moral and material content of China's party state regime and society at large This social revolution is moving China towards a more liberal society despite its government The Chinese government reacts rather than leads in this transformative process This book is a landmark a decade in the making

Sources of Chinese Economic Growth, 1978-1996 Chris Bramall, 2000-09-14 This analysis of the political economy of growth in the era of Deng Xiaoping takes issue with the growth accounting methodologies and market centred explanations which characterize so much of the literature on transition era China By adopting an approach which echoes the pioneering work of Chalmers Johnson Alice Amsden and Robert Wade on other East Asian Economies and which makes full

use of the rich statistical materials that have become available since 1978 this book shows that Chinese growth was driven by a combination of state led industrial policy and the favourable infrastructural legacies of the Maoist era And in giving due weight to the sheer complexity of the growth process by looking in detail at the experience of four very different Chinese regions it avoids over simplistic macroeconomic generalization Nevertheless even this type of approach is inadequate because it fails to explain why industrial policy has been so much more successful in China than in other countries This book therefore goes beyond the development state approach to argue that state autonomy in China reflected the remarkably equal distribution of income and wealth at the end of the 1970s and paradoxically the destruction of party structures and institutions during the Cultural Revolution The policy implications are stark The Chinese experience demonstrates that industrial policy and state spending on physical and social infrastructure can produce rich rewards conversely slavish reliance on foreign direct investment and trade are likely to limit the pace of growth But attempts to replicate China s success in Latin America sub Saharan Africa and South Asia will fail because their governments will not resist rent seeking by classes and interest groups Moreover as the state becomes weaker in the wake of the re emergence of a powerful capitalist class even Chinese growth may prove unsustainable

Inequity In Healthcare Services: Today's Reality and Tomorrow's Challenges Avid Tur-Sinai,Netta Bentur,Orna Tal,Royi Barnea,Rachel Gur-Arie,Susanne Hagen,2024-05-31 The principle of equality is the ideological basis for the public healthcare system in most Western countries Equality in availability of and access to healthcare services is an essential condition for fulfilling the patient centered perspective that prevails today in many healthcare systems around the world Equality in health in its various aspects is a value to which many aspire although some extent of inequality and health will always exist Since some disparities in health are unavoidable and individuals are free to live as they wish there will always be gaps among population groups in their abilities and willingness to invest in their health

Modernization Of China's Agricultural Production Organizations Cao Yang,2023-03-10 This book constructs a new theoretical framework for understanding contemporary Chinese agricultural production organizations from the perspective of promoting farmers realization of substantial freedom and feasible ability The new theoretical framework deepens and expands the theory of agricultural modernization and production organizations The book discusses the multi symbiosis pattern of agricultural production organizations in contemporary China from macro and micro economics perspectives Based on the peasant household economy this multi symbiosis organizational structure co exists and interweaves with various forms of economic organizations The book points out that this multi symbiosis organizational structure is the result of free choice of the majority of farmers since the reform and opening up in turn it also provides a broader organizational and institutional space for farmers diversified choices The book predicts that China s agricultural production organization networking will gradually move towards networking based on diversification and also form networked organization groups

Chinese Social Policy in a Time of Transition Douglas Besharov, Karen Baehler, 2013-06-27 Examines the consolidation of Chinese social policy partly as a result of economic liberalization and expansion Political Participation in Beijing Tianjian Shi, 1997 In this first scientific survey of political participation in the People s Republic of China Tianjian Shi identifies twenty eight participatory acts and groups them into seven areas voting campaign activities appeals adversarial activities cronyism resistance and boycotts What he finds will surprise many observers Political participation in a closed society is not necessarily characterized by passive citizens driven by regime mobilization aimed at carrying out predetermined goals Beijing citizens acknowledge that they actively engage in various voluntary participatory acts to articulate their interests In a society where communication channels are controlled by the government Shi discovers access to information from unofficial means becomes the single most important determinant for people s engaging in participatory acts Government sponsored channels of appeal are easily accessible to ordinary citizens so socioeconomic resources are unimportant in determining who uses these channels Instead voter turnout is found to be associated with the type of work unit a person belongs to subjective evaluations of one s own economic status and party affiliation Those most likely to engage in campaign activities adversarial activities cronyism resistance and boycotts are the more disadvantaged groups in Beijing While political participation in the West fosters a sense of identification the unconventional modes of participation in Beijing undermine the existing political order *Towards 2030 - China's Poverty Alleviation and Global Poverty Governance* Xiaolin Wang, Xiaoying
