**Lupus Novice Toward Self Healing** Laura Chester,1989-05      **Lupus Novice** Laura Chester,1999 Recommended by Andrew Weil in Natural Health Natural Medicine Lupus Novice gives a moving account of the author's successful struggle with incurable SLE systemic lupus erythematosus affecting mostly women Ms Chester shares the personal discoveries behind her recovery and a meditation on what it means for a body to be attacking itself This enlarged edition updates her story and includes a foreword by the best selling authority on immune system disease the author of Chronic Fatigue Syndrome Dr Jesse Stoff Laura Chester has written a moving and significant book On one level she discusses her personal odyssey through the realm of a serious and inexplicable disease its history current cultural status biology symbolism and the doctors of all persuasions who attempt to cure it On another level she speaks to the esoteric level of the disease discussing the initiation into a deeper level of self and a journey through the unconscious and archetypal aspects of nature On this level she is an artist more than a patient an individual who has the power to effect her cure Richard Grossinger author of Planet Medicine

Reconstructing Illness Anne Hunsaker Hawkins,1999 Serious illness and mortality those most universal unavoidable and frightening of human experiences are the focus of this pioneering study which has been hailed as a telling and provocative commentary on our times As modern medicine has become more scientific and dispassionate a new literary genre has emerged pathography the personal narrative concerning illness treatment and sometimes death Hawkins's sensitive reading of numerous pathographies highlights the assumptions attitudes and myths that people bring to the medical encounter One factor emerges again and again in these case studies the tendency in contemporary medical practice to focus primarily not on the needs of the individual who is sick but on the condition that we call disease Pathography allows the individual person a voice one that asserts the importance of the experiential side of illness and thus restores the feeling thinking experiencing human being to the center of the medical enterprise Recommended for medical practitioners the clergy caregivers students of popular culture and the general reader Reconstructing Illness demonstrates that only when we hear both the doctor's and the patient's voice will we have a medicine that is truly human      **The Practice of Autonomy** Carl Schneider,1998

Exploring what patients do want gives direction to the author's inquiry into what they should want What patients want he believes is properly more complex and ambiguous than being empowered In this book he charts that ambiguity to take the autonomy principle past current pieties into the uncertain realities of the sick room and the hospital ward The Practice of Autonomy is a sympathetic but trenchant study of the animating principle of modern bioethics It speaks with freshness insight and even passion to bioethicists and moral philosophers about their theories to lawyers about their methods to medical sociologists about their subject to policy makers about their ambitions to doctors about their work and to patients about their lives BOOK JACKET      **Travels with the Wolf** Melissa Anne Goldstein,2000 The Lupus Foundation of America estimates that between 5 and 15 million people have been diagnosed with lupus a chronic autoimmune disease that can

attack any part of the body The elusive nature of the illness often becomes a source of overwhelming helplessness and frustration to its victims their loved ones and the physicians who treat it Narrated through both poetry and prose *Travels with the Wolf* is an autobiographical account of Melissa Anne Goldstein s experiences with lupus It is her story of becoming a young woman writer and teacher in the presence of severe often debilitating disease It is an exploration of her relationships with her family and friends as the illness steals into their lives and the record of her struggle to maintain her independence and identity despite disease Finally it is an author s journey to find her spiritual core This book is not just about lupus Goldstein uses her experience of the illness as well as sociological literary and historical research to portray and understand the dilemmas faced by the chronically ill person in our society In her conclusion she calls for reform of today s health care system which does not meet the needs of the chronically ill or their physicians

**Counting On Kindness** Wendy Lustbader,2010-05-11 Seattle mental health counselor Lustbader here compells attention to and sympathy for those who must rely on caregivers for their needs Stories are related by patients themselves From incapacitated men and women we learn of the humiliations caused by the loss of autonomy of the frustrations at not being able to manage on one s own Accounts from widely different sorts of patients and those who begrudgingly or willingly see to their care provide graphic lessons in sensitivity

**Good Days, Bad Days** Kathy Charmaz,1991 Describing how chronic illness affects one s self image friends and family this book shares the experiences of people with serious chronic illnesses and shows how they find the strength to carry on

Thomas Couser,1997-11-01 This is a provocative look at writing by and about people with illness or disability in particular HIV AIDS breast cancer deafness and paralysis who challenge the stigmas attached to their conditions by telling their lives in their own ways and on their own terms Discussing memoirs diaries collaborative narratives photo documentaries essays and other forms of life writing G Thomas Couser shows that these books are not primarily records of medical conditions they are a means for individuals to recover their bodies or those of loved ones from marginalization and impersonal medical discourse Responding to the recent growth of illness and disability narratives in the United States such works as Juliet Wittman s Breast Cancer Journal John Hockenberry s Moving Violations Paul Monette s Borrowed Time An AIDS Memoir and Lou Ann Walker s A Loss for Words The Story of Deafness in a Family Couser addresses questions of both poetics and politics He examines why and under what circumstances individuals choose to write about illness or disability what role plot plays in such narratives how and whether closure is achieved who assumes the prerogative of narration which conditions are most often represented and which literary conventions lend themselves to representing particular conditions By tracing the development of new subgenres of personal narrative in our time this book explores how explicit consideration of illness and disability has enriched the repertoire of life writing In addition Couser s discussion of medical discourse joins the current debate about whether the biomedical model is entirely conducive to humane care for ill and disabled people With its sympathetic critique of the testimony of those most affected by these conditions Recovering Bodies contributes to an understanding of the relations among bodily dysfunction cultural conventions and identity in contemporary America
