Mangrove Coast:

Dynamic Sedimentary Environments of Mangrove Coasts Daniel Friess, Frida Sidik, 2020-12-05 Dynamic Sedimentary Environments of Mangrove Coasts provides knowledge on the importance of sedimentary dynamics in managing mangrove forests In the first part of the book the editors seamlessly offer a general introduction of mangrove sedimentary dynamics This leads into more in depth information on soil surface elevation change sea level rise and the importance of sedimentary dynamics in the loss or gain of blue carbon The book concludes the discussion of mangrove sedimentary dynamics by addressing the issues of climate change e g sea level rise and blue carbon on mangrove restoration and sediment This book will assist coastal managers and academics in addressing the gaps in mangrove restoration and coastal management As such it will be a valuable reference for advanced undergraduate students graduate students researchers academics in the field of coastal restoration and coastal management practitioners Provides a state of the art summary of research into sedimentary dynamics in mangrove forests Includes updates on issues of climate change relevant to mangroves such as blue carbon and sea level rise Presents scientific background and successful case studies for mangrove restoration that can solve problems relating to mangrove management

Threats to Mangrove Forests Christopher Makowski, Charles W. Finkl, 2018-04-20 This book focuses on the worldwide threats to mangrove forests and the management solutions currently being used to counteract those hazards Designed for the professional or specialist in marine science coastal zone management biology and related disciplines this work will appeal to those not only working to protect mangrove forests but also the surrounding coastal areas of all types Examples are drawn from many different geographic areas including North and South America India and Southeast Asia Subject areas covered include both human induced and natural impacts to mangroves intended or otherwise as well as the efforts being made by coastal researchers to promote restoration of these coastal fringing forests

Mangrove Ecosystems Luiz Drude de Lacerda, 2002-03-26 The last few decades have seen a rapid growth of interest in the mangrove ecosystems This is due on the one hand to the perception that mangrove ecosystems are valuable resources and on the other hand due to vested economic interests There is an accelerated rate of destruction of mangroves worldwide Almost all nations of the world tropical belt are concerned with the conservation of this natural wealth but surreptitiously permit the misuse of mangroves for quick monetary returns unabatedly The scientific community and decision makers of many nations are now in a state of alert requesting sound directives for the sustainable use of mangroves worldwide The present publication is an attempt to present in an organized manner the present state of knowledge which could be useful for decision makers and of interest to all those who see the ecological and economical potential of the various types of mangrove ecosystems

Mangrove Dynamics and Management in North Brazil Ulrich Saint-Paul, Horacio Schneider, 2010-09-30 Mangrove ecosystems are being increasingly threatened by human activities Their biotic productivity supplies food and other resources to the human populations that inhabit or make use of them This volume

highlights the results of a ten year German Brazilian research project called MADAM in one of the largest continuous mangrove areas of the world located in northern Brazil Based on the analysis of the ecosystem dynamics management strategies for the conservation and sustainable use of mangroves are presented and discussed Beyond the scientific results this book also provides guidelines for the development of international cooperation projects **Brazilian Mangroves and Salt Marshes** Yara Schaeffer-Novelli,Guilherme Moraes de Oliveira Abuchahla,Gilberto Cintrón-Molero,2023-02-25 This book offers a new ecosystemic approach to the understanding of mangrove and salt marsh ecosystems Brazil has one of the largest areas of mangroves in the world where salt marshes might or might not be associated Different landscapes comprise the extensive coastline where mangrove and salt marsh species composition is discussed through the analysis of physiography zonation and succession processes Both salt marsh and mangrove plants and the associated macroalgae will be characterized in their ecophysiological and phenological aspects as well as genetic and epigenetic diversity The chapters on microbial diversity and litterfall expose the well known importance of these ecosystems as highly productive carbon sinks and pumps The associated fauna of invertebrates benthic meio and macrofaunas especially brachyuran crabs and vertebrates fishes birds and mammals are presented in a special section The conservational approach encompasses issues such as historical ecology economic valuation protected areas environmental education climate changes and adaptive management
