New Conventional Weapons and Western Defence Ian Bellany, Tim Huxley, 2013-11-26 Giving an overview of research and development in weaponry in the maritime and aviation sphere as well as land based technology this study looks forward to the effects of emerging innovations on defence policy making *Armed Forces*, 1982 **Nuclear Weapons and NATO** United States. Department of the Army, 1975 **Military Review**, 2005 **British Weapons Acquisition Policy and the Futility of Reform** Warren A. Chin, 2019-09-17 Originally published in 2004 This incisive work reveals the causes of escalating costs and delays in British defence procurement from 1945 to the present Tackling a complex subject in a straightforward and readable manner it considers how successive British governments reacted to this problem why they adopted the reforms they did and why these reforms failed to have any meaningful effect on the operation of this process The study draws upon a number of disciplines such as economics politics and science and engineering to provide a broad synthesis that allows the reader to understand the technicalities of the process The conclusion reached is that there is no apparent solution to the problem of intergenerational costs of weapons but that a key to controlling the growing cost of projects during their development lies in the construction of a more effective research and development strategy a path followed by Margaret Thatcher s predecessors and one that is also being advocated today **Nonoffensive Defence** David Gates, 1991-06-18 Throughout the 1980s numerous calls were made for Nato to change its strategy to one in which nuclear

weapons played either a much smaller role or none at all Among proposed alternatives were several so called defensive strategies This book examines these alternatives *Iran and the Gulf: A Search for Stability* Prof. Jamal Sanad Al-Suwaidi, This volume presents the research and analyses of internationally recognized scholars concerning the internal and external dynamics which affect and often determine the policies of the Islamic Republic of Iran Following an introduction designed to provide an analytical and contextual backdrop the volume begins with a detailed look at the Iranian polity its evolution before and after the revolution and the role of ideology The next section addresses Iranian foreign policy with respect to the Arab Gulf states as a function of domestic dynamics and as a response to regional and international events and constraints The third section discusses Iran s military capabilities and includes reasoned judgments concerning the Islamic Republic s intentions and aspirations in the military realm The book concludes with a discussion of the evolving relationship between the GCC states and Iran with particular focus on the security dynamics that attend that relationship for the foreseeable future This timely and comprehensive work acknowledges Iran s important and immutable role in Gulf affairs and particularly in Gulf security affairs It also acknowledges the important evolution in Iranian foreign policy which has occurred since the revolution of 1979 and particularly since the death of the Iranian revolutionary leader Ayatollah Ruhollah Khomeini
