description of German Rap as a form of poetry It features the widest research overview yet critically outlining all the main academic trends in dealing with rap The main part of the book includes two different approaches First the Rapschaffen is determined as poesis and thus as a literary practice To this end the common authorship model is explained which combines the adoration of standardized poetic craftsmanship with an implicit promise of authenticity Rapschaffen is then described as an aesthetic activity with oral and literal shares Secondly main characteristics of the genre are pointed out regarding media formal and contentual aspects as well as their interaction It shows that rap is particularly applicable to stage the speaker as cool and confident Finally the social importance of rap in Germany is recapitulated on pleading for a more conscious perception of the literary practice as a cognitively demanding activity In this sense the approach sets an example for how methods of literary analysis can be used for cultural diagnosis
