Social Economy in China and the World Ngai Pun, Ben Hok-bun Ku, Hairong Yan, Anita Koo, 2015-08-20 Thirty years of economic transformation has turned China into one of the major players in the global capitalist economy. However its economic growth has generated rising problems in inequality, alienation and sustainability with the agrarian crises of the 1990s giving rise to real social outcry to the extent that they became the object of central government policy reformulations. Contributing to a paradigm shift in the theory and practices of economic development, this book examines the concept of social economy in China and around the world. It offers to rethink space economy and community in a trans border context which moves us beyond both planned and market economies. The chapters address theoretical issues, critical reflections and case studies on the practice of social economy in the context of globalization and its attempt to create an alternative modernity. Through this the book builds a platform for further cross disciplinary and cross boundary dialogue on the future of social economy in China and the world. With examples from Asia, North America, Latin America and Europe, this book will not only appeal to students and scholars of Chinese and Asian social policy and development but also those of social economy from an international perspective. *Chinese Environment & Development*, 1996. Chinese Economic Studies, 1998. [China and the West](#) Jerome Ch'en, 2018-10-10 This penetrating study of China's social and cultural contacts with the West, first published in 1979, analyses the early images that China and the West had of one another and the illusions and misconceptions that arose from these images. The book centres on the question why did China fail to become modernised through contact with the West before the 1930s. The author examines the roles played by the agents of change: emigrants, missionaries, traders, scholars and diplomats, and the political, economic, social and cultural developments which the transmission of their ideas set in motion. The book also looks at the ways in which change was frustrated by the rulers of the country, the leaders of the imperial government and later the warlords, politicians and followers of Chiang Kai shek. Through the author's analysis of the complex factors involved, based on extensive original research into private archive material from all over the world and his study of the influence of centuries of Chinese cultural tradition, China's slow path to modernisation is explained and illuminated. [Rural Revitalization Through State-led Programs](#) Mingrui Shen, 2020-02-06 This book seeks to unravel the changes in rural governance sparked by state led programs, evaluate the programs implementation and refine the interpretation of governance theory with new empirical material from rural China. When it comes to rural issues in contemporary China, there is no shortage of national strategies from Coordinating Urban Rural Development in 2003 to Rural Revitalization in 2017. The rejuvenation of the countryside has attracted unprecedented policy interest. At the same time, rural governance has been subject to significant political, social and economic changes. However, comparatively little research has been conducted on the phenomenal reconnection between the state and rural society, and our previous understanding of rural governance is no longer adequate. As a result of the programs, a new model of

governance is now emerging in rural China The programs have accelerated the formation of state private farmer partnerships while also promoting the participation of grassroots society in rural reconstruction In the initial stage the state's role is important to securing non governmental sectors engagement However this does not mean that the model guarantees sustainable governance in terms of land tenure reform infrastructure investment and subsidies the programs merely empower farmers and other stakeholders to engage in rural reconstruction The success of these reconstruction efforts ultimately depends on a suitable pricing mechanism for public goods provision as well as the self organization of grassroots society **Labour Research** ,1951 **Accession List** University of Wisconsin--Madison. Library,1978 *China's Economic Culture* Carsten Herrmann-Pillath,2016-10-04 China's spectacular rise challenges established economic moulds both at the national level with the concept of state capitalism and at the firm level with the notion of indigenous Chinese management practices However both Chinese and Western observers emphasise the transitional nature of the reforms thereby leaving open the question as to whether China's reform process is really a fast catch up process with ultimate convergence to global standards or something different This book by a leading economist and sinologist argues that culture is an exceptionally useful tool to help understand fully the current picture of the Chinese economy Drawing on a range of disciplines including social psychology cognitive sciences institutional economics and Chinese studies the book examines long run path dependencies and cultural legacies and shows how these contribute crucially to the current cultural construction of economic systems business organisations and patterns of embedding the economy into society and politics Information on Land Reform, Land Settlement, and Co-operatives ,1988 **Accession List** ,1975 *World Agricultural Economics and Rural Sociology Abstracts* ,1981 *Asian Bibliography* ,1981

Authority and Legitimacy in Post-revolution Rural Kwangtung Anne Fritter Thurston,1975 Economic Development in China, India and East Asia Kartik Chandra Roy,Hans-Christer Blomqvist,Cal Clark,2012-01-01 This is an unusually rich and comprehensive comparative analysis of industrialisation and development in Asia Drawing on the diverse experiences of Malaysia Singapore China India and more Roy Blomqvist and Clark skilfully tease out the common institutional threads and the subtle differences in their developmental trajectories An essential reading for all those interested in the lessons from Asian development Jude Howell London School of Economics UK This is a thorough and comprehensive study both in terms of country coverage and in depth analysis covering the economic development of all the major economies in the Asian continent namely China India Japan South Korea Taiwan Malaysia and Singapore Before embarking on analyses of different aspects of economic growth and development of these countries the authors present a thought provoking analysis of how institutional factors such as geography history of religion culture and political governance have been deeply interwoven with development dynamics to shape the growth and development trajectory that each country has subsequently followed Each country's development path consequently appeared almost be pre determined Japan's role as

the lead country in technology transfer under the flying geese pattern of development is discussed however the emphasis has shifted of late to China India Korea Malaysia and Singapore the authors also propose that instead of discussing the failure of India to catch up with China in growth and development outcomes economists should be commenting on whether China bestowed with India's highly decentralized democratic governance structure and institutional rigidities would have been able to achieve the same results as that of India Only then will a true understanding and appreciation of India's achievements in economic growth and development emerge Economic Development in China India and East Asia will be warmly welcomed and appreciated by academics and researchers of international and development economics as well as Asian development and economics Policy makers and those involved in NGOs in the development and aid arenas will also find this of great interest
