Farmers and Village Life in Twentieth-century Japan Ann Waswo, Nishida Yoshiaki, 2003 Rural Japan during the twentieth century has been portrayed as a vast reservoir of conservatism in much of the literature on Japan's modern development and Japanese agriculture since the 1960s has been treated as an artificial creation sustained only by protectionism of the worst sort This book presents a range of original in depth work including work by Japanese scholars that seeks to move beyond such stereotypes to reveal the diversity and complexities of rural life in Japan from 1900 to the present New Dimensions in Agricultural Geography Noor Mohammad, 1992 *Women in Agriculture*, 1993 Covers the period 1975-1989 *Report of the director of the Extension Service* United States. Federal Extension Service, 1930 **Agriculture in the Americas**, 1941 **Class, Gender, and the American Family Farm in the 20th Century** Elizabeth Ramey, 2014-04-24 Integrating a focus on gender with Marx's surplus based notion of class this book offers a one of a kind analysis of family farms in the United States The analysis shows how gender and class struggles developed during important moments in the history of these family farms shaped the trajectory of U S agricultural development It also generates surprising insights about the family farm we thought we knew as well as the food and agricultural system today Elizabeth A Ramey theorizes the family farm as a complex hybrid of mostly feudal and ancient class structures This class based definition of the family farm yields unique insights into three broad aspects of U S agricultural history First the analysis highlights the crucial yet under recognized role of farm women and children's unpaid labor in subsidizing the family farm Second it allows for a new class based perspective on the roots of the twentieth century miracle of productivity in U S agriculture and finally the book demonstrates how the unique set of contradictions and circumstances facing family farmers during the early twentieth century including class exploitation was connected to concern for their ability to serve the needs of U S industrial capitalist development The argument presented here highlights the significant costs associated with the intensification of exploitation in the transition to industrial agriculture in the U S When viewed through the lens of class the hallowed family farm becomes an example of one of the most exploitative institutions in the U S economy This book is suitable for students who study economic history agricultural studies and labor economics Annual Report of the Secretary of the State Board
