Marx And The New Individual:

Marx and the New Individual (RLE Marxism) Ian Forbes, 2015-04-17 In what is the first sustained analysis of Marx's attitude to the puzzle of the individual in history and society this book first published in 1990 challenges received views on the importance of class analysis and the place of a theory of human nature in Marx's thought The radical possibilities of individual agency in society are explored within a Marxian framework and without recourse to the current fashions of methodological individualism or rational choice theory In the context of the apparent antagonism between collectivist and individualist approaches to political explanation and social change the author establishes that a New Individual of singular importance for the understanding of contemporary society can be identified For the first time the Grundrisse provides the basis of a major analysis of Marx's thoughts on the individual By illustrating the nature of the connections between collective existence and individual experience Ian Forbes makes an important contribution towards the revitalization of socialist thought He also develops a valuable counterpoint to rational actor models of politics and liberal theories of justice alike by establishing the importance of a political theory that values human agency as much as it understands social and historical processes

Marx and the New Individual Ian Forbes, 2015 In what is the first sustained analysis of Marx's attitude to the puzzle of the individual in history and society this book first published in 1990 challenges received views on the importance of class analysis and the place of a theory of human nature in Marx's thought The radical possibilities of individual agency in society are explored within a Marxian framework and without recourse to the current fashions of methodological individualism or rational choice theory In the context of the apparent antagonism between collectivist and individualist approaches to political explanation and so **Marxism and the Individual** Cem Eroğul, 2021-09-29 This book attempts to develop a Marxist theory of the human individual It contends that the standard description of the human as a bio psycho social being is fundamentally deficient as it doesn't specify which of these attributes is the determining one As long as this is not done the real nature of humanity cannot be uncovered

Marx and Hegel on the Dialectic of the Individual and the Social Sevgi Dogan, 2018-08-15 Marx and Hegel on the Dialectic of the Individual and the Social is a detailed investigation of the major works of Hegel and the young Marx with exploring how the concept of the individual is positioned within their ontologies and how this positioning is reflected in their related political views Instead of contrasting a Marxist understanding of the individual with that of a liberal thinker Sevgi Dogan chooses to take Hegel's theory of the state as representative of the modern state which Marx criticizes The decision to be in opposition to Hegel rather than some other liberal thinkers is important for two reasons First since Marx has developed many of his early ideas in critical interaction with Hegel this comparative approach enables the book to present a more thorough and well grounded exposition of Marx's arguments Second since Hegel himself has also criticized the concepts of liberal ideology in many respects differentiating Marx's arguments from those of Hegel's enables the book to underline how and why Hegel's critique of liberal ideology falls

short of actually empowering individuals in the way that Marx's account does The Individual in International Law Anne Peters, Tom Sparks, 2024 *The Individual in International Law* collects the work of esteemed scholars to examine the effects of humanisation on international law and how individual status rights and obligations have changed the international legal system throughout history and into the present day **The Concept of the Individual in the Thought of Karl Marx** Zhi Li, 2023-04-08 This book reconstructs the concept of the individual in Marx as the key to a fresh interpretation of Marxian philosophy Marx moved from an examination of the contingency and indeterminacy of individual consciousness in his early years to a critique of the atomistic individual and materialised social relations in his later years His thought proposes that real individuals are the basis for an understanding of human society that promotes the emancipation of humankind Marx's philosophy has often been misunderstood as lacking a concept of the individual In China this misunderstanding not only relates to cultural and linguistic particularities the word individual is seldom used in Chinese but also relates to a misleading view of socialism and communism This book helps remedy this misunderstanding and draws important comparisons and contrasts between Marx's concept of the individual with that of liberalism and between Western and Eastern Marxism

