Gendered Design? Eileen Green,1993-07-30 This collection brings together two areas of research and debate firstly the sociology of gender relations in the workplace and secondly the expanding body of interdisciplinary research into the design of computer systems The book articulates distinctive gender perspectives in relation to IT **Limited Livelihoods** Sonya O.

Rose,2003-09-02 Integrating analytical tools from feminist theory cultural studies and sociology to illuminate detailed historical evidence Sonya Rose argues that gender was a central organizing principle of the nineteenth century industrial transformation in England She elaborates a cultural theory of gender that suggests why it is an inherent aspect of all social and economic relations Analysing employer strategies and state policies and the role of work in family life she demonstrates that neither industrial transformation nor class relations can be understood when reduced to gender neutral and abstract forces

Space, Gender, Knowledge: Feminist Readings Linda McDowell,Joanne Sharp,2016-04-29 Space Gender Knowledge is an innovative and comprehensive introduction to the geographies of gender and the gendered nature of spatial relations It examines the major issues raised by women s movements and academic feminism and outlines the main shifts in feminist geographical work from the geography of women to the impact of post structuralism In making their selection the editors have drawn on a wide range of interdisciplinary material ranging across spatial scales from the body to the globe The book presents influential arguments for the importance of the intersection between space and gender Looking both at geography and beyond the discipline it explores the gendered construction of space and the spatial construction of gender Divided into a number of conceptual sections each prefaced by an editorial introduction this reader includes extracts from both landmark texts and less well known works making it an indispensable introduction to this dynamic field of study

Technology and Women's Empowerment Ewa Lechman,2021-09-08 The near ubiquitous spread of ICT offers unprecedented opportunities for social and economic agents reshapes social and economic structures and drives the emergence of socioeconomic networks This book contributes to the growing body of literature and present state of knowledge offering the reader broad evidence on how new information and communication technologies impact women s economic and social empowerment and hence have an impact on overall welfare creation More specifically it concentrates on demonstrating how ICT may become empowering technologies through their implementation The book is designed to provide

deep insight into the theoretical and empirical evidence on ICT as a significant driver of women's social and economic development. Special focus is given to examining the following broad topics: channels of ICT impact on women's development; the role of ICT in enhancing women's active participation in formal labor markets; examples of how ICT encourages education skills development; institutions development et alia and thus contributes to women's social and economic empowerment as well as case based evidence on ICT's role in fostering women's equality. The primary audience for the book will be scholars and academic professionals from a wide variety of disciplines but mainly those who are concerned with addressing the issues of economic development and growth, social development, the role of technology progress in the context of broadly defined socioeconomic progress. Chapters 1 and 3 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license.

Mainstreaming Equality in the European Union Teresa Rees, 2006-06-19. Mainstreaming Equality in the European Union provides a critical overview and evaluation of the potential role of the EU in perpetuating or breaking down gender segregation in the EU labour force. Teresa Rees draws upon feminist theoretical frameworks in assessing Equal Opportunities policies and the role of training in the labour market. The same economic imperatives which put women's training on the agenda have heightened interest in designing training which attracts women into mainstream provision. Mainstreaming Equality in the European Union addresses the urgent need for academics, education and training providers as well as policy makers to be aware of current thinking at EU level on training policy.

Performing Gender at Work Elisabeth Kelan, 2009-07-16. Providing a unique insight into how gender is performed in contemporary high tech work and introducing a creative and novel way of analyzing the fluidity and rigidity of gender at work through discourse analytic methods, the author highlights how changes in the world of work interact with changes in gender relations.

