*Regional Overview of Food Security and Nutrition in Latin America and the Caribbean 2020* Food and Agriculture Organization of the United Nations ,World Food Programme ,United Nations International Children's Fund ,International Fund for Agricultural Development ,Pan American Health Organization ,2021-05-19 The goals of the 2030 Agenda for Sustainable Development that are related to food security and nutrition will not be achieved as long as in some territories in Latin America and the Caribbean populations continue to live with malnutrition rates Economic opportunities in these areas are often limited public services are scant and exposure to severe climate events is high The public policies promoted in the region have had less impact in these historically lagging territories and there is a pressing need to produce a new agenda of public instruments that address the characteristics of the communities that inhabit them The full and sustainable development of the territories that are falling behind is not only an obligation in terms of the realization of the rights of their inhabitants it would also allow these territories to activate their social economic environmental and cultural potential to the benefit of all societies It is hoped that the 2020 Regional Overview will help to highlight the challenges experienced by the territories with the worst indicators in terms of food and nutrition and that it will serve to mobilize political commitment and public attention towards those areas

that are most highly lagging The year 2020 will be remembered for many decades as the year of the COVID 19 pandemic The indicators of the 2030 Agenda that are used in this publication do not yet show the different impacts of COVID 19 However there are references to the possible implications of the pandemic for the future
