Landless Households in Rural Europe, 1600-1900 Christine Fertig, Richard Paping, Henry French, 2022 First comparative study of landless households brings out their major role in European history and society The numbers of landless people those lacking formal rights to land or possessing only tiny smallholdings grew rapidly across post medieval Europe as rural population and economic growth divided landowners and farmers from increasingly landless rural workers But they have hitherto been relatively neglected a gap which this volume covering Scandinavia Germany Austria Netherlands Belgium Britain France and Spain from the sixteenth to the early twentieth centuries aims to fill making creative use of a diverse range of unexplored sources Instead of concentrating on the well documented cases of landholding peasants it explores the many different experiences of the numerous rural landless It explains how their households were formed often in the face of economic difficulties and official hostility how all the members of a family contributed to its survival how the landless related to other social groups and negotiated access to vital resources and how they adapted as rural society was changed by war politics agrarian and industrial development government policy and welfare systems Contributors Arnau Barquer i Cerd John Broad Dieter Bruneel Christine Fertig Henry French Margareth Lanzinger Jonas Lindstr m Riikka Miettinen Richard Paping Wouter Ronsijn Merja Uotila Nadine Vivierlated to other social groups and negotiated access to vital resources and how they adapted as rural society was changed by war politics agrarian and industrial development government policy and welfare systems Contributors Arnau Barquer i Cerd John Broad Dieter Bruneel Christine Fertig Henry French Margareth Lanzinger Jonas Lindstr m Riikka Miettinen Richard Paping Wouter Ronsijn Merja Uotila Nadine Vivierlated to other social groups and negotiated access to vital resources and how they adapted as rural society was changed by war politics agrarian and industrial development

Agricultural Knowledge Networks in Rural Europe, 1700-2000 Yves Segers, Leen Van Molle, 2022 An examination of how farming expertise could be shared and extended over four centuries All kinds of knowledge from traditional know how to modern science are socially contingent and the product of an age long and permanent social struggle This book unravels the creation and the exchange of agronomic knowledge in rural Europe from the early eighteenth century up until the end of the twentieth It explores the spreading of knowing through the lens of knowledge networks where did agricultural knowledge come from and how did one learn to run a farm Who was involved in this process of knowledge exchange Which strategies and communicative methods were employed and what kind of networks were active The answers to these questions mirror as the book illustrates the inventiveness of the actors on the scene the creativity of a French naturalist in establishing links with local farmers to stop the circulation of a devastating grain moth the power of the agricultural press to instill proper values into Hungarian farming practices or to shape the identity of the Galician agrarian movement and the agency of post war British farmers in selecting their own information from sources such as lectures to the Young Farmers Club visits by public advisors and representatives of commercial firms and radio programs From the start of the agricultural Enlightenment increasingly farmers have been besieged by a growing army of experts telling them what to do when and how In a sense farming has become one of the most patronised professions But farmers can resist and carve their own path The chapters here reveal the continuous tensions between science based agriculture and practice based farming between the expert image of an ideal agriculture and the less known self image of being a good farmer The dominant process as this book shows is that of an instrumental top down transmission of knowledge from the lab to the field But between these two poles complex and flourishing networks developed functioning as trading zones in which knowledge and experience could be circulated put to the test forgotten altered rejected and sometimes imposed

Farm Accounts in Rural Europe, C. 1700-1914 Nathalie Joly, Fulgence Delleaux, James D. Fisher, 2025-06-03 Analyses how book keeping and estate accounting transformed attitudes and practices in farm management over three centuries of European history From the eighteenth until well into the twentieth century an ideal model developed of a farmer as accountant who would record economic transactions meticulously tidy book keeping was regarded as the basis of sound management and only those who accurately dealt with finances would survive and thrive It is clear that this happened in both theory and practice with growing numbers of farmers men and women keeping increasingly

