L. Howard, 2000-12-01 In this historical study conducted over a period of ten years the purpose has been to search out and record as far as possible all the plant contributions made by Luther Burbank of Santa Rosa California Burbank was born in Massachusetts in 1849 and died in Santa Rosa in 1926 During his working lifetime 1873 1926 he probably contributed or introduced more plants than any other single American in our history Many of his productions have been of great importance to horticulture past and present Yet no one hitherto has attempted to catalog them all giving their dates sources and descriptions sketching their history and estimating their value Burbank was not connected with a learned institution and indeed had little scientific training Starting his professional life as a market gardener in Massachusetts about 1870 he attempted to improve his vegetables by crossing varieties To meet competition he tried to produce earlier maturing types but he had little success because he did not then know the importance of continuing his crosses to the second and third generations His curiosity led him to sow the contents of a single seedpod that he found on a plant of the Early Rose potato a well known variety with a red skin Of the twenty odd seedlings that resulted one produced a cluster of tubers that were uniformly large smooth and white skinned This was sold to a dealer who named it the Burbank After seventy years this variety is still grown commercially in some parts of the country for example the Delta region of California In other places such as southern Idaho it has been improved slightly and renamed In Idaho alone it is the basis of a huge industry Like Thomas Edison Burbank was a self made man In the 1850s and 1860s he attended the village schools and for one year the Lancaster Academy This education though inadequate was better than most boys of his day enjoyed With his fathers death when Burbank was nineteen his schooling ended He had given much thought to the improvement of economic plants Darwins books especially *Variation of Animals and Plants under Domestication* strongly impressed his youthful mind and showed him how to attain improvements through variation and selection After his success with the potato he definitely decided to make plant breeding his lifework      **Luther Burbank's Plant Contributions** Walter Lafayette Howard, 1945

*Luther Burbank Spineless Cactus Identification Project* Roy Wiersma, 2008      *The Garden of Invention* Jane S. Smith, 2009 A chronicle of the life of the celebrated plant breeder evaluates the ways in which his achievements influenced the agricultural industry in early twentieth century America in a history that discusses the formative years of bioengineering and agribusiness as they were directly shaped by Burbank's gardening accomplishments      **The Plant Disease Reporter**, 1976      **The Plant Disease Bulletin**, 1976      **Plant Transformation Technologies** Charles Neal Stewart, Alisher Touraev, Vitaly Citovsky, Tzvi Tzfira, 2011-01-31 Plant Transformation Technologies is a comprehensive authoritative book focusing on cutting edge plant biotechnologies offering in depth forward looking information on methods for controlled and accurate genetic engineering In response to ever increasing pressure for precise and efficient integration of transgenes in plants many new technologies have been developed With complete coverage of these technologies Plant Transformation Technologies provides valuable insight on current and future plant transformation technologies With twenty five chapters written by international experts on transformation technologies the book includes new information on Agrobacterium targeting transgenes into plant genomes and new vectors and marker systems Including both review chapters and protocols for transformation Plant Transformation Technologies is vitally important to graduate students postdoctoral students and university and industry researchers      Plant Breeding Reviews, Volume 1 Jules Janick, 2011-01-11 Plant Breeding Reviews is an ongoing series presenting state of the art review articles on research in plant genetics especially the breeding of commercially important crops Articles perform the valuable function of collecting comparing and contrasting the primary journal literature in order to form an overview of the topic This detailed analysis bridges the gap between the specialized researcher and the broader community of plant scientists      **Experiment Station Record** United States. Office of Experiment Stations, 1947      **Evaluation of Introduced Plum Varieties** Robert L. Smith, Lloyd E. Joley, William L. Ackerman, 1964      *U.S. Forest Service Research Paper NC*. North Central Forest Experiment Station (Saint Paul, Minn.), 1966      Experiment Station Record U.S. Office of Experiment Stations, United States. Agricultural Research Service, United States. Office of Experiment Stations, 1909      **Horticultural Reviews, Volume 23** Jules Janick, 2010-04-07 Horticultural Reviews presents state of the art reviews on topics in horticultural science and technology covering both basic and applied research Topics covered include the horticulture of fruits vegetables nut crops and ornamentals These review articles written by world authorities bridge the gap between the specialized researcher and the broader community of horticultural scientists and teachers      The Encyclopedia of Fruit and Nuts Jules Janick, Robert E. Paull, 2008 Ever wanted to know the genus name for a coconut Intended for all your research needs this encyclopedia is a comprehensive collection of information on temperate and tropical fruit and nut crops Entries are grouped alphabetically by family and then by species making it easy to find the information you need Coverage includes palms and cacti as well as vegetable fruits of Solanaceae and Cucurbitaceae This book not only deals with the horticulture of the fruit and nut crops but also discusses the botany

making it a useful tool for anyone from scientists to gardeners and fruit hobbyists      *Seeds of Resistance* Mark Schapiro, 2018-09-18 Sun Soil Water Seed These are the primordial ingredients for the most essential activity of all on earth growing food All of these elements are being changed dramatically under the pressures of corporate consolidation of the food chain which has been accelerating just as climate change is profoundly altering the conditions for growing food In the midst of this global crisis the fate of our food has slipped into a handful of the world's largest companies Food Chained will bring home what this corporate stranglehold is doing to our daily diet from the explosion of genetically modified foods to the rapid disappearance of plant varieties to the elimination of independent farmers who have long been the bedrock of our food supply Food Chained will touch many nerves for readers including concerns about climate change chronic drought in essential farm states like California the persistence of the junk food culture the proliferation of GMOs and the alarming domination of the seed market and our very life cycle by global giants like Monsanto But not all is bleak when it comes to the future of our food supply Food Chained will also present hopeful stories about farmers consumer groups and government agencies around the world that are resisting the tightening corporate squeeze on our food chain      *Technical Note*, 1929
