Historical Dictionary of Heidegger's Philosophy Frank Schalow,2019-11-29 Martin Heidegger's thinking is a complex and his terminology is as nuanced as any thinker in the history of philosophy. As the historian of philosophy par excellence, he also exhibits both a greater appreciation and mastery of previous thinkers than any almost any other philosopher before or since. The Historical Dictionary of Heidegger's Philosophy Third Edition addresses this dual challenge of reading, understanding, and interpreting Heidegger's vast writings. The book provides a comprehensive and detailed account of the key terms shaping Heidegger's philosophy, as well as outlining the development of his thought spanning the entirety of his career spanning almost sixty years. The Dictionary also includes a discussion of Heidegger's seminal writings spanning his entire Gesamtausgabe Complete Edition up through volume 99 of the projected 102 volumes. This third edition of Historical Dictionary of Heidegger's Philosophy Third Edition contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 800 cross-referenced entries that provide a clear and comprehensive exposition of the key developments in his life and his thought. This book is an excellent resource for students, researchers, and anyone wanting to know more about Martin Heidegger.

The Cambridge Companion to Heidegger Charles Guignon,1993-02-26 This volume contains both overviews of Heidegger's life and works and analysis of his most important work, *Being and Time*.

The A to Z of Existentialism Stephen Michelman,2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II. The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the

philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre's hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement Routledge Encyclopedia of Philosophy: Index Edward Craig, 1998 Volume seven of a ten volume set which provides full and detailed coverage of all aspects of philosophy including information on how philosophy is practiced in different countries who the most influential philosophers were and what the basic concepts are **Encyclopedia of Phenomenology** Lester Embree, 2013-06-29 This encyclopedia presents phenomenological thought and the phenomenological movement within philosophy and within more than a score of other disciplines on a level accessible to professional colleagues of other orientations as well as to advanced undergraduate and graduate students Entries average 3 000 words In practically all cases they include lists of works For Further Study The Introduction briefly chronicles the changing phenomenological agenda and compares phenomenology with other 20th Century movements The 166 entries are about matters of seven sorts 1 the four broad tendencies and periods within the phenomenological movement 2 twenty three national traditions of phenomenology 3 twenty two philosophical sub disciplines including those referred to with the formula the philosophy of x 4 phenomenological tendencies within twenty one non philosophical disciplines 5 forty major phenomenological topics 6 twenty eight leading phenomenological figures and 7 twenty seven non phenomenological figures and movements of interesting similarities and differences with phenomenology Conventions Concerning persons years of birth and death are given upon first mention in an entry of the names of deceased non phenomenologists The names of persons believed to be phenomenologists and also for cross referencing purposes the titles of other entries are printed entirely in SMALL CAPITAL letters also upon first mention In addition all words thus occurring in all small capital letters are listed in the index with the numbers of all pages on which they occur To facilitate indexing Chinese Hungarian and Japanese names have been rearranged so that the personal name precedes the family name Historical Dictionary of Heidegger's Philosophy Alfred Denker, 2000-04-12 The first

encyclopedia of the life and work of this famous and influential German philosopher the dictionary explains his contributions with a primary emphasis on key concepts and works The Cambridge Companion to Heidegger Charles B. Guignon, 2006-07-10 Martin Heidegger is now widely recognized as one of the greatest philosophers of the twentieth century He transformed mainstream philosophy by defining its central task as asking the question of being His thought has contributed to the turn to hermeneutics and to postmodernism and poststructuralism Moreover the disclosure of his deep involvement in Nazism has provoked much debate about the relation of philosophy to politics This edition brings to the fore other works as well as alternative approaches to scholarship The essays cover topics such as Heidegger's conception of phenomenology his relation to Kant and Husserl his account of truth and his stand on the realism anti realism debate This edition includes a new preface by the editor revised versions of several essays from the first edition and an exhaustive bibliography providing guidance for both newcomers to Heidegger's work and established scholars Heidegger Richard Polt, 2013-10-16 Heidegger is a classic introduction to Heidegger's notoriously difficult work Truly accessible it combines clarity of exposition with an authoritative handling of the subject matter Richard Polt has written a work that will become the standard text for students looking to understand one of the century's greatest minds **Translating Heidegger** Miles Groth, 2017-01-01 In *Translating Heidegger* Groth points to mistranslations as the root cause of misunderstanding Heidegger In this unique study Groth examines the history of the first English translations of Heidegger's works and reveals the elements of Heidegger's philosophy of translation *Heidegger's Hidden Sources* Reinhard May, 2005-08-02 Heidegger's *Hidden Sources* documents for the first time Heidegger's remarkable debt to East Asian philosophy In this groundbreaking study Reinhard May shows conclusively that Martin Heidegger borrowed some of the major ideas of his philosophy on occasion almost word for word from German translations of Chinese Daoist and Zen Buddhist classics The discovery of this astonishing appropriation of non Western sources will have important consequences for future interpretations of Heidegger's work Moreover it shows Heidegger as a pioneer of comparative philosophy and transcultural thinking **The Heidegger Concordance** François Jaran, 2013-01-01 Plans of Martin Heidegger's complete works Gesamtausgabe v 1 p x xxviii **The Heidegger Concordance** Francois Jaran, Christophe Perrin, 2013-07-04 The Heidegger Concordance represents the first index of Martin Heidegger's Collected Works Gesamtausgabe This three volume work offers a comprehensive list of the most relevant concepts in Heidegger's writings and their corresponding occurrences in all 81 published volumes of the Gesamtausgabe As an essential reference tool for anyone working in Heidegger Studies today the Concordance will help students and scholars navigate their way through the almost 30 000 pages of Heidegger's published writings Volumes 1 and 2 present an introduction chronology of the Gesamtausgabe and complete index of German terms Volume 3 offers indices of Greek and Latin terms and proper names The Heidegger Concordance includes more than 7000 entries It constitutes a hugely important research tool and one of the most significant contributions to Heidegger Studies in recent years

Collins, 2015-03-14 Martin Heidegger philosophy s hidden king or leading exponent of a dangerously misguided secular mysticism Heidegger has been acclaimed as the most powerfully original philosopher of the twentieth century Profoundly influential on deconstruction existentialism and phenomenology he stands behind all major strands of post structuralist and postmodern thought Heidegger announced the end of philosophy and of humanism and was a committed Nazi and vocal supporter of Hitler s National Socialism Was Heidegger offering a deeply conservative mythology or a crucial deconstruction of philosophy as we have known it *Introducing Heidegger* provides an accessible introduction to his notoriously abstruse thinking mapping out its historical contexts and exploring its resonances in ecology theology art architecture literature and other fields The book opens up an encounter with a kind of thinking whose outlines might still not yet be clear and whose forms might still surprise us

Heidegger's Philosophy of Being Herman Philipse, 1999 This scrupulously researched and rigorously argued book is the first to interpret and evaluate the central topic of Maritn Heidegger s philosophy his celebrated question of being in the context of the full range of Heidegger s thought With this comprehensive approach Herman Philipse distinguishes in unprecedented ways the center from the incidental in Heidegger s philosophy Phillopse begins by explaining which problems an interpretation of Heidegger s question of being should solve and he specifies which type of interpretation is the best basis for an evaluation of Heidegger s idea of being and shows [Philosophy](#) Hans E.