Marx and We Sun Zhengyu, 2024-08-01 Marxist ideology is the only fully scientific ideology the only one able to guide mankind toward the settlement of fundamental social problems and to point out the royal road for the proletariat to take in its march toward socialism and communism Without Marxism modern people cannot establish true social ideals nor can they engage in the rational pursuit of values Without Marxism modern people cannot choose the correct path of development nor can they build up new forms of civilizations Without Marxism modern people would never base their commitments to schedule the consensus building effort and support the consensus building process on any irrefutably and sufficiently sound theoretical foundations *Marx's Temporalities* Massimiliano Tomba, 2012-11-09 The book rethinks key categories of Marx's work beyond any philosophy of history showing how the plurality of temporal layers that are combined and come into conflict in the violently unifying historical dimension of modernity are central to Marx's thought In Marx's Laboratory, 2013-09-13 *In Marx's Laboratory* Critical Interpretations of the Grundrisse provides a critical analysis of the Grundrisse as a crucial stage in the development of Marx's critique of political economy Stressing both the achievements and limitations of this much debated text and drawing upon recent philological advances this volume attempts to re-read Marx's 1857-58 manuscripts against the background of Capital as a laboratory in which Marx first began to clarify central elements of his mature problematic With chapters by an international range of authors from different traditions of interpretation including the International Symposium on Marxian Theory this volume provides an in-depth analysis of key themes and concepts in the Grundrisse such as method dialectics and abstraction abstract labour value money and capital technology the general intellect and revolutionary subjectivity surplus value competition crisis and society gender ecology and pre-capitalist forms Contributors include Chris Arthur Luca Basso Riccardo Bellofiore George Caffentzis Martha Campbell Juan I Igo Carrera

Vision Vanessa Christina Wills, 2024 A central debate among scholars of Marx concerns whether Marxism has a moral content or is totally amoral perhaps either because it embraces a strict economic determinism or because it nihilistically sides with the proletariat without offering any objective justification for that stance Philosopher Vanessa Christina Wills argues that Marx does articulate an ethical perspective that is present throughout his writings both the more obviously humanistic and philosophical early writings and his later economic and more empirically grounded studies such as Capital The purposiveness of labor gives rise to a normativity already inherent in the present state of things one that can guide us in knowing what sort of world we should build and that further prepares us to build it **Classical Social Theory and**

Modern Society Edward Royce, 2015-01-22 Karl Marx mile Durkheim and Max Weber are indispensable for understanding the sociological enterprise They are among the chief founders of the discipline and among the foremost theorists of modernity and their work can stimulate readers to reflect on their own identities and worldviews Classical Social Theory and Modern Society introduces students to these three thinkers and shows their continued relevance today The first chapter sets the stage by situating the work of Marx Durkheim and Weber in the context of three modernizing revolutions the Enlightenment the French Revolution of 1789 and the Industrial Revolution Three overview chapters follow that summarize the key ideas of each thinker focusing on their contributions to the development of sociology and their conceptions of modern society The last portion of the book explores the thinking of Marx Durkheim and Weber on four themes the pathologies of modern society the predicament of the modern individual the state and democracy and socialism versus capitalism These thematic chapters place Marx Durkheim and Weber in dialogue with one another offering students the opportunity to wrestle with conflicting ideas on issues that are still significant today Classical sociology is essential to the teaching of sociology and also an invaluable tool in the education of citizens **Marx's Construction of Social Theory (RLE Marxism)** J.M.

Barbalet, 2015-04-17 This study first published in 1983 explores the connections between Marx's philosophy and his empirical analysis of society and state by showing the different meanings of many of Marx's concepts as their role in his theory changes and the theory itself develops Beginning with an examination of Marx's search for a sound epistemological basis on which to build a social theory Dr Barbalet then gives an analysis of the way in which Marx continually modifies the concepts he uses and continues with an examination of the different functions they are given in different theoretical settings Various nuances of Marx's thought often obscured by the simplistic early/late dichotomy are revealed by Dr Barbalet's close attention to the progressive transformation of Marx's concepts and by his scrupulous analysis of them in not only their textual but also their theoretical context Finally the book examines the manner in which Marx's construction of social theory by its very nature means that some material is replaced by other theoretical fabric as the theoretical structure itself is in different ways
