Vodka Politics Mark Lawrence Schrad,2014-02-05 Russia is famous for its vodka and its culture of extreme intoxication But just as vodka is central to the lives of many Russians it is also central to understanding Russian history and politics In **Vodka Politics** Mark Lawrence Schrad argues that debilitating societal alcoholism is not hard wired into Russians genetic code but rather their autocratic political system which has long wielded vodka as a tool of statecraft Through a series of historical investigations stretching from Ivan the Terrible through Vladimir Putin **Vodka Politics** presents the secret history of the Russian state itself a history that is drenched in liquor Scrutinizing rather than dismissing the role of alcohol in Russian politics yields a more nuanced understanding of Russian history itself from palace intrigues under the tsars to the drunken antics of Soviet and post Soviet leadership vodka is there in abundance Beyond vivid anecdotes Schrad scours original documents and archival evidence to answer provocative historical questions How have Russia s rulers used alcohol to solidify their autocratic rule What role did alcohol play in tsarist coups Was Nicholas II s ill fated prohibition a catalyst for the Bolshevik Revolution Could the Soviet Union have become a world power without liquor How did vodka politics contribute to the collapse of both communism and public health in the 1990s How can the Kremlin

overcome vodka's hurdles to produce greater social well-being, prosperity and democracy into the future. Viewing Russian history through the bottom of the vodka bottle helps us to understand why the liquor question remains important to Russian high politics even today, almost a century after the issue had been put to bed in most every other modern state. Indeed, recognizing and confronting vodka's devastating political legacies may be the greatest political challenge for this generation of Russia's leadership as well as the next.

The Complete Technology Book on Alcoholic and Non-Alcoholic Beverages (Fruit Juices, Whisky, Beer, Rum and Wine) NPCS Board of Consultants & Engineers, 2008-10-01

The alcoholic and non-alcoholic beverages are being used by human beings since centuries back. Accompanying the increase in the variety of consumption, there has been a parallel increase in the variety of alcoholic and non-alcoholic beverages offered for sale. The alcoholic drinks market is broadly classified into five classes starting from beers, wines, hard liquors, liqueurs, and others. Similarly, the non-alcoholic drinks market is broadly classified into carbonated drinks, non-carbonated drinks, and hot beverages. These include juices, energy drinks, carbonated drinks, tea, coffee, and bottled water. The commercial success of a soft drink formulation depends upon a number of factors. A strong well-placed advertising campaign will bring the consumer to purchase the new product, but thereafter the level of repeat sales will reflect the degree of enthusiasm with which the new drink has been received. The dramatic growth of fruit juice and non-carbonated fruit beverage markets worldwide has been made possible by the development of new packs and packing systems and improvements in traditional packaging. Tropical fruits are the newest arrivals on the juice and fruit beverage market. Whisky is the portable spirit obtained by distillation of aqueous extract of an infusion of malted barley and other cereals that has been fermented. It can be considered as the product of distillation of an unhopped beer. Beer is the world's most widely consumed alcoholic beverage; it is the third most popular drink overall after water and tea. Rum is a distilled alcoholic beverage made from sugarcane by products such as molasses or directly from sugarcane juice by a process of fermentation and distillation. The Indian alcoholic market has been growing rapidly for the last ten years due to the positive impact of demographic trends and expected changes like rising income levels, changing age profile, changing lifestyles, and reduction in beverage prices. Some of the fundamentals of the book are flavourings and emulsions, syrup, room operation, fruit juices, and comminuted bases, acids, colours, preservatives, and other additives, high intensity sweeteners, packaging systems for fruit juices and non-carbonated beverages, grape juice processing, processing of citrus juices, juice processing for pasteurized single strength, equipment for extraction and processing of soft and pome fruit juices, chemistry and technology of citrus juices and by-products, legislation controlling production, labelling and marketing, biochemical events during brewing, fermentations, outline of the whisky producing process, types of beer, brewed aroma compounds of rum and their formation, cider and perry, etc. The alcoholic and non-alcoholic beverages described in this book are beer, wine, rum, whisky, cider, and different types of fruit juices with packaging systems and other relevant parameters related to their manufacturing. The book will be very helpful to technocrats, new
