Century Anne Swartz, 2014-08-01 *Piano Makers in Russia in the Nineteenth Century* is a richly detailed thematic study of the history of the piano in Russian society from its beginnings with the European artisans who settled in St Petersburg in the early decades of the century through the transition to Russian owned family firms. The piano played a defining role in the shaping of Russia's musical culture in the nineteenth century as artisans and entrepreneurs provided the foundation for the great tradition of the Russian virtuoso in the performance and the composition of piano music. It also helped bring about a transformative change in the material culture as the piano expanded its reach from the court and the nobility to include music enthusiasts from all social classes and Russian families in their homes. This historical study brings to light the impact of neglected piano artisans in nineteenth century Russia and presents a fresh view of the social and economic ties between the state and the piano manufacturing artisans in an era largely defined by handcrafting and entrepreneurship. It contributes significantly to current issues surrounding the role of the piano and the entrepreneur artisans in the urban centers of imperial Russia and represents an expansion of what is currently known about the piano builders who established workshops in Russia beginning in the late 1830s and 1840s well before the heyday of the virtuoso in that country. Rare documents including letters, memoirs, gazettes, exhibition catalogs, music journals, and administrative reports form the nucleus of this book and provide fascinating insights about state and private patronage and the class economic issues related to the affordability and prestige of the piano in Russia. Issues surrounding the transformation of the music industry in Russia, the role of women as patrons and performers, the exportation of instruments to the Russian Far East, and the complex system of tariffs and trade protection that benefited domestic piano manufacturers provide this book's thematic links. Conclusions indicate that while favorable tariff laws and state imposed economic policies benefited the family owned firms in the nineteenth century, they remained in effect in the decades after the nationalization of the piano industry in 1917. Russian Policy Towards China and Japan Natasha Kuhrt, 2007-12-24 Drawing on the most up to date sources, this book provides an in depth examination of Russia's relations with China and Japan, the two Asia Pacific superpowers in waiting. For Russia, there has always been more than one Asia; after the collapse of the Soviet Union, there were those in the Russian elite who saw Asia as implying the economic dynamism of the Asia Pacific, with Japan as the main player. However, there were others who saw the chance for Russia to reassert its claim to be a great power based on Russia's geopolitical and geoeconomic position as a Eurasian power. For these, China was the power to engage with; together, China and Russia could control both Heartland and Rim, both Eurasia and Asia Pacific, whereas accepting Japan's conception of Asia implied regional fragmentation and shared sovereignty. This book argues that this strand of thinking, mainly confined to nationalists in the Eltsin years, has now under Putin become the dominant discourse among Russian policymakers. Despite opportunities for convergence presented by energy resources, even for trilateral cooperation, traditional anxiety regarding loss of control over key resource areas in the Russian Far East is now used to inform regional policy, leading to a new resource nationalism. In light of Russia's new

assertiveness in global affairs and its increasing use of the so called energy weapon in foreign policy this book will appeal not only to specialists on Russian politics and foreign policy but also to international relations scholars China and Eurasian Powers in a Multipolar World Order 2.0 Mher Sahakyan, 2023-03-31 This book argues that the world order is no longer unipolar and the war in Ukraine proves this fact As this study describes and theorizes it has been transformed into a Multipolar World Order 2.0 stage This title critically examines Chinese US Russian EU Indian and a number of other powers cooperation and competition over security diplomatic economic and cyberspace issues Accomplished scholars from various regions of the Eurasian continent consider the impact of the Russo Ukrainian war the Sino Russian strategic partnership China's relations with the United States and the European Union the influence of the Belt and Road Initiative the expansion of the Shanghai Cooperation Organization and Eurasian Economic Union China's policies in the Middle East Central Asia Indo Asia Pacific the South Caucasus Central and Eastern Europe as well as focus on details of growing contradictions and collaboration in the Eurasian continent over markets technologies digital leadership vaccine distribution and financial institutions in the Era of Multipolar World Order 2.0 Showing that the US centred unipolar world order is replaced by Multipolar World Order 2.0 where conflicting powers fight to keep or extend their spheres of influence this volume is of great interest to decision makers diplomats scholars and students of international relations politics global governance Eurasian studies Chinese studies cybersecurity and economics and for those studying human security international organizations and geopolitics **Central Eurasian States** David F. wars continue to occur recent scholarship has made progress toward developing more sophisticated and perhaps more useful theories on the causes and prevention of war This volume includes essays by leading scholars on contemporary approaches to understanding war and peace The essays include expositions analyses and critiques of some of the more prominent and enduring explanations of war Several authors discuss realist theories of war which focus on the distribution of power and the potential for offensive war Others examine the prominent hypothesis that the spread of democracy will usher in an era of peace In light of the apparent increase in nationalism and ethnic conflict several authors present hypotheses on how nationalism causes war and how such wars can be controlled Contributors also engage in a vigorous debate on whether international institutions can promote peace In a section on war and peace in the changing international system several authors consider whether rising levels of international economic independence and environmental scarcity will influence the likelihood of war

Building Democracy in Contemporary Russia Sarah Henderson, 2003 Can foreign donors help build new democracies In the 1990s public and private organizations such as USAID and the Soros Foundation poured huge amounts of money and expertise into Russia to help build the dream of a vibrant democratic society Sarah L Henderson argues that despite the altruistic intentions of foreign assistance agencies and domestic activists foreign aid designed to spur civic growth has had unintended consequences Drawing on extensive field work survey research and work experience for several funding agencies in Moscow in the late 1990s Henderson focuses on donor efforts to support the emerging community of nongovernmental organizations and in particular on efforts to build a functioning women s movement in Russia Her intimate knowledge of Russia s growing NGO community informs a worrisome finding foreign aid has made a tremendous difference but not in altogether expected or positive ways New Russian civic groups serve either the needs of an indigenous clientele or the demands of the foreign aid bureaucracy but rarely both Henderson s research and experience show that while aid has kept a fledgling civic community alive it is a civic community that is disconnected from its own domestic audience The book suggests that large flows of foreign aid have in some ways damaged the long term prospects for democratization in Russia