formalized records of their businesses during this period a wide range of valuable documentation originating from large estates small sharecroppers tenant and owner farmers alike has survived Drawing on that rich body of sources this book examines book keeping and account practices in farm management across Europe with case studies ranging from Westphalia and the Rhineland to France and Switzerland over three centuries It considers who kept these records and their motivations how practices changed and developed across the period and in what ways and to what extent accounts and accounting influenced the development of agriculture It also examines the role of farmers own organisations and government in encouraging higher standards of accounting The Introduction and chapters 7 and 9 are available as Open Access under the Creative Commons licence CC BY NC ND *International Labour Migration to Europe's Rural Regions* Johan Fredrik Rye, Karen O'Reilly, 2020-10-18 Emerging in the throes of a global pandemic that threatens Europe's economies and food security *International Labour Migration to Europe's Rural Regions* combines a diverse range of empirically rich in depth case studies analysis of their rural context specificities and insights from labour market and migration theories to critically examine the conditions and implications of rural labour migration Despite its growing political economic and social importance our understanding of international labour migration to Europe's rural regions remains limited This edited volume provides intricate descriptions of lived experience critical theoretical analyses analytical synthesis and policy recommendations for this novel and developing phenomenon that has the potential to transform the lives of international migrants and local communities The book's 25 authors represent a wide range of social science disciplines with coverage of a vast range of Europe's rural regions and diverse types of rural labour in areas such as horticulture shepherding wild berry picking and fish processing The volume will be of interest to policy makers at local regional national and European levels and scholars and students in a broad range of areas including migration labour markets and rural studies This book is available for free in PDF format as Open Access from the individual product page at www.routledge.com **The Future of Europe's Rural Peripheries** Lois Labrianidis, 2017-11-30 Bringing together case studies from Germany Greece Poland Portugal and the UK this book examines the contribution of entrepreneurial ventures and new technology in stimulating economic development in rural locations It looks at instances of good practice in terms of both public and private initiatives and develops a coherent combination of policy objectives facilitating the long term economic development of the countryside Firstly analyzing the key causes and effects of economic restructuring currently affecting Europe's rural areas the book then explores the consequences that European integration and globalization have had and will have in future It identifies sources of entrepreneurship and examines their distribution between different gender age and other social groupings The book continues to evaluate the extent to which the existing institutional social and technological environment and infrastructure encourages and facilitates entrepreneurship **Globalization and Europe's Rural Regions** Birte Nienaber, 2016-03-03 This book examines the multiple ways in which rural regions in Europe are being restructured through globalization and the

regional development responses that they have adopted. It provides an understanding of the key challenges and opportunities for rural regions arising from the major economic, social, political and cultural changes associated with globalization, including trade liberalization and economic deregulation, increased international migration and the rise of global consciousness about environmental issues. Drawing on examples and findings from a major European research project DERREG, the book presents detailed case studies of ten regions in different parts of Europe, exploring the factors that lead to different experiences of globalization in each of the regions and highlighting examples of good practice in regional development responses. The book concludes by proposing a typology of regional responses to globalization and considering the policy implications of the research findings. As such, *Globalization and Europe's Rural Regions* is important reading for geographers, sociologists, planners and economists interested in understanding the impact of globalization in rural regions and for rural development professionals seeking to mobilize effective responses. *Congress of Local and Regional Authorities of Europe Texts adopted March 2002, 8th session* Council of Europe, **Women in the European Countryside** Henry Buller, 2017-11-28. Much of the literature published so far on gender relations in rural areas has either focused on comparisons of the position of men and women or explored the position of women given prevailing structural forces and behavioural norms that restrict the autonomy of women as human agents. This groundbreaking book broadens the debate by developing our understanding of how societal processes produce and sustain gender divisions, particularly in rural areas, highlighting aspects of rural women's lives previously invisible in the literature. Illustrated by case studies from France, Germany, Greece, Norway and Sweden, the book examines the critical issues of education and training, entrepreneurship, leadership, limited work and service opportunities, social mobility and work experiences. In doing so, the contributors provide a fascinating comparative study of both national, regional and broader European realities. **Mapping the Spatial Divisions of Europe** Guy Baudelle, Emmanuelle Boulineau, 2025-08-26 **Employment Dynamics in Rural Europe** Ida J. Terluin, Jaap H. Post, 2000. Annotation: In many European countries, there has been a decline in the agricultural labour force, providing a major challenge for the rural economy and society. This book provides an analysis of rural employment dynamics in European Union (EU) member states. *Three Decades of Transformation in the East-Central European Countryside* Jerzy Bański, 2019-06-26. This book identifies, diagnoses and evaluates social and economic processes taking place in the rural areas of Central and Eastern Europe (CEE) states in the last 25 years and affecting the immediate future, with a particular focus on their spatial diversity. It addresses questions related to the rationality of the current development policy and possible results in the future. Contemporary processes of socio-economic development are typified by the fact that spatial and regional disparities are tending to increase. This unfavourable phenomenon, manifested both in society and in terms of polarised space, needs to be counteracted using an effective development policy. The book highlights issues concerning demography, functional structure and non-agricultural activity and identifies new challenges arising from membership of the European Union (EU). Accession to

the EU and the opportunity to implement support measures has further increased the dynamism of transformation a processthat proceeded under various scenarios and different regulations and assumptions that have yet to be identified and evaluated Furthermore the current internal policies of individual CEE states concerning rural areas are diverse and likely to affect differential future development The book is based on the knowledge and experience of scientists from countries in the region investigated who have the best understanding of the subject matter and have observed the transformations It is intended for researchers exploring the development of the countryside and practitioners dealing with regional and national development policies targeting rural areas

The Geography of Western Europe Paul L Knox,2015-11-19 This book provides a comprehensive survey of the social geography of Western Europe It begins by outlining the character of the region nad proceeds with an exploration of demographic and cultural features including migration and ethnic groups The political organisation of nations and regions are analysed along with regional change and development The study concludes with a consideration of key issues central to the geography of social well being such as regional convergence divergence and the impact of public expenditure patterns

Curtis,2011-12-15 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development
