Managing European Union Enlargement Helge Berger, Thomas Moutos, 2004 Leading international economists assess the effects of the 2004 expansion of the European Union In May 2004 the European Union will undergo the largest expansion in its history when ten countries Cyprus the Czech Republic Estonia Hungary Latvia Lithuania Malta Poland Slovakia and Slovenia become members The number of new members and their diversity make this big bang enlargement particularly challenging Not only do these countries vary widely in language culture and geography but also their per capita income is less than half that of existing members EU officials believe that expanded integration will serve the EU s objectives of peace stability prosperity and democracy but the less abstract questions of costs and benefits of enlargement are more complex Each of the chapters in this CESifo volume addresses a different aspect of EU expansion The contributors all leading international practitioners and scholars consider such topics as the effect of euro zone expansion on European Central Bank monetary policy making using the euro as an external anchor for a national currency worker migration and income differentials the Swiss experience with immigration policy in a direct democracy framework detailed sector analysis using a computable general equilibrium model of the world economy investment and job creation and destruction in incumbent member countries and the asymmetric effects of enlargement on high and low income incumbent countries Taken together the chapters provide useful guidance in shaping the EU policies of the future

Privatization Experiences in the European Union Marko Köthenbürger, 2006 Experts evaluate the varied outcomes of privatization experiences in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades Privatization is broadly supported by most academic economists but the results of actual privatization efforts seem mixed In the UK for example telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality In this CESifo volume international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria Denmark Finland France Germany Ireland Italy the Netherlands Spain and the UK The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economywide influences The studies in this volume meet this methodological challenge by using a well defined set of criteria including reducing consumer prices increasing quantity and improving quality by which to make their assessments Background chapters provide a conceptual framework for considering the issues Contributors Pablo Arocena Sean D Barrett Ansgar Belke Michel Berne Henrik Christoffersen Andrea Goldstein G nter Knieps David Newbery Martin Paldam David Parker G rard Pogorel Friedrich Schneider Eric van Damme Ingo Vogelsang Johan Willner

Japan's Great Stagnation Michael M. Hutchison, Frank Westermann, 2006 Experts on the Japanese economy examine Japan's prolonged period of economic underperformance analyzing the ways in which the financial system monetary policy and international financial factors contributed to its onset and duration After experiencing spectacular economic growth and industrial development for much of the postwar era Japan plunged abruptly into recession in the early 1990s and since then has suffered a prolonged period of economic stagnation from which it is only now emerging Japan's malaise marked by recession or weak economic activity commodity and asset price deflation banking failures increased bankruptcies and rising unemployment has been the most sustained economic downturn seen in the industrial world since the 1930s In Japan's Great Stagnation experts on the Japanese economy consider key questions about the causes and effects of Japan's prolonged period of economic underperformance and what other advanced economies might learn from Japan's experience They focus on aspects of the financial and banking system that have contributed to economic stagnation the role of monetary policy and the importance of international financial factors in particular the exchange rate and the balance of payments Among the topics discussed are bank fragility and the inaccuracy of measuring it by the Japan premium the consequences of weak banking regulation the controversial policy of quantitative easing and the effectiveness of currency devaluation for fighting deflation Taken together the contributions demonstrate the importance of a sound financial sector in fostering robust growth and healthy economies and the enormous economic costs of a dysfunctional financial system Contributors

Peterson, 2007 Leading researchers from the United States and Europe report on new findings on the effect of education on equal opportunity using economic and statistical techniques to assess the results of education policy reform in countries including the United States Britain Sweden Germany and Italy Much educational research today is focused on assessing reforms that are intended to create equal opportunity for all students Many current policies aim at concentrating extra resources on the disadvantaged The state of the art research in Schools and the Equal Opportunity Problem suggests however that even sizeable differential spending on the disadvantaged will not yield an equality of results In this CESifo volume leading scholars from the United States and Europe use the tools of economics to assess the outcome of efforts to solve education s equal opportunity problem in a range of countries including the United States Britain Germany Sweden and Italy The evidence shows some routes for advancement testing with high performance standards for example and well designed school choice but also raises considerable doubts about whether many current school policies are effective in dramatically altering the opportunity structure The evidence presented also calls into question the idea that causal peer effects are very strong The contributors examine such topics as the link between education and parental income the problematic past research on peer effects tracking the distribution of educational outcomes human capital policy aimed at disadvantaged students and private public school choice The research suggests that achieving universal primary and secondary education is both urgently needed and feasible Will the international community commit the necessary economic human and political resources The challenge say the editors is as inspiring and formidable as any extraterrestrial adventures and far more likely to enrich and improve life on earth
