Luigi Snozzi 1957-1984:

Luigi Snozzi Claude Lichtenstein, 1997 **Resisting Postmodern Architecture** Stylianos Giamarellos, 2022-01-10
Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place, resisting the homogenising onslaught of globalisation. Today its main principles such as acknowledging the climate, history, materials, culture and topography of a specific place are integrated in architects' education across the globe. But at the same time the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture, the diverse contexts from which it emerged, and the cultural media complex that conditioned its reception. In so doing it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism, and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice. Stylianos Giamarellos challenges long-held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history and historiography. **Luigi Snozzi** Luigi Snozzi, 1988 *The Multi-Skilled Designer* Newton D'souza, 2019-11-21 *The Multi-Skilled Designer* presents and analyzes different approaches to contemporary architectural design and interprets them through the theory of multiple intelligences. The book establishes a systematic framework that uses the lens of cognitive psychology and developments in psychometric and brain research to analyze the unique cognitive thought processes of architectural designers and compiles design projects that could serve as a pedagogical companion for the reader. The book is aimed at design practitioners and students interested in examining their own thinking styles as well as those involved in design cognition research. **Mario Botta, Architecture, 1960-1985** Mario Botta, Francesco Dal Co, 1985 Mario Botta was born in Switzerland in 1943. Botta trained as a technical draftsman and was an assistant to Le Corbusier and later Louis Kahn. In 1970 he opened his own practice in Lugano, Switzerland. His approach is essentially modernist and he has been strongly influenced by both Carlo Scarpa and Louis Kahn. Botta's work is characterized by respect for topographical conditions and regional sensibilities, and his designs generally emphasize craftsmanship and geometric order. He has attempted to reconcile traditional architectural symbolism with the aesthetic rules of the Modern Movement. Botta built exclusively in Switzerland during his early career, gaining international acclaim for such buildings as the Capuchin convent in Lugano, the Craft Centre in Balerna, and the Administration Building for the Staatsbank in Fribourg. *The Architectural Review*, 1987 **Bibliographic Guide to Art**
