Modeling and Analysis of Conventional Defense in Europe Reiner K. Huber, 2012-12-06 This book presents a collection of contributions to a workshop on Long term Development of NATO s Conventional Forward Defense to which the GERMAN STRATEGY FORUM DSF had invited some 50 systems analysts and defense experts of the United States the United Kingdom the Federal Republic of Germany and the SHAPE Technical Centre Held in Bonn from 2 to 4 December 1984 this workshop was to provide a forum for the discussion at a non political expert level and in the light of available analysis results of proposals for the improvement of NATO s conventional defense capabilities In addition it aimed at arriving at some recommendations as to which of these proposals deserve to be studied further and what methodological deficiencies must be alleviated and information gaps closed for an adequate assessment The idea to organize this workshop has been discussed ever since 1980 with several defense systems analysts in the US and the UK who shared the opinion that with a view to the immense global build up of the Soviet threat on one hand and the stringency of defense resources in most NATO countries on the other there is no reason that could permit us to dismiss any proposal promising improvement without careful study

Arms Control And Defense Postures In The 1980s Richard Burt, 2019-08-27 The current standstill in U S Soviet arms limitation negotiations has raised a number of questions about the effectiveness of arms limitation treaties whether it is possible to negotiate an arms control agreement that would actually cut back on U S and Soviet strategic arsenals and how such an arms reduction could be accomplished The authors of this book explore the problems of arms competition in the 1980s and stress the need for a complete reassessment of U S security interests lest negotiations become curiously disconnected from defense policy To protect national interests they assert future arms limitation talks must allow for effective unilateral response to new classes of military problems and technologies Each contributor addresses a specific area of arms negotiations identifying various

options outlining potential outcomes and discussing whether the talks actually are focusing on the right military issues The book also provides an overview of previous U S arms limitation strategies and describes the Soviet approach to integrating national security with arms control policies _ NATO ,1979 *The Defence of the Realm in the 1980s* Dan Smith,2021-01-26 This book first published in 1980 is a close analysis of Britain s defence policy in the latter years of the Cold War It examines the factors that limited the choices available to the governments of the day including technological advances costs changes in the balance of power strategic thinking in both West and East and the consequent implications for the development of forces and arms *The Publishers' Trade List Annual* ,1989 [The Falklands War](#) Daniel K. Gibran,2015-08-01 The Falklands War is an ideal showcase for how British policy evolved in the 1970s and 1980s The background of the dispute over the island group in the remote South Atlantic called Las Malvinas by the Argentines is given first then the events that precipitated the 1982 conflict and extensive examination of the military aspects of the war are provided An overview follows of the many hypotheses offered for the British motivation to recapture the Falklands showing that only those theories pertaining to the British perception of their national honor and the defense of democratic principles are significant The Falklands War did not result in a dramatic shift in British defense policy but did show the importance of external developments and political realism in policy formation and these considerations are fully detailed here [China, an Analytical Survey of Literature](#) United States.
