Biological Rhythms Jurgen Aschoff, 2013-03-09 Interest in biological rhythms has been traced back more than 2 500 ears to Archilochus the Greek poet who in one of his fragments suggests i VWO KE o olos pv J tos txv pW7rOVS XH recognize what rhythm governs man Aschoff 1974 Reference can also be made to the French student of medicine J J Virey who in his thesis of 1814 used for the first time the expression horloge vivante living clock to describe daily rhythms and to D C W

Hufeland 1779 who called the 24 hour period the unit of our natural chronology However it was not until the 1930s that real progress was made in the analysis of biological rhythms and Erwin Bunning was encouraged to publish the first and still not outdated monograph in the field in 1958 Two years later in the middle of exciting discoveries we took a breather at the Cold Spring Harbor Symposium on Biological Clocks Its survey on rules considered valid at that time and Pittendrigh's anticipating view on the temporal organization of living systems made it a milestone on our way from a more formalistic description of biological rhythms to the understanding of their structural and physiological basis [Routledge Handbook of Space Policy](#) Thomas Hoerber, Mariel Borowitz, Antonella Forganni, Bruno Reynaud de Sousa, 2024-12-30 This volume offers a comprehensive overview of the field of space policy Space is a technology driven domain and policy development has accelerated in recent years at a time when the space economy has begun to show remarkable potential Thus this handbook gathers experts from different fields with the aim of 1 offering an overview of the state of play regarding space policy issues and 2 expanding knowledge about possible future developments Given the cross disciplinary nature of the subject and its vast scope the authors contributions are grouped within different thematic sections as follows Theoretical structures for an understanding of space policies The history of space Society justice and the human impact Governance of space Popularisation of space New frontiers in space and expansion into the unknown World space policies by geographic areas The introduction and the conclusion chapters provide a coherent connection between the contributions with each section presenting transversal themes such as power dynamics and rules commercialisation sustainability militarisation applications and domestic use and justice This volume will be of much interest to students of space policy and power security studies and international relations [NASA Technical Memorandum](#), 1963 [Back to the Moon](#) Joseph Silk, 2025-09-23 A scientist's inspiring vision of our return to the Moon as humanity's next thrilling step in space exploration Just over half a century since Neil Armstrong first stepped foot on the lunar surface a new space race to the Moon is well underway and rapidly gaining momentum Laying out a vision for the next fifty years Back to the Moon is astrophysicist Joseph Silk's persuasive and impassioned case for putting scientific discovery at the forefront of lunar exploration The Moon offers opportunities beyond our wildest imaginings and plans to return are rapidly gaining momentum around the world NASA aims to build a habitable orbiting space station to coordinate lunar development and exploration while European and Chinese space agencies are planning lunar villages and the mining of precious resources dwindling here on Earth Powerful international and commercial interests are driving the race to revisit the Moon but lunar infrastructures could also open breathtaking vistas onto the cosmos Silk describes how the colonization of the Moon could usher in a thrilling new age of scientific exploration and lays out what the next fifty years of lunar science might look like With lunar telescopes of unprecedented size situated in permanently dark polar craters and on the far side of the Moon we could finally be poised to answer some of the most profound questions confronting humankind including whether we are alone in the Universe and what our cosmic origins are

Neither rational choice theory with its emphasis on interest calculation nor sociological institutionalist theory with its emphasis on identity defined rule following indicates how governments determine which of their multiple interests or identities are at stake in a particular situation or how they develop mutual comprehension of each other s goals International Regimes for the Final Frontier addresses these gaps by tracing how governments approach an unfamiliar issue in this case international agreements regulating human activity in outer space between 1958 and 1988 and examines three ways situation definitions channel governments approaches to issues or problems *Still As Bright* Christopher

Cokinos,2024-04-02 An immersive exploration of the nightly presence that has captured our imagination for the entirety of human history When the Moon rises between buildings or over trees it s not just a beautiful light It s an archive of human longing fear and adventure The Moon is more than a rock It s a story In the luminously told *Still s Bright* the story of the Moon traverses time and space rendering a range of human experiences from the beliefs of ancient cultures to the science of Galileo s telescopic discoveries from the obsessions of colorful 19th century selenographers to the astronauts of Apollo and now Artemis *Still As Bright* also traces Cokinos s own lunar pilgrimage With his backyard telescope he explores the surface of the Moon while rooted in places both domestic and wild and this award winning poet and writer rediscovers feelings of solace love and wonder in the midst of loss and change Simultaneously steeped in rigorous cultural and scientific history as well as memoir *Still As Bright* is a thoughtful deeply moving evergreen natural history It takes readers on a lyrical journey that spans the human understanding of our closest celestial neighbor whose multi faceted appeal has worked on witches scientists poets engineers and even billionaires *Still As Bright* is a must read for anyone who has ever looked up into the night sky in awe and wonder Readers will never look at the Moon the same way again **Foundations of Space Biology**