How Users Matter Nelly Oudshoorn, Trevor Pinch, 2005-08-12. Users have become an integral part of technology studies. The essays in this volume look at the creative capacity of users to shape technology in all phases from design to implementation. Using a variety of theoretical approaches including a feminist focus on users and use in place of the traditional emphasis on men and machines, concepts from semiotics and the cultural studies view of consumption as a cultural activity, these essays examine what users do with technology and in turn what technology does to users. The contributors consider how users consume, modify, domesticate, design, reconfigure and resist technological development and how users are defined and transformed by technology. The essays in part I show that resistance to and non use of a technology can be a crucial factor in the eventual modification and improvement of that technology; examples considered include the introduction of the telephone into rural America and the influence of non users of the Internet. The essays in part II look at advocacy groups and the many kinds of users they represent particularly in the context of health care and clinical testing. The essays in part III examine the role of users in different phases of the design, testing and selling of technology. Included here is an enlightening account of one

company's design process for men's and women's shavers which resulted in a Ladyshave for users assumed to be technophobes Taken together the essays in *How Users Matter* show that any understanding of users must take into consideration the multiplicity of roles they play and that the conventional distinction between users and producers is largely artificial

Virtual Gender Alison Adam, Eileen Green, 2005-08-03 As yet there has been relatively little published on women's activities in relation to new digital technologies *Virtual Gender* brings together theoretical perspectives from feminist theory the sociology of technology and gender studies with well designed empirical studies to throw new light on the impact of ICTs on contemporary social life A line up of authors from around the world looks at the gender and technology issues related to leisure pleasure and consumption identity and self Their research is set against a backcloth of renewed interest in citizenship and ethics and how these concepts are recreated in an on line situation particularly in local settings With chapters on subjects ranging from gender switching on line computer games and cyberstalking to the use of the domestic telephone this stimulating collection challenges the stereotype of woman as a passive victim of technology It offers new ways of looking at the many dimensions in which ICTs can be said to be gendered and will be a rich resource for students and teachers in this expanding field of study

Getting Things Done Virpi Malin, Jonathan Murphy, Marjo Siltaoja, 2013-09-23 This book explores the possibility of a progressive and transformative management which while grounded in the analytic tradition and values of CMS also confronts practical demands of meeting social needs

The Gender-Technology Relation Rosalind Gill, Keith Grint, 2018-12-07 Provides a review of contemporary theory and empirical research into the relationship between feminism and social constructivism Through case studies the book focuses on issues raised by different technologies and on developing theoretical understandings of the gender technology relation

scholars of science and technology alike **Masculinity and the British Organization Man since 1945** Michael Roper, 1994-01-20 The post war period is often regarded as a time when Britain underwent its managerial revolution the family firm and the gentleman amateur giving way to the large bureaucracy and the trained management expert Yet the conception of modern management as an objective process could hardly be further from the truth Drawing on detailed life history interviews with the post war generation of organization men this study explores the intimacies that operate among men in management It argues that despite the rise of professional management relations between managers continue to function in highly subjective ways The pleasure of technical innovation or of seeing a new product through to the market the mixture of rivalry and patronage that surrounds management succession the hard bargaining of industrial relations at every level managerial functions involve the dramatization of emotions among men By challenging the enduring myth of the rational organization man this book sheds new light on gender segregation in management It argues that the exclusion of women from senior positions cannot be understood simply as the outcome of unprofessional practices A focus on the emotional relations between male managers reveals the psychic dimensions of exclusionary behaviour An emotional economy flourishes among men in management but its workings have been hidden by the myth of the rational organization man

Revival: Post-Fordism, Gender and Work (2001) Andrea Wigfield, 2017-07-12 This title was first published in 2001 Addressing a significant gap in existing literature this book presents a gender informed analysis of the post fordist economy It incorporates a gender dimension into the economic restructuring debate on both a theoretical and a practical level and explores the implications of economic restructuring in the workplace for gender relations **Science, Technology, and Society** Sal Restivo, 2005-05-19 Emphasizing an interdisciplinary and international coverage of the functions and effects of science and technology in society and culture Science Technology and Society contains over 130 A to Z signed articles written by major scholars and experts from academic and scientific institutions and institutes worldwide Each article is accompanied by a selected bibliography Other features include extensive cross referencing throughout a directory of contributors and an extensive topical index
